

CSE 442 - Data Visualization

Interaction

Jeffrey Heer University of Washington

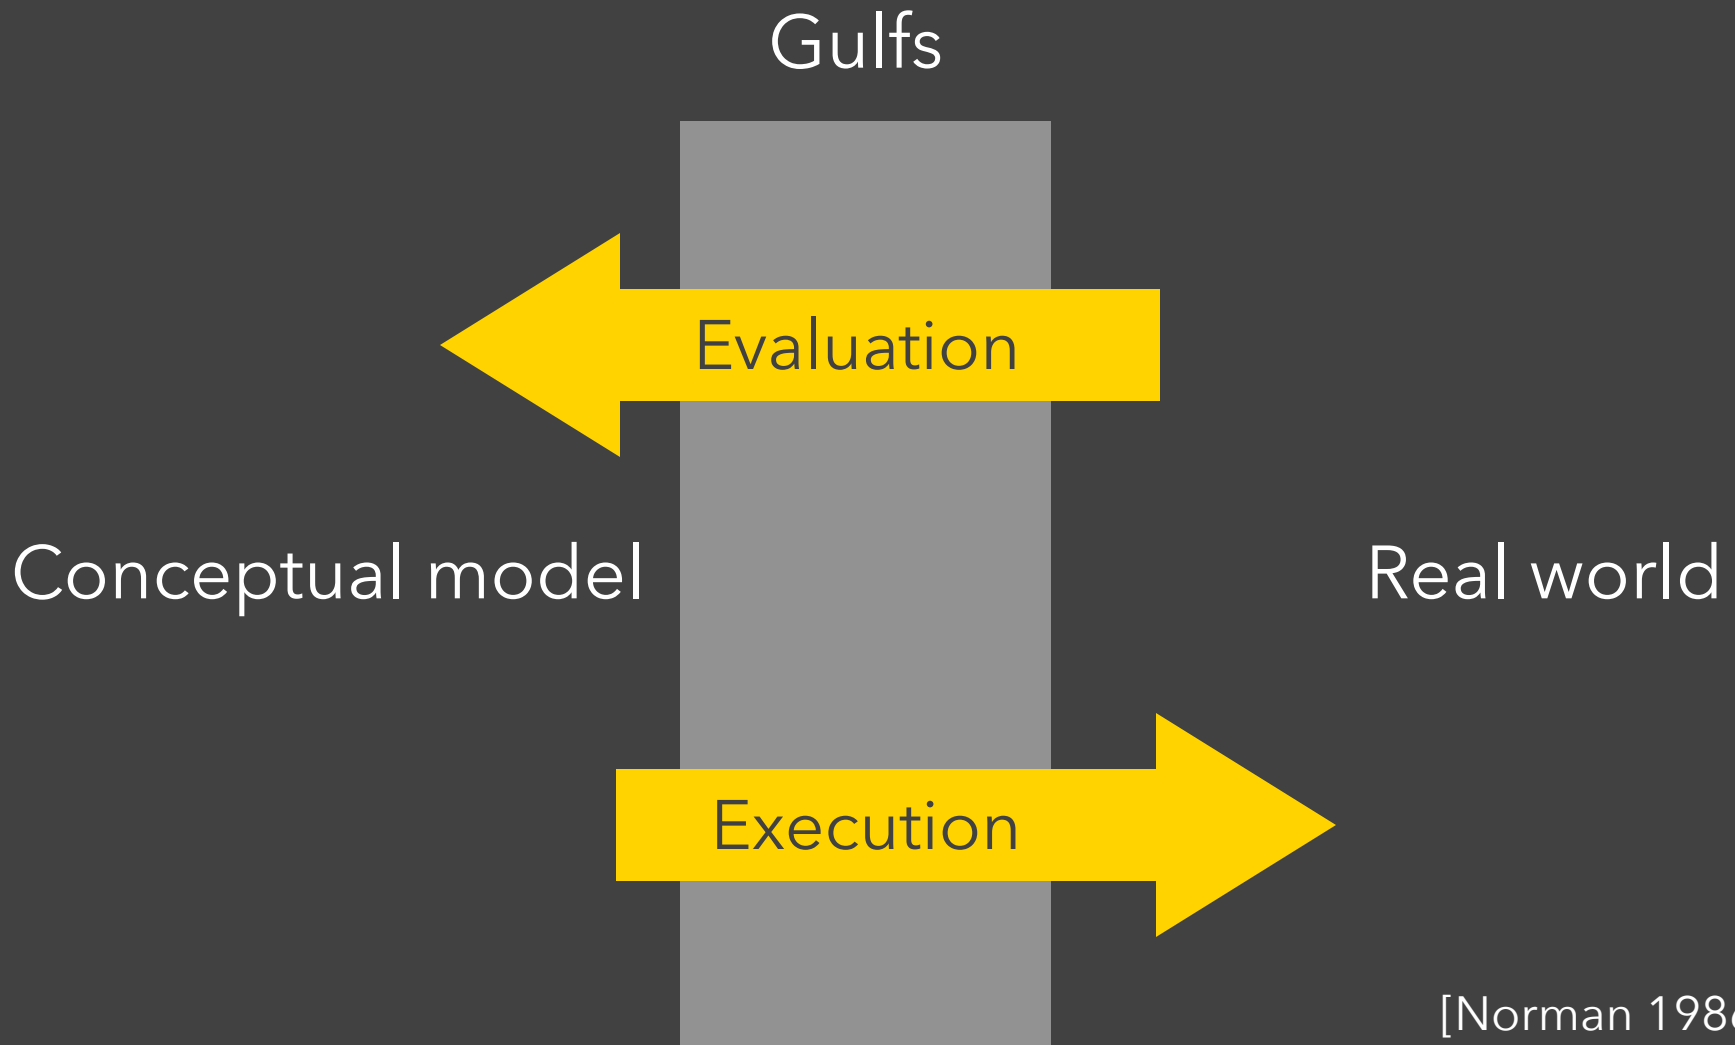

[There is an] apparent challenge that computational artifacts pose to the longstanding distinction between the physical and the social, in the special sense of those things that one designs, builds, and uses, on the one hand, and those things with which one communicates, on the other.

“Interaction” – in a sense previously reserved for describing a uniquely interpersonal activity – seems appropriately to characterize what goes on between people and certain machines as well.

Lucy Suchman, *Plans and Situated Actions*

Interaction between people and machines requires *mutual intelligibility* or *shared understanding*.

Gulfs of Execution & Evaluation

[Norman 1986]

Gulf of Execution

The difference between the user's intentions and the allowable actions.

Gulf of Evaluation

The amount of effort that the person must exert to interpret the state of the system and to determine how well the expectations and intentions have been met.

[Norman 1986]

Gulf of Evaluation

Gulf

Conceptual model:
 x, y related?

Real world:

Issues with Textual Queries

1. For programmers
2. Rigid syntax
3. Only shows exact matches
4. Too few or too many hits
5. No hint on how to reformulate the query
6. Slow question-answer loop
7. Results returned as table

HomeFinder

