Records of Human Activity

The ability to take data—to be able to **understand** it, to **process** it, to **extract value** from it, to **visualize** it, to **communicate** it—that's going to be a hugely important skill in the next decades, … because now we really do have **essentially free and ubiquitous data**. So the complimentary scarce factor is the ability to understand that data and extract value from it.

Hal Varian, Google's Chief Economist
The McKinsey Quarterly, Jan 2009

But wait!

The ability to take data—to be able to **understand** it, to **process** it, to **extract value** from it, to **visualize** it, to **communicate** it—that's going to be a hugely important skill in the next decades, because now we really do have **essentially free and ubiquitous data**. So the complimentary scarce factor is the ability to understand that data and extract value from it.

"free" to whom?

"ubiquitous" about whom?

...to whose benefit?

Hal Varian, Google's Chief Economist
The McKinsey Quarterly, Jan 2009

Life-size cutouts of Facebook CEO Mark Zuckerberg are displayed by a progressive advocacy group on the lawn of the U.S. Capitol on Tuesday.

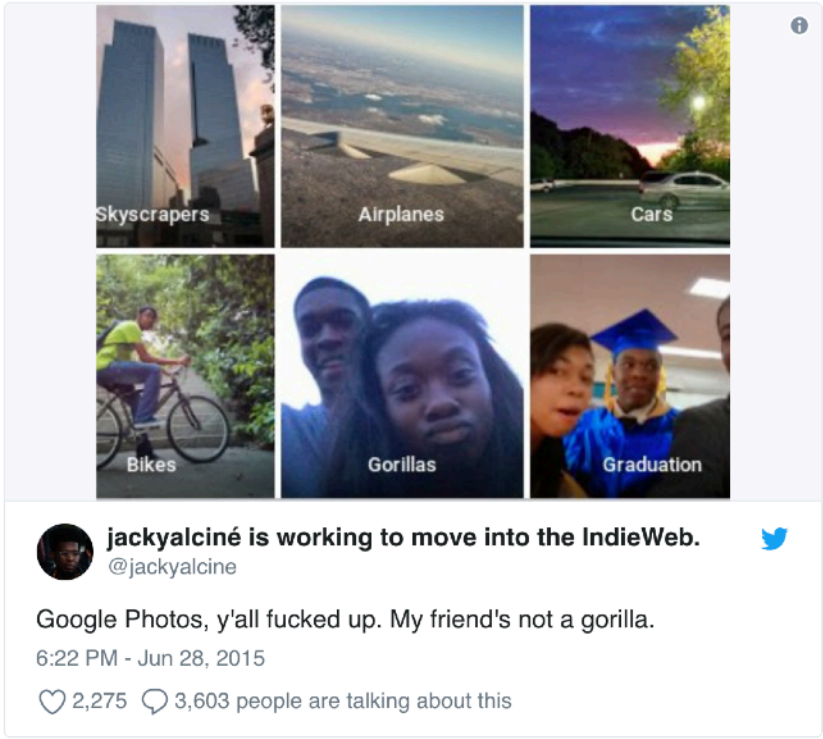
High potential for data abuse…

Inequality

Rise of the racist robots – how AI is learning all our worst impulses

There is a saying in computer science: garbage in, garbage out. When we feed machines data that reflects our prejudices, they mimic them – from antisemitic chatbots to racially biased software. Does a horrifying future await people forced to live at the mercy of algorithms?



…amplified by “big data” and ML systems.

How might we use **visualization** to **empower understanding** of data and analysis processes?

What is Visualization?

"Transformation of the symbolic into the geometric" [McCormick et al. 1987]

"... finding the artificial memory that best supports our natural means of perception." [Bertin 1967]

"The use of computer-generated, interactive, visual representations of data to amplify cognition." [Card, Mackinlay, & Shneiderman 1999]

Set A		Set B		Set C		Set D	
X	Y	X	Y	X	Y	X	Y

The Value of Visualization

Record information

- Blueprints, photographs, seismographs, …

Analyze data to support reasoning

- Develop and assess hypotheses
- Find patterns / Discover errors in data
- Expand memory

