CSE 473:
Artificial Intelligence

Instructor:
Pedro Domingos
Administrivia

- **Instructor:** Pedro Domingos  
  Email: pedrod@cs  
  Office: CSE 648  
  Office hours: TBA

- **TA:** Andrew Guillory  
  Email: guillory@cs  
  Office: TBA  
  Office hours: TBA

- **Class web:** http://www.cs.washington.edu/473

- **Mailing list:** cse473@cs
Source materials

• Textbook

*Artificial Intelligence: A Modern Approach* (3rd. ed.)
Stuart Russell and Peter Norvig
Prentice-Hall
(Required)

• Papers
Evaluation

• Four assignments (16% each):
  – Problem solving and search
  – Representation and reasoning
  – Uncertainty
  – Machine learning

• Final (36%)
What is AI?

- Automation of reasoning, problem solving, learning
- Study of mental faculties through computational models
- Making computers do what people currently do better
- Study of heuristic solutions to NP-complete problems
What can you do with AI?

- Beat Kasparov at chess
- Prove new theorems in mathematics
- Do medical diagnosis better than doctors
- Design new drugs
- Query databases in English
- Design a robot that runs errands
What can you do with AI? (contd.)

- Organize the deployment of US troops & equipment in the Gulf
- Solve complex scheduling problems in manufacturing
- Predict the stock market
- Create more realistic characters for computer games
- Design software agents that search the Web for you
Topics for this quarter

- Problem-solving and search
- Representation and reasoning
- Uncertainty
- Machine learning
Ancestors of AI

- Computer science
- Mathematics
- Philosophy
- Probability and statistics
- Decision theory and economics
- Psychology
- Biology
- Control systems
- Operations research
History of AI

- 50’s: AI is born; neurons, games, logic
- 60’s: Youthful enthusiasm; search, microworlds, the rift
- 70’s: Knowledge representation
- 80’s: AI becomes an industry; neural nets return
- 90’s-00’s: AI matures; realistic applications, probability, learning, the Web
