1. DFAs, Stage 1

Construct DFAs to recognize each of the following languages. Let $\Sigma = \{0, 1, 2, 3\}$.

(a) All binary strings.

(b) All strings whose digits sum to an even number.

(c) All strings whose digits sum to an odd number.

2. DFAs, Stage 2

Construct DFAs to recognize each of the following languages. Let $\Sigma = \{0, 1\}$.

(a) All strings which do not contain the substring 101.

(b) All strings containing at least two 0’s and at most one 1.

(c) All strings containing an even number of 1’s and an odd number of 0’s and not containing the substring 10.
3. NFAs
(a) What language does the following NFA accept?

(b) Create an NFA for the language "all binary strings that have a 1 as one of the last three digits".

4. DFAs & Minimization
(a) Convert the NFA from 3a to a DFA, then minimize it.

(b) Minimize the following DFA:
