# Generals Wary of Move to Cut Their Ranks

By [GINGER THOMPSON](#) and [THOM SHANKER](#)

WASHINGTON — Maj. Gen. Paul D. Eaton, a retired Army officer, is familiar with the perks and pitfalls of power, having commanded tens of thousands of troops at Fort Benning, Ga., managed budgets exceeding \$2 billion in Iraq, and overseen layers upon layers of staff members who helped manage both his professional duties and his personal life.

He has experienced the full range of lifestyles that come with military leadership, living at one point in an elegant antebellum mansion, and at another, with eight other officers crowded in a marble bathhouse behind one of [Saddam Hussein's](#) old palaces.

When he traveled, he was occasionally able to justify the use of military aircraft, but most times, he said, he flew coach. And today he lives on a pension worth 75 percent of his military salary, with health benefits that cover everything except dental and eye care for himself and his wife.

“We are well compensated, and we live very comfortable lives,” General Eaton said, referring to the military’s most senior leaders. “But when you look at all the things going on around a general, the nation is getting a very, very high return on its money.”

Not everyone at the Pentagon agrees. Two weeks ago, Defense Secretary [Robert M. Gates](#) announced a sweeping effort to improve efficiency that, among other things, takes aim at the military’s sacrosanct corps of generals and admirals, ordering his staff to cut at least 50 positions, and making clear that he would be happier if they cut more.

OWNERS OF THE INTERNET  
Techs look and Google face a backlash, from users and regulators alike, over the way they have handled sensitive data

**J**OHNNIE STOCOMBE, Canada's privacy commissioner, is in talks with Facebook in August over the social networking site's track record, agreeing to change its policies within a year to comply with the country's privacy law, says Ms Stocome. The company appears to be coming up with an important part of that deal, which is not giving users a clear and easy-to-understand choice over whether to permit data to be shared with third parties. "It doesn't seem to me that Facebook is going to be right to opt out of this issue," she says, fearing that, without a change of course, the firm could soon become the subject of another formal investigation by her organisation.

Facebook is not the only internet giant to provoke the ire of data watchdogs. Google endured scathing criticism this week following news that it had accessed some personal communications sent over unsecured Wi-Fi data networks in homes and offices in some 30 countries. On May 17th Peter Schaar, Germany's federal commissioner for data protection, called for an independent investigation into Google's behaviour, claiming that it had "deeply disrupted normal rules in the development and usage of software."

The cases highlight rising tension between guardians of privacy and internet firms. And they reflect concern among web users about how private data are made public. Several government internet

regulators such as Cory Doctorow, a science-fiction author, and Iain Stewart, a politician, have abandoned Facebook. Sites such as Quora and Book Depository are warning others to do so, threatening May 20th for a mass Facebook "boycott".

This is unlikely to stop the momentum of Facebook, which is poised to claim half a billion members and which drove even more visitors as a whole to its site last month. Firm revenues have been raised at the company's headquarters in Menlo Park, where bosses are reading up on how to respond. Several online folk are now hinting that Facebook will soon roll out stronger privacy controls to make it easier to keep more data hidden. MySpace, a rival, is already making its controls stricter to an extent to woo disaffected Facebookers to its service.

A revolt over Facebook's handling of privacy has been brewing for some time. In December the social network changed the default settings on its privacy controls so that individuals' personal information would be shared with "everyone" rather than selected friends. Facebook argued this reflected a shift in society towards greater openness and noted that users could still adjust privacy settings back again. But internet privacy activists lobbied hard to be listened.

The switch should not have come as a surprise. Early on, many social networks

reportedly tough privacy policies in order to attract and increase users. But as more joint controls are gradually loosened to encourage more sharing, as people share more, Facebook can increase the traffic against which it sells advertising. And the more it learns about users' likes and dislikes, the better it can target ads that generate hundreds of millions of dollars.

Privacy groups have still following a developers' conference last month at which Mark Zuckerberg, Facebook's boss, announced yet another series of policy changes. One that raised irritation was an "opt-out personalisation" feature that lets remote third-party websites access Facebook data when people visit. Critics say that Facebook has made it tricky to disable this feature, which may explain why its similar Facebook is so much.