Convey information

- Communicate, inform, inspire
- Collaborate and revise

Goals of Visualization Research

1. **Understand** how visualizations convey information

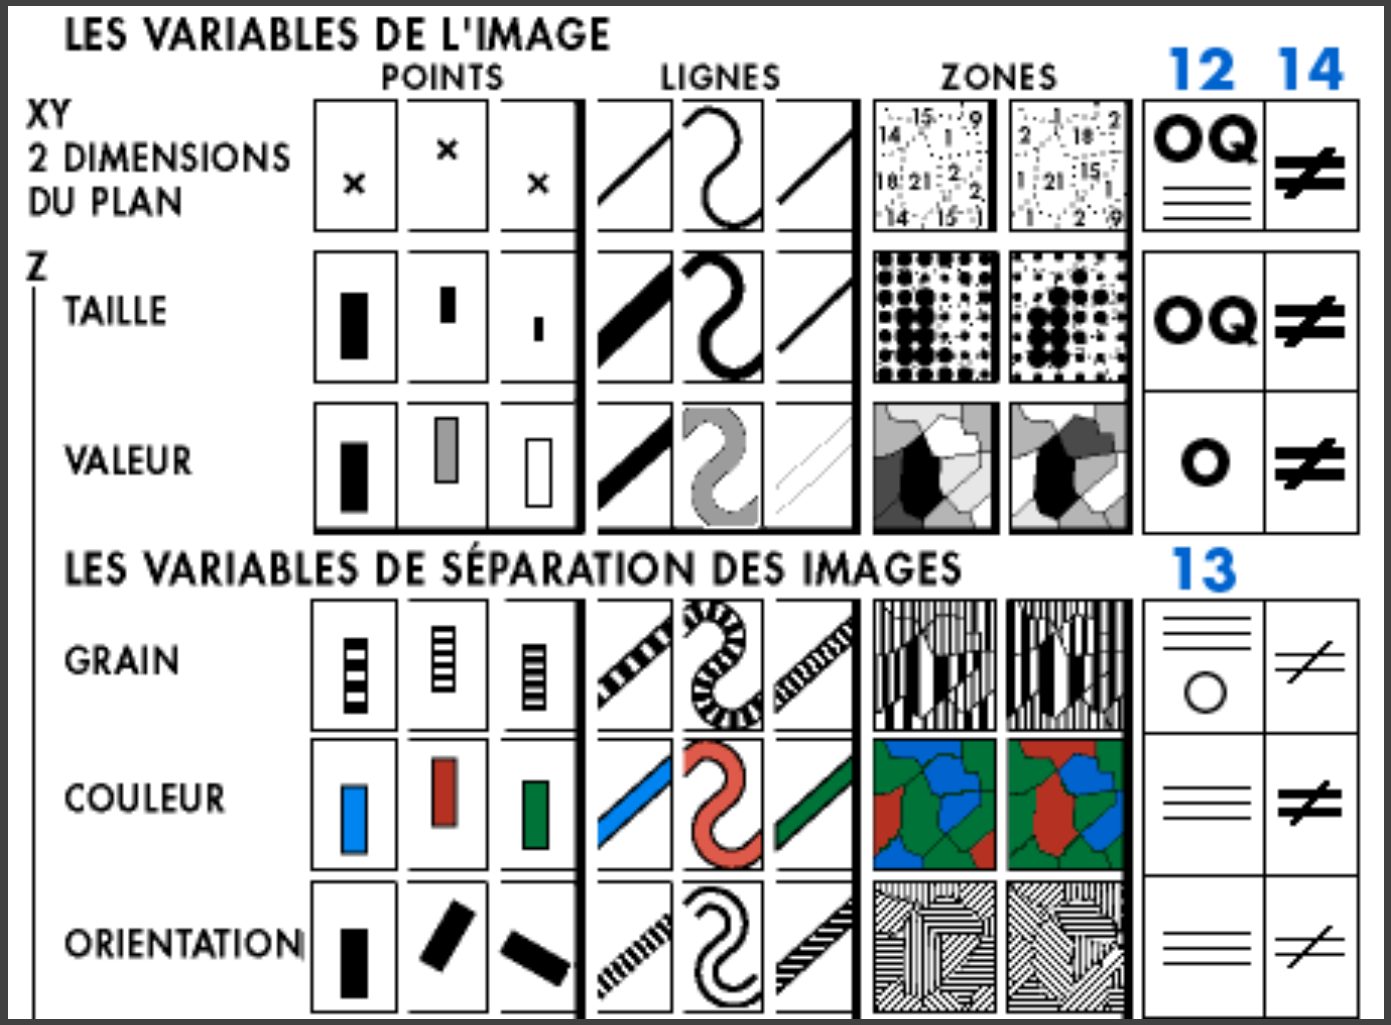
   What do people perceive / comprehend?
   How do visualizations inform mental models?

