Your Water Drinking Expert

Solution:
Design a mobile app that tracks user water and liquid intake, and reminds them to drink water.

Problem:
60% of human boy is made of water. 75% of Americans suffer chronic dehydration. People often forget to drink enough water.

Value Prop:
Aqueous helps you track liquid intake and reminds you to drink water non-intrusively.

Features:
Water Tracking
Data Visualization
Smart Reminders

Design Iterations:
Early Sketches
Paper Prototype
Digital Prototype