European officials are questioning both Facebook too. This month a group of data-protection experts who advise the European Commission wrote to the social network, calling its default settings "unacceptable" and asking it to

## Homer Pace After Age 34

If the accusations are correct, Bonds was 34 in his first season on steroids. Here are projected home run paces for each player after age 34.

----- PROJECTED PACE BASED ON AVERAGE OF PREVIOUS FIVE SEASONS

**Aaron**  
Actual homers slightly outpace projected homers for five seasons.

**Ruth**  
Averaged 46.4 homers a season from age 30 to 34. Averaged 42.5 for next four seasons.

**Bonds**  
From age 35 to 39, he averaged 14 more homers a season than projected.

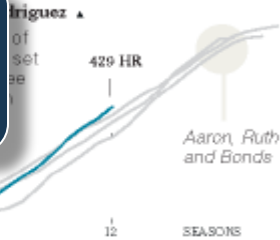

Note: Ages as of July 1 of each season.

## Others Taking Aim

ence

**Albert Pujols**  
Averaging 40 homers a season, he has started stronger than the three leaders did.

**Ken Griffey Jr.**  
Many thought he would be the first to catch Ruth and Aaron until injuries limited his output.

(257th).

**Alex Rodriguez**  
429

**Albert Pujols**  
201

Youngest to reach 400 homers.

Second most ever in first five seasons.

## Differing Paths to the Top of the List

# Beginning

## Steroids or Not, the Pursuit Is On

Barry Bonds is taking aim at the career home run record. He needs only six more to tie Babe Ruth and 47 to equal Hank Aaron.

- Hank Aaron**  
755 homers  
23 seasons
- Babe Ruth**  
714 homers  
22 seasons
- Barry Bonds**  
708 homers  
20 seasons

**Bonds takes lead**  
Home runs after 16 seasons  
Bonds 567  
Aaron 554  
Ruth 514

According to allegations in a book about Bonds, he began taking steroids before the 1999 season, his 14th in the league. Two seasons later, he hit 73 home runs, surpassing Aaron's career pace.

### Homer Pace After Age 34

If the accusations are correct, Bonds was 34 in his first season on steroids. Here are projected home run paces for each player after age 34.

#### Aaron

Actual homers slightly outpace projected homers for five seasons.

#### Ruth

Averaged 46.4 homers a season from age 30 to 34. Averaged 42.5 for next four seasons.

#### Bonds

From age 35 to 39, he averaged 14 more homers a season than projected.

# Middle

## Others Taking Aim

### Alex Rodriguez

Is ahead of the pace set by all three home run leaders.

### Albert Pujols

Averaging 40 homers a season, he has started stronger than the three leaders did.

### Ken Griffey Jr.

Many thought he would be the first to catch Ruth and Aaron until injuries limited his output.

# End

# Budget 2010: reaction from around the UK

People in key constituencies around the country give their responses to Alistair Darling's budget

Introductory Text

Consistent Visual Platform

by **Shilpa Wymer** and Carly Levell  
Wednesday 24 March 2010 15:00 GMT

**Smith and Fulham**

**Shilpa Wymer**, 40, is managing director of two branches of Pitman Training Ltd, a training school specialising in secretarial and PA training

Enquiries from individuals suddenly dropped off a cliff from October 2008 and in January last year we had to lay off a couple of people, though things have picked up since. The budget seems very positive and shows the government are thinking about small and medium sized businesses at last. I think the measures will help businesses be more confident, which will have a knock-on effect on us. It has turned my head and made me think about which way I will vote.

### Ramadi: The Government Provides an Opening for ISIS **ISIS Control**

Tensions between this city's residents, who are mostly Sunni, and the central government had been brewing here for at least a year. Then in December, Iraq's prime minister, Nuri Kamal al-Maliki, ordered security forces to dismantle a protest camp — an outlet for disenchanting Sunnis angered at their treatment by the Shiite-dominated government. The action ignited days of violence and created the opening ISIS needed to seize parts of the city, the provincial capital.