2. **Develop principles and techniques** for creating effective visualizations and supporting analysis

   Leverage perception & augment cognition
   Improve ties between visualization & mental model

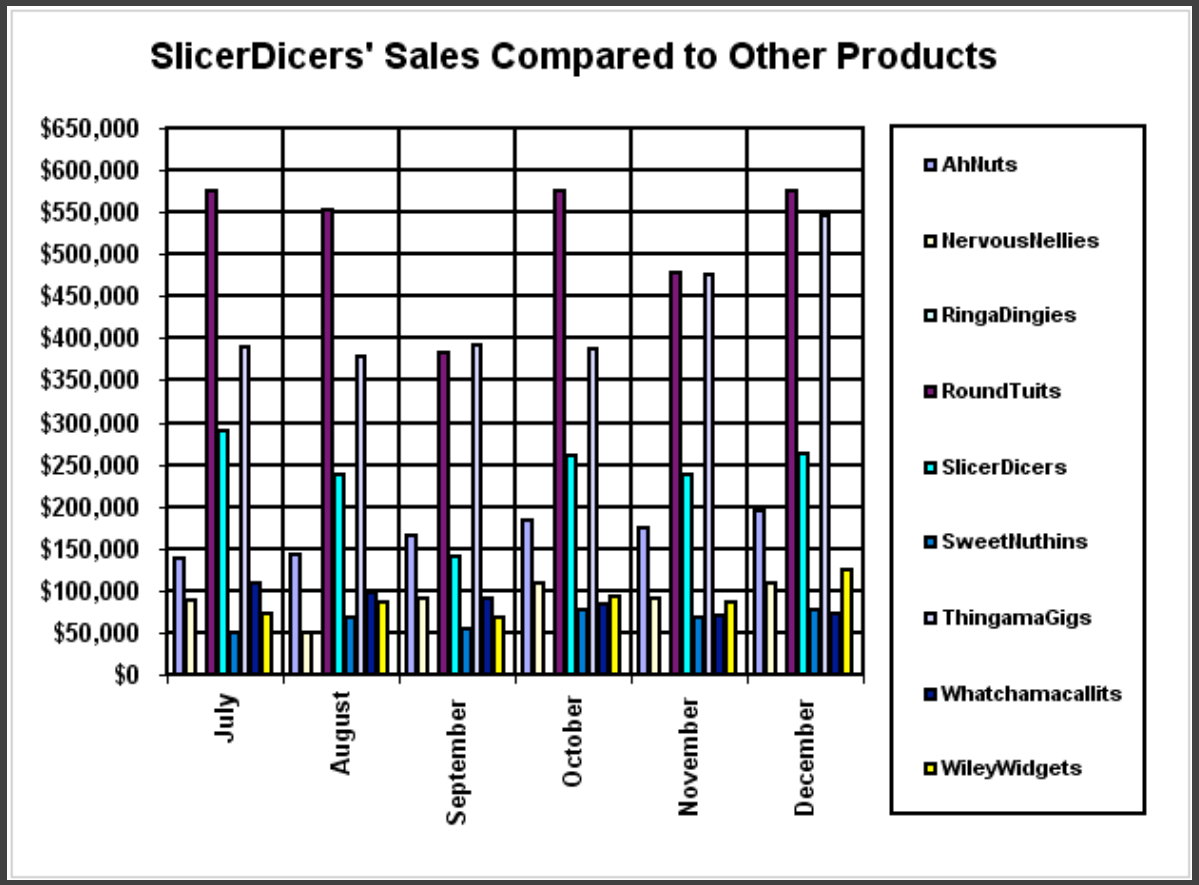
Course Topics

Data and Image Models

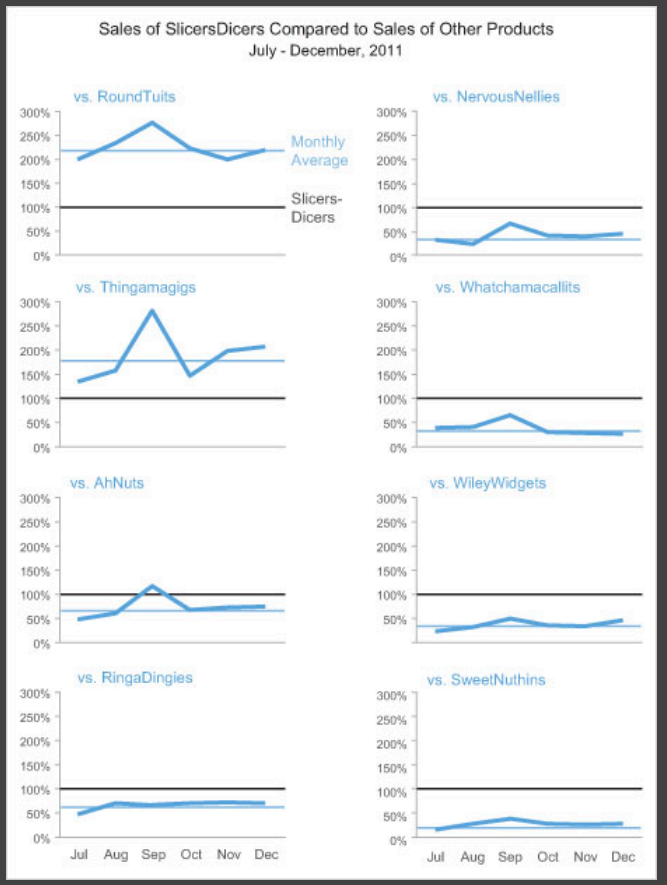


Sémiologie Graphique [Bertin 67]

