Foodefits
Presented by Amanda Loh and Amarpal Singh
Motivation and Purpose

**Scenario:** You just got out of class at 5:30pm. You’re starving and don’t want to eat alone. However, you don’t know who else is hungry right now. You also don’t know what you want to eat and need help deciding.

**Purpose:** Foodefits will help you find friends or someone new, depending on your preferences, that is also hungry and helps you decide a restaurant to eat at. It’s on demand matching, where the app can match you with 1+ people.
Why Foodefits?

- Eating out is a big part of life!
- Food visuals generate interest in a restaurant
- This is NOT a dating app so app is more casual!
- Filters can be applied (gender, restaurant only, food buddy only, both)
- Business side database