Lake Tharthar

### Falluja: A Symbolic Fall **ISIS Control**

Just days after the raid on the camp in Ramadi, ISIS fighters destroyed the Police Headquarters and mayor's office here, planted their flag on government buildings and decreed the city to be theirs. Ten years earlier, American forces had captured this city from Qaeda-style insurgents at a considerable cost of American lives.

# Introducing Idyll

Idyll is a tool that makes it easier to author interactive narratives for the web. The goal of the project is to provide a friendly markup language — and an associated toolchain — that can be used to create dynamic, text-driven web pages.

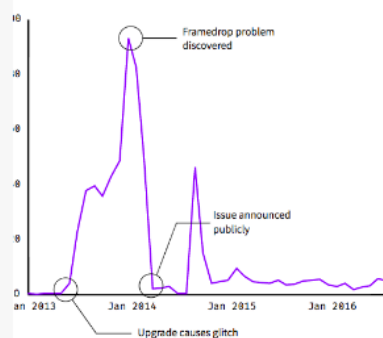

Idyll helps you create documents that use common narrative techniques such as embedding interactive charts and graphs, responding to scroll events, and [explorable explanations](#). Additionally, its readable syntax facilitates collaboration between writers, editors, designers, and programmers on complex projects.

# The Etymology of Trig Functions

By: [Matthew ConLen](#)

*Ed. Note: Mouseover the blue links to see concepts demonstrated visually.*

You may have learned about trigonometric functions such as **sine** and **cosine** as being defined by the ratios of sides of a triangle (*SOHCAHTOA*), or in terms of points and lines related to the unit circle. For me, it didn't totally click until I started to think visually about inscribing a triangle inside of a circle.

For example, you can think about the sine function as measuring [the distance from the x-axis](#) of a point on the unit circle at a particular angle. The sign (+/-) of that value indicates if the point lies above or below the axis. Similarly the cosine can be thought of as measuring [the distance from the y-axis](#) of that same point.

It is useful to note that the cosine of an angle is the same as the sine of the complement of the angle. In other words, it is the same operation as sine, just with respect to the y-axis instead of the x-axis.

The word *sine* originally came from the latin *sinus*, meaning "bay" or "inlet". However, it had a long path to get there. The [earliest known reference](#) to the sine function is from Aryabhata the Elder, who used both *ardha-jya* (half-chord) and *jya* (chord) to mean *sine* in Aryabhatiya, a Sanskrit text finished in 499 CE.

*Jya*, meaning chord, became *jiba* in Arabic, and was abbreviated as just *jb*. When the term was translated to latin in the twelfth century, *jb* was incorrectly read as *jaib* (meaning "bay" or "inlet"), and thus translated as *sinus*.

The sine function has a [direct connection to chords on a circle](#) . Pick two points on the unit circle, then the length of the line connecting the two points is exactly twice the value of the sine of half the angle between them. That is,  $\text{chord\_length}(\theta) / 2 = \sin(\theta / 2)$  .