Visualization Design

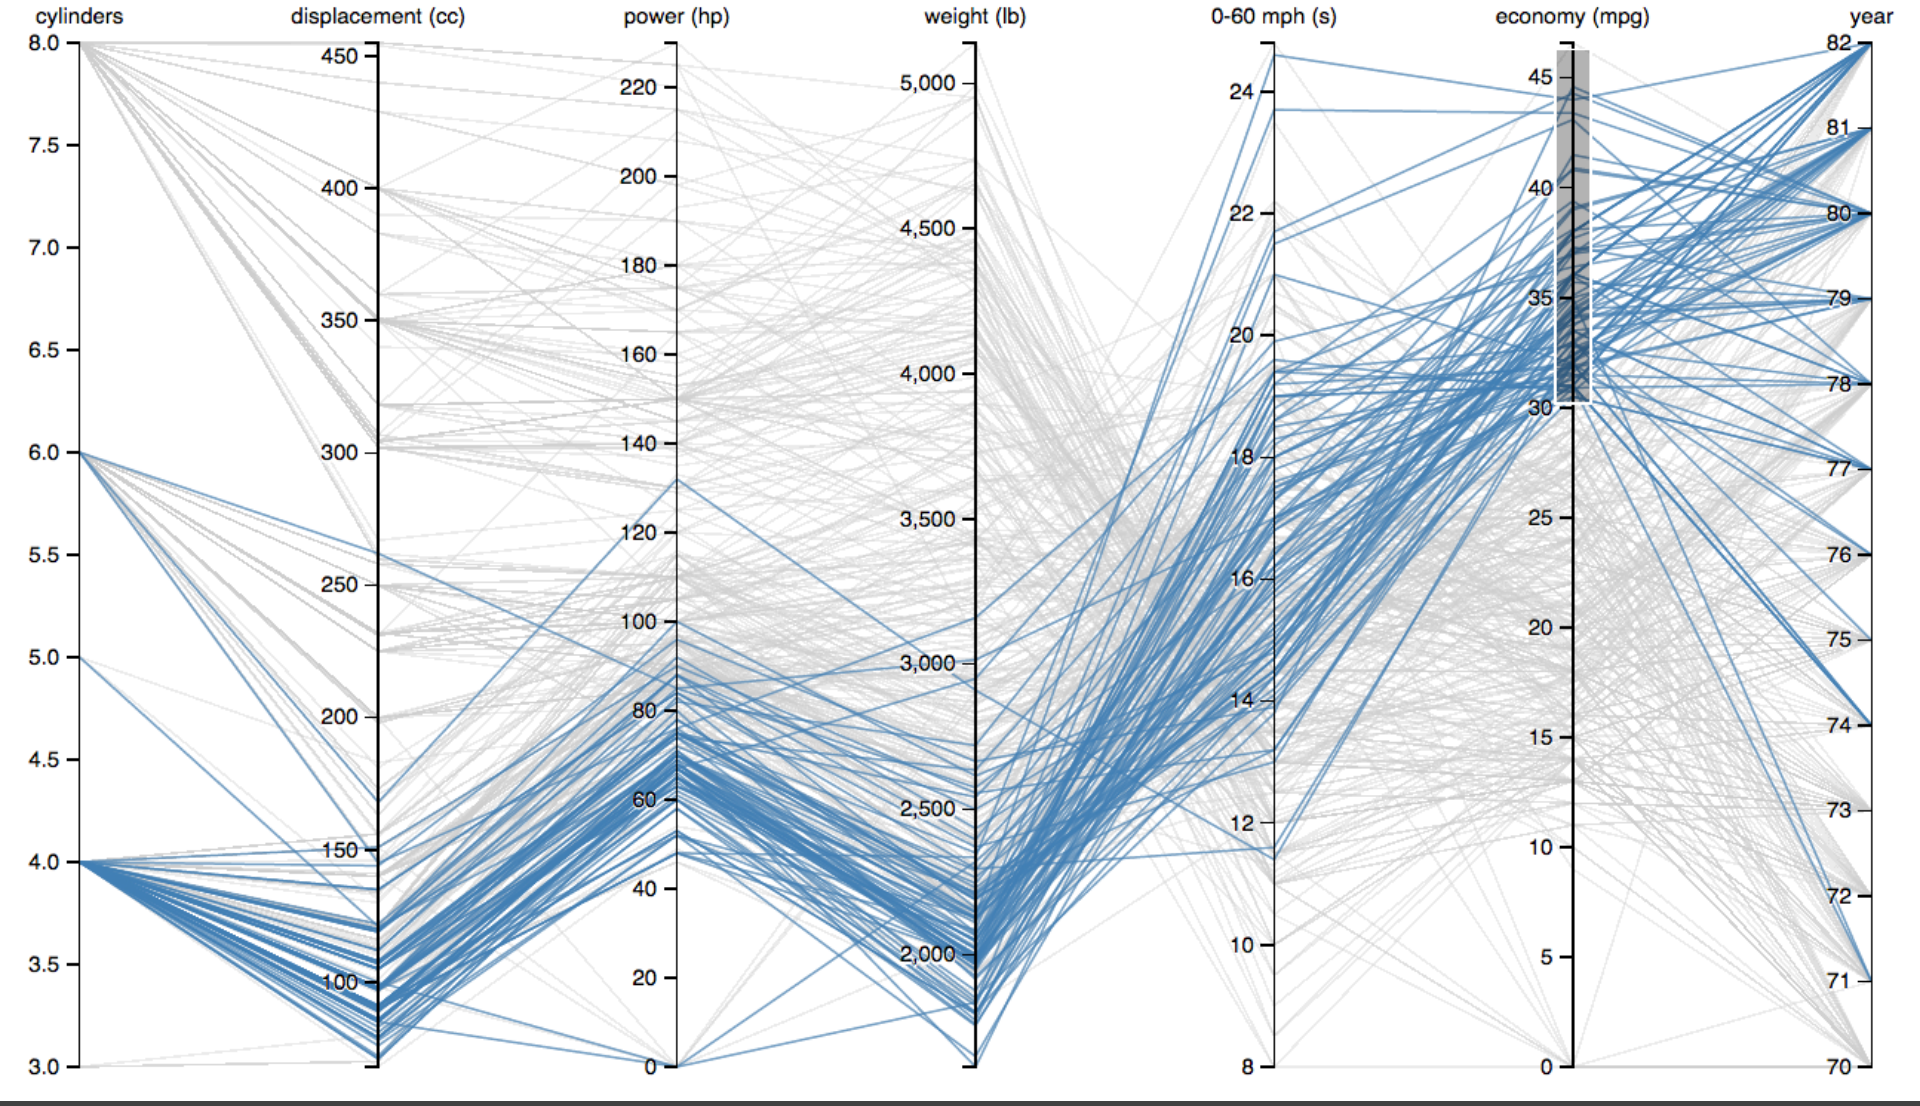


Problematic design

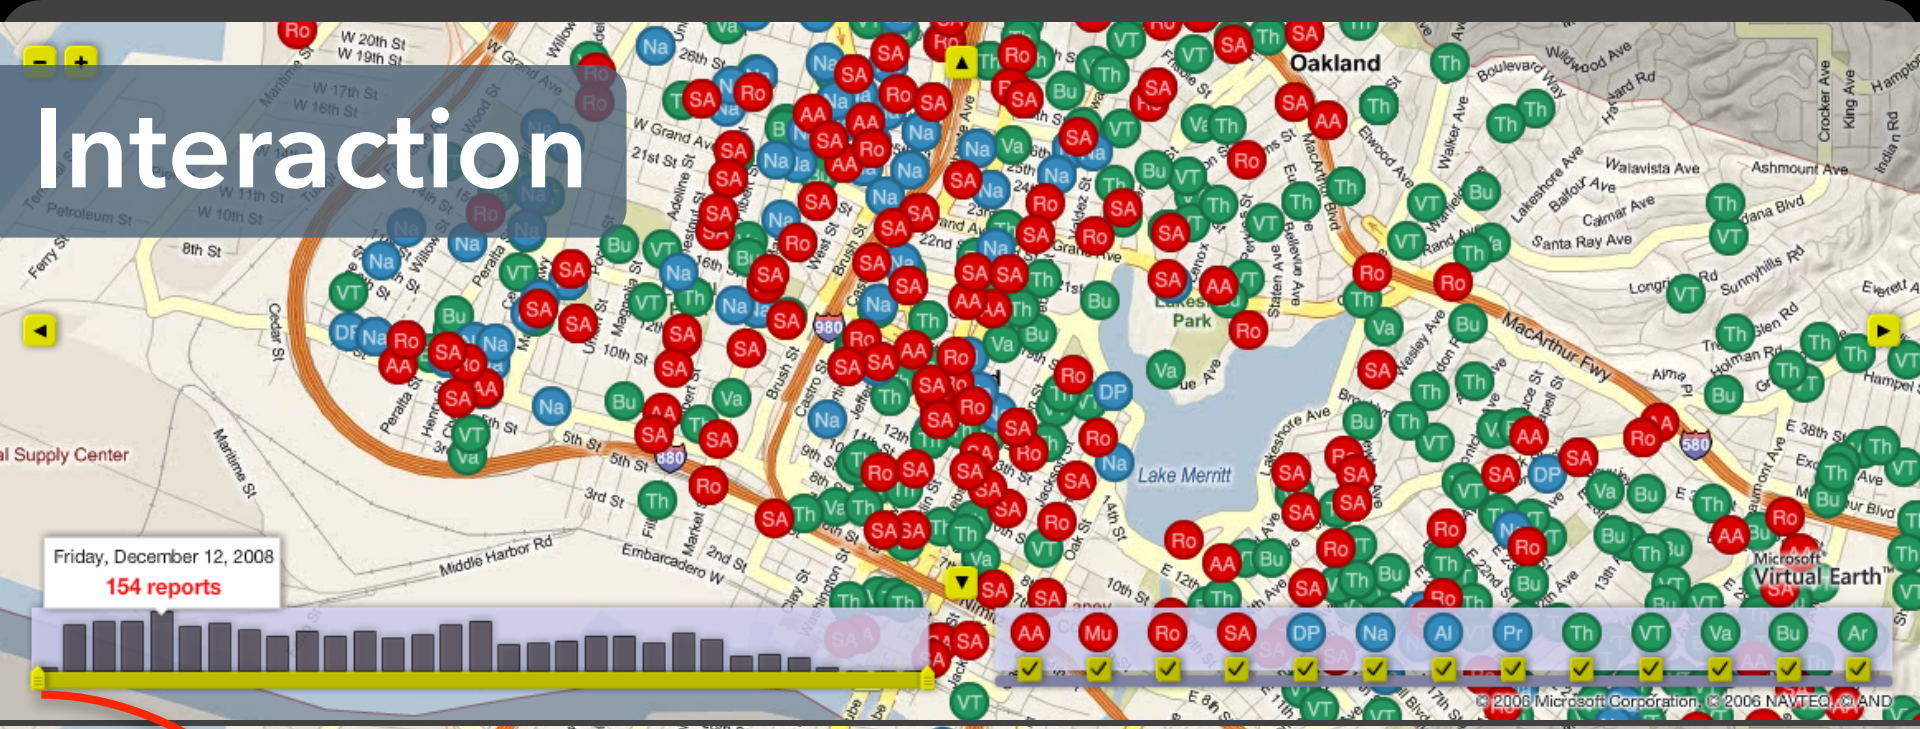