The yellow dots above are homes in the DC area for sale. You may get more information on a home by selecting it. You may drag the 'A' and 'B' distance markers to your office or any other location you want to live near. Select distances, bedrooms, and cost ranges by dragging the corresponding slider boxes on the right. Select specific home types and services by pressing the labeled buttons on the right.

Introduction to D3.js

Thursday, April 13 - 4:30-5:50pm - PAA A118

Final Project Proposal

Project topic, goals, datasets & team members.

You should work in **teams of 3-4**.

Submit proposal form by **Tuesday 4/18, 5pm**.

If you do not have team mates, you should:

- Use the facilities on Canvas
- Stay after class/tutorial to meet potential partners

FP: Interactive Prototype

Create an interactive visualization. Choose a driving question in your topic area and develop an appropriate visualization + interaction techniques, then deploy your visualization on the web.

Due by 5pm on **Wednesday, May 3.**

We will discuss in greater detail next week!

An Interaction Grammar (Vega-Lite Selections)

Satyanarayan et al. *InfoVis'17 Best Paper*

Specifying Interactions

Typically interactive behaviors are programmed using *imperative* **event handler callbacks**. When events occur, you must process the event, update the application state, re-draw, etc.

For a variety of visual analysis operations, what if you could *declaratively* specify the **semantics** of an interaction and have the event handling logic automatically **synthesized**?