$$\sin(-1.86) = -0.9590$$

$$\tan(-1.86) = 3.3851$$

$$\sec(-1.86) = -3.5297$$

$$\cos(-1.86) = -0.2833$$

$$\cotan(-1.86) = 0.2954$$

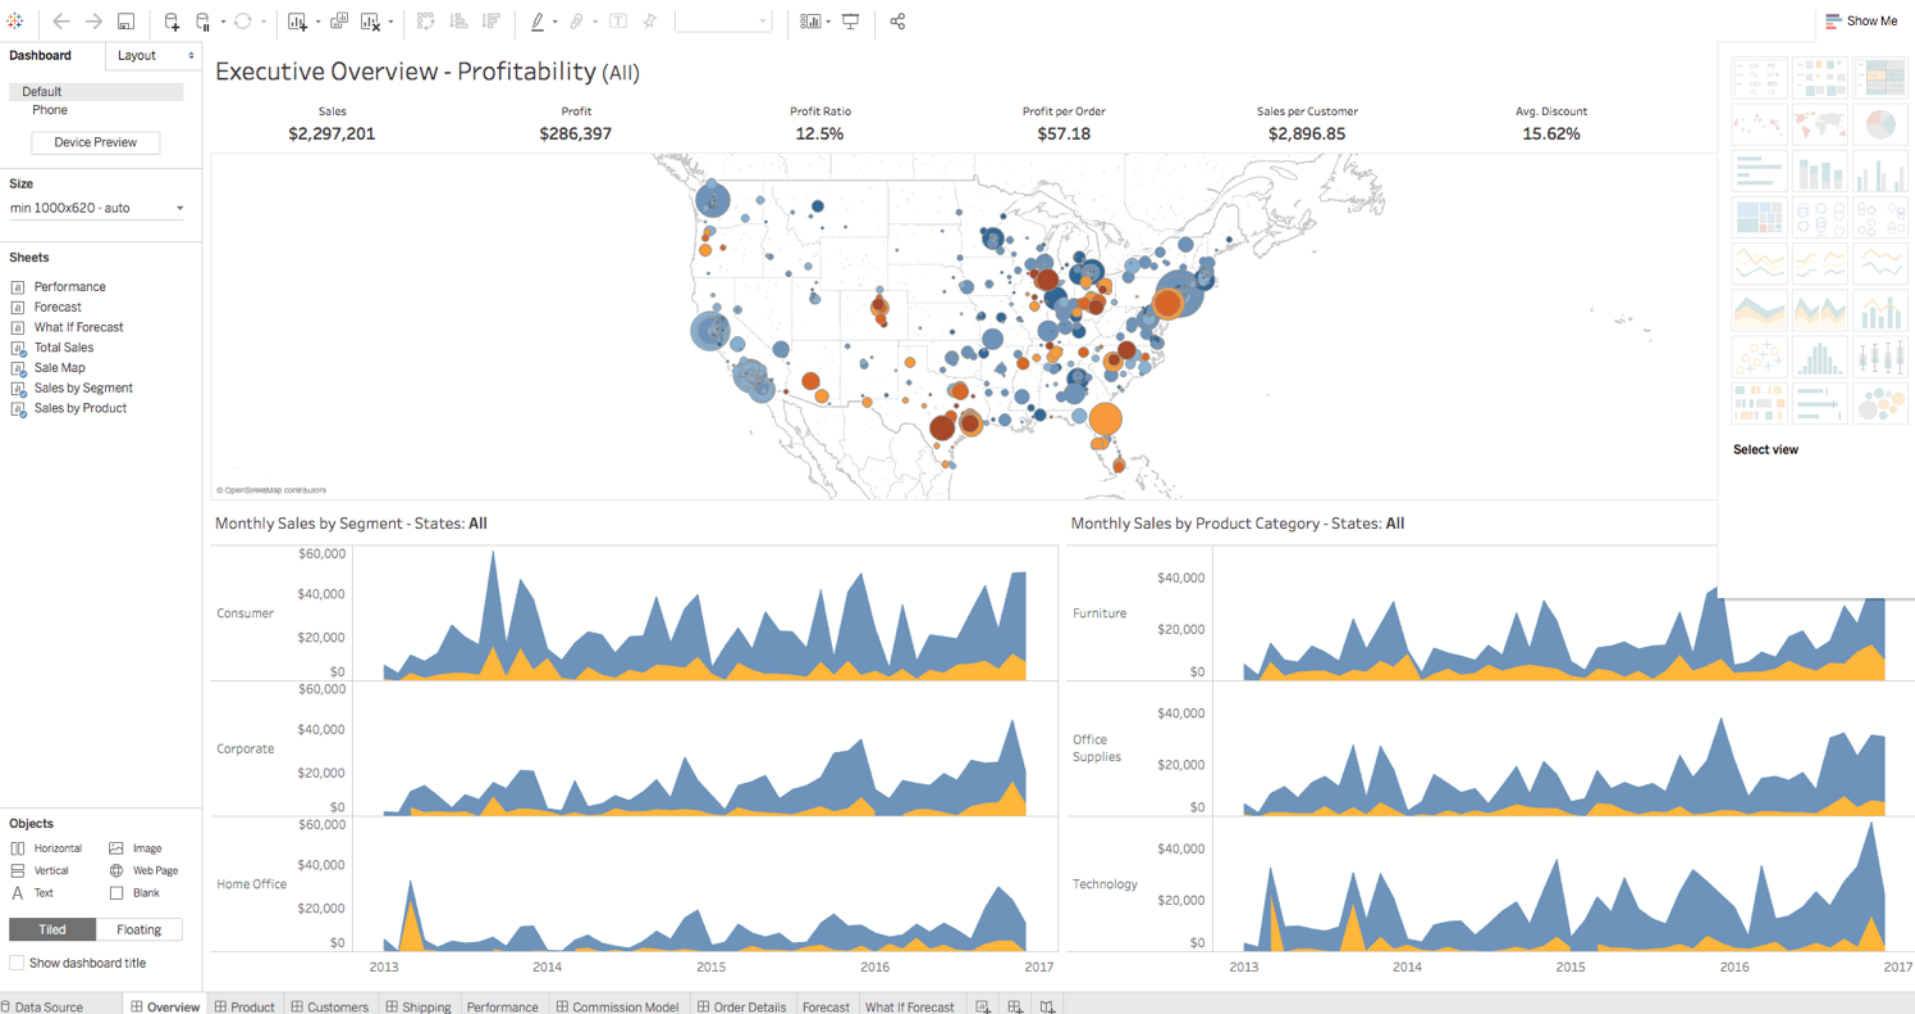

$$\operatorname{cosec}(-1.86) = -1.0427$$

# Sequence Ratings

Evaluation with 55 subjects, recruited via Mechanical Turk.

Subjects rated quality and clarity on a 5-point Likert scale.

In all but one case, GraphScape's top pick among highest-rated.

GraphScape correlates strongly with subject rankings ( $\rho = 0.80$ ,  $p < 0.001$ ) when both transition & sequence terms are included.

# GraphScape

Previously we've discussed approaches for automatic design of a **single visualization**.

GraphScape supports automated design methods for **collections of visualizations**.

Plenty of future work to do here!

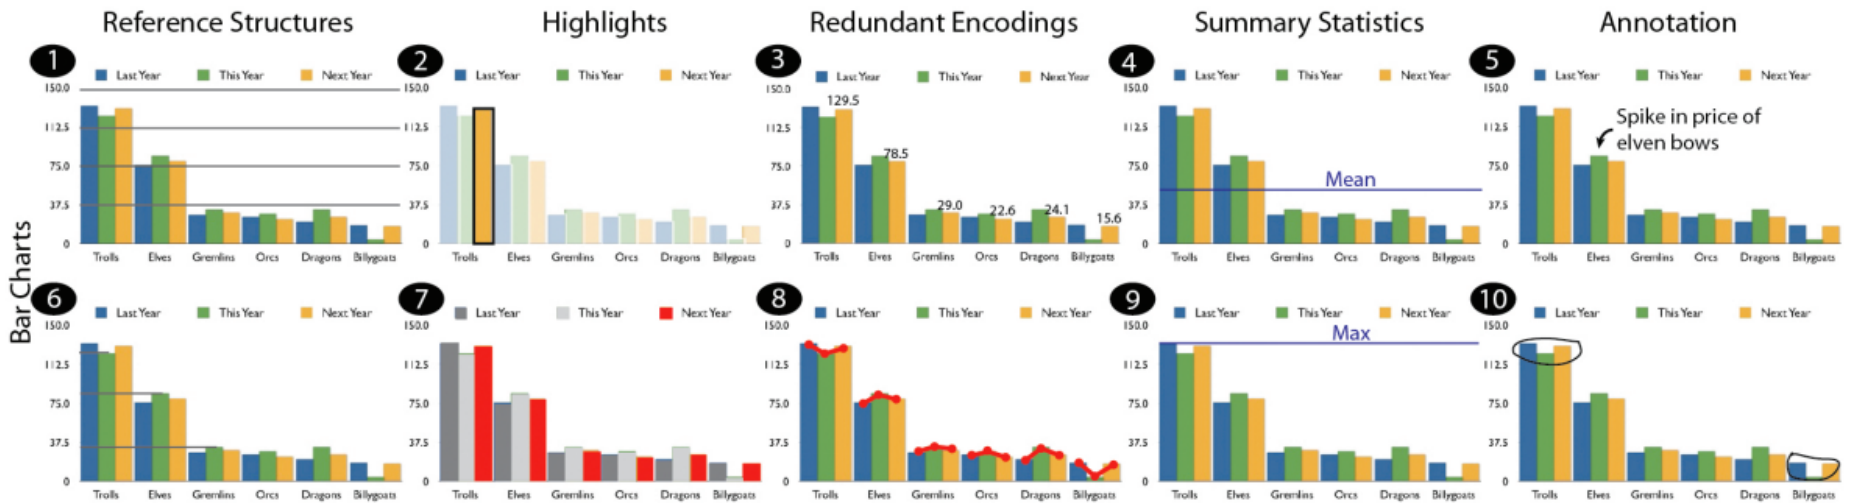

# Automatic Augmentation of Charts for Communication

**Given existing visualizations, can we adapt them to communicate more effectively?**

## Apple Passes Microsoft as No. 1 in Tech

By MIGUEL HELFT and ASHLEE VANCE  
Published: May 26, 2010

SAN FRANCISCO — Wall Street has called the end of an era and the beginning of the next one: The most important technology product no longer sits on your desk but rather fits in your hand.

Jim Wilson/The New York Times  
Apple fans crowded the iPad demo area at the company's downtown San Francisco store.

The moment came Wednesday when [Apple](#), the maker of iPods, iPhones and iPads, shot past [Microsoft](#), the computer software giant, to become the world's most valuable technology company.

This changing of the guard caps one of the most stunning turnarounds in business history for Apple, which had been given up for dead only a decade earlier, and its co-founder and visionary chief executive, [Steven P. Jobs](#). The rapidly rising value attached to Apple by investors also heralds an important cultural shift: Consumer tastes have overtaken the needs of business as the leading force shaping technology.

Microsoft, with its Windows and Office software franchises, has dominated the relationship most people had with their computers for almost two decades, and that was reflected in its stock market capitalization. But the click-clack of the keyboard has ceded ground to the swipe of a finger across a smartphone's touch screen.

## Yahoo Decides to Friend Facebook

By AMIR EFRATI  
Updated Feb. 15, 2011 12:01 a.m. ET

Yahoo Inc. +1.34% watched as social-networking website Facebook Inc. stole the attention of users and grabbed a major share of the online-advertising market.

Now the Internet pioneer is following an old mantra: If you can't beat 'em, join 'em.

After struggling for years to develop services that compete with the social network, Yahoo in recent months has installed tools such as Facebook's "Like" and "Share" buttons on its news and sports websites in order to help Yahoo users share articles with their contacts on Facebook, among other things.

Yahoo, like other content providers, is seeking to leverage Facebook's huge user base to draw more traffic back to Yahoo after readers click on the sharing buttons. The moves also are aimed at ensuring that links to Yahoo content appear in the search feature on Facebook's site. Yahoo is using similar approaches with Twitter Inc., the Internet messaging service, and Zynga Game Network Inc., which offers online social games.

CEO Carol Bartz is trying to grab more traffic for Yahoo through the company's recent ties with Facebook. *Bloomberg News*

▼ [Is this military info right?](#) (5)

I would have expected a different pattern for the military, but then again maybe this is just the military industrial complex growing and growing.

by **Martin Sharp** on Fri Jul 21, 2006 10:15 AM

here are labels where I would have expected big jumps.

by **Martin Sharp** on Fri Jul 21, 2006 10:16 AM

well, there was also the cold war right after ww2, which might be part of the reason why there's such a huge jump after the 40s. It is also interesting that there is such a drop between the 70s and the 80s.

by **Julia Hernandez** on Fri Jul 21, 2006 11:01 AM

I guess a lot of it has turned to robots, and the industrial complex, as martin suggested, though it would be interesting to see the comparison of the fall in military personal next to the rise in DOD funding for robots and industry.

by **Jesse O'Brien** on Fri Jul 21, 2006 11:51 AM

I think the jumps have more to do with the economy at large rather than any particular military conflict. Lots of money in conflict has already been spent before the conflict starts.