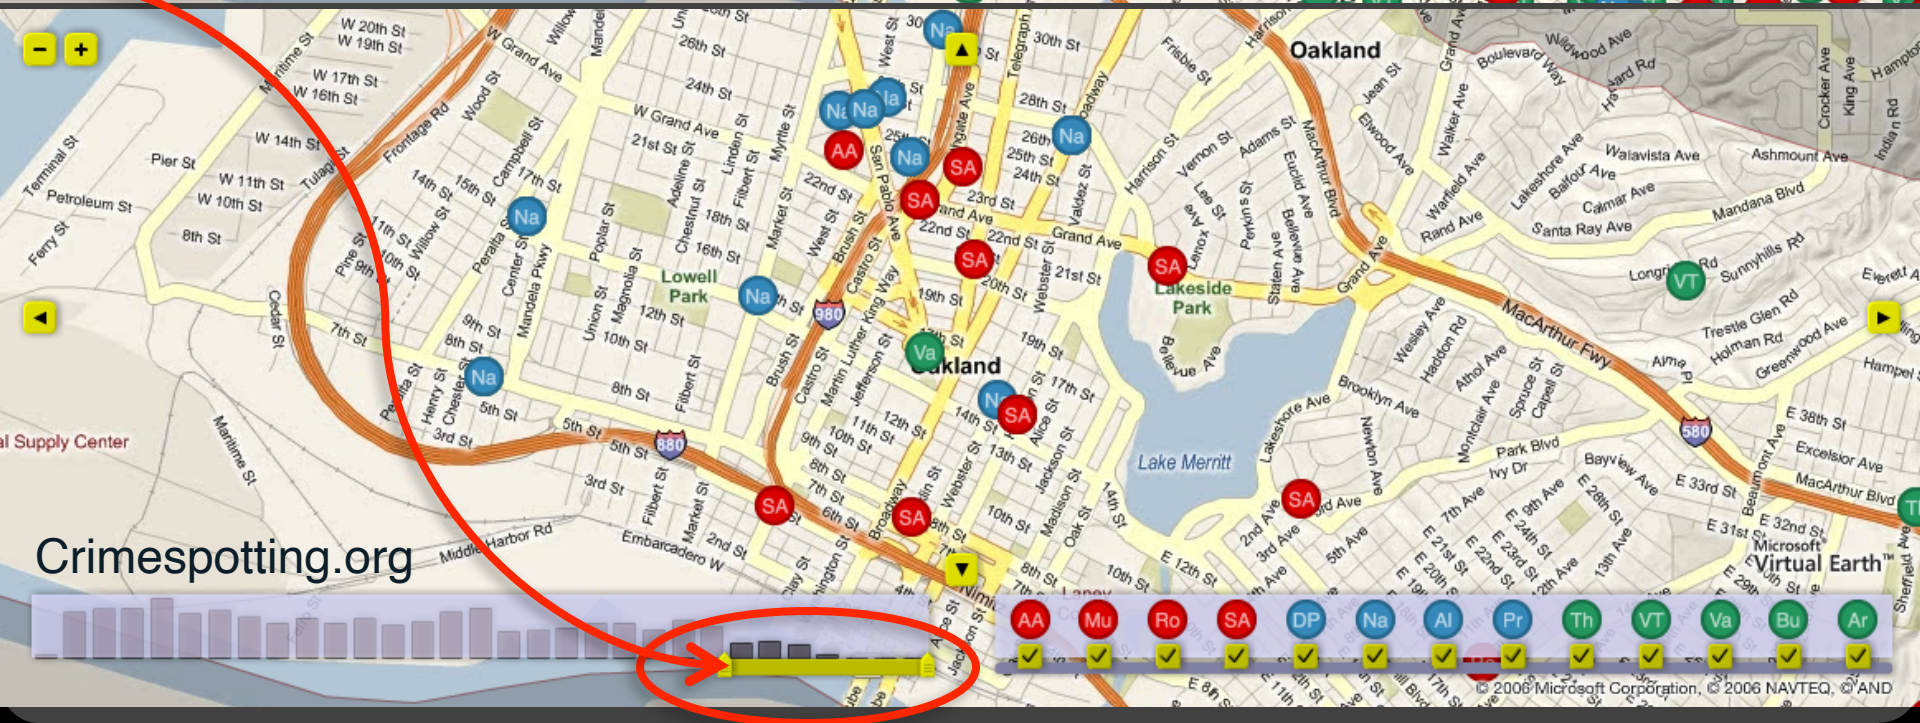
Redesign

Exploratory Data Analysis

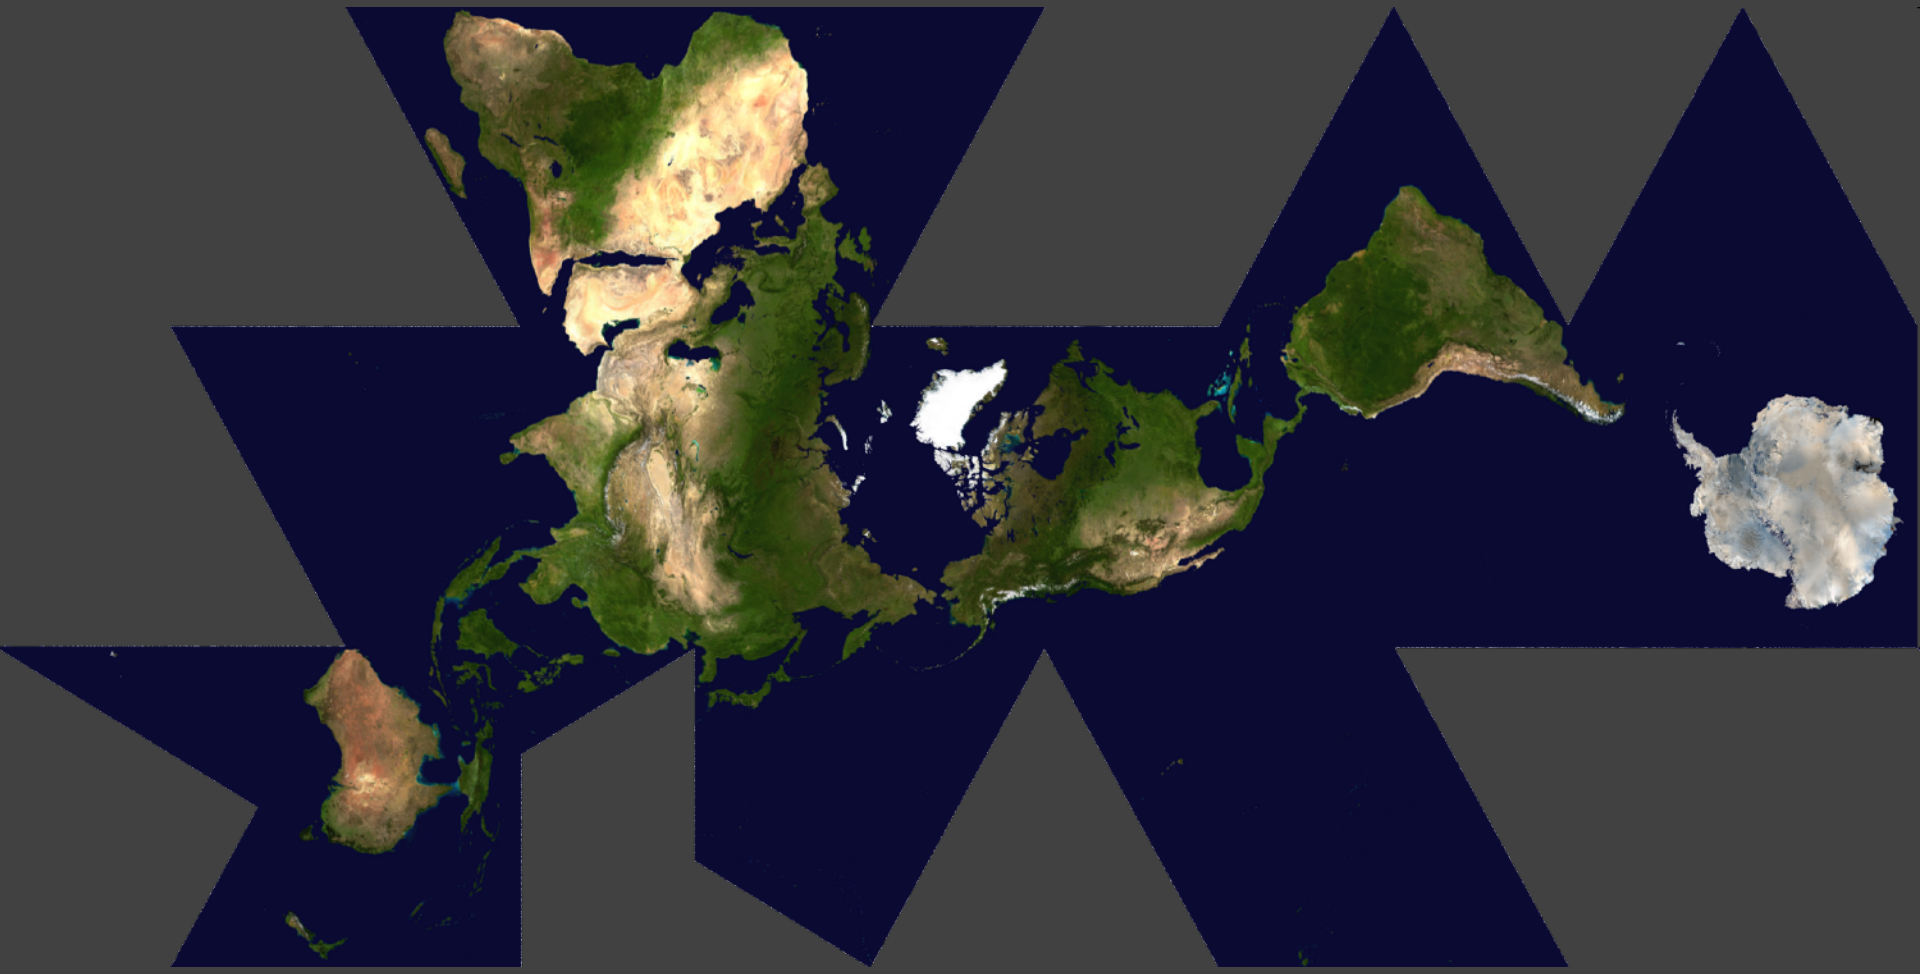


Interaction





Maps



Dymaxion Maps [Fuller 46]

Narrative

Recent elections have placed a heavy emphasis on "swing states" — Ohio, Florida and the other competitive states. Yet in the past, many more states shifted between the Democratic and Republican parties. A look at how the states stack up in the current election and how they have shifted over past elections.

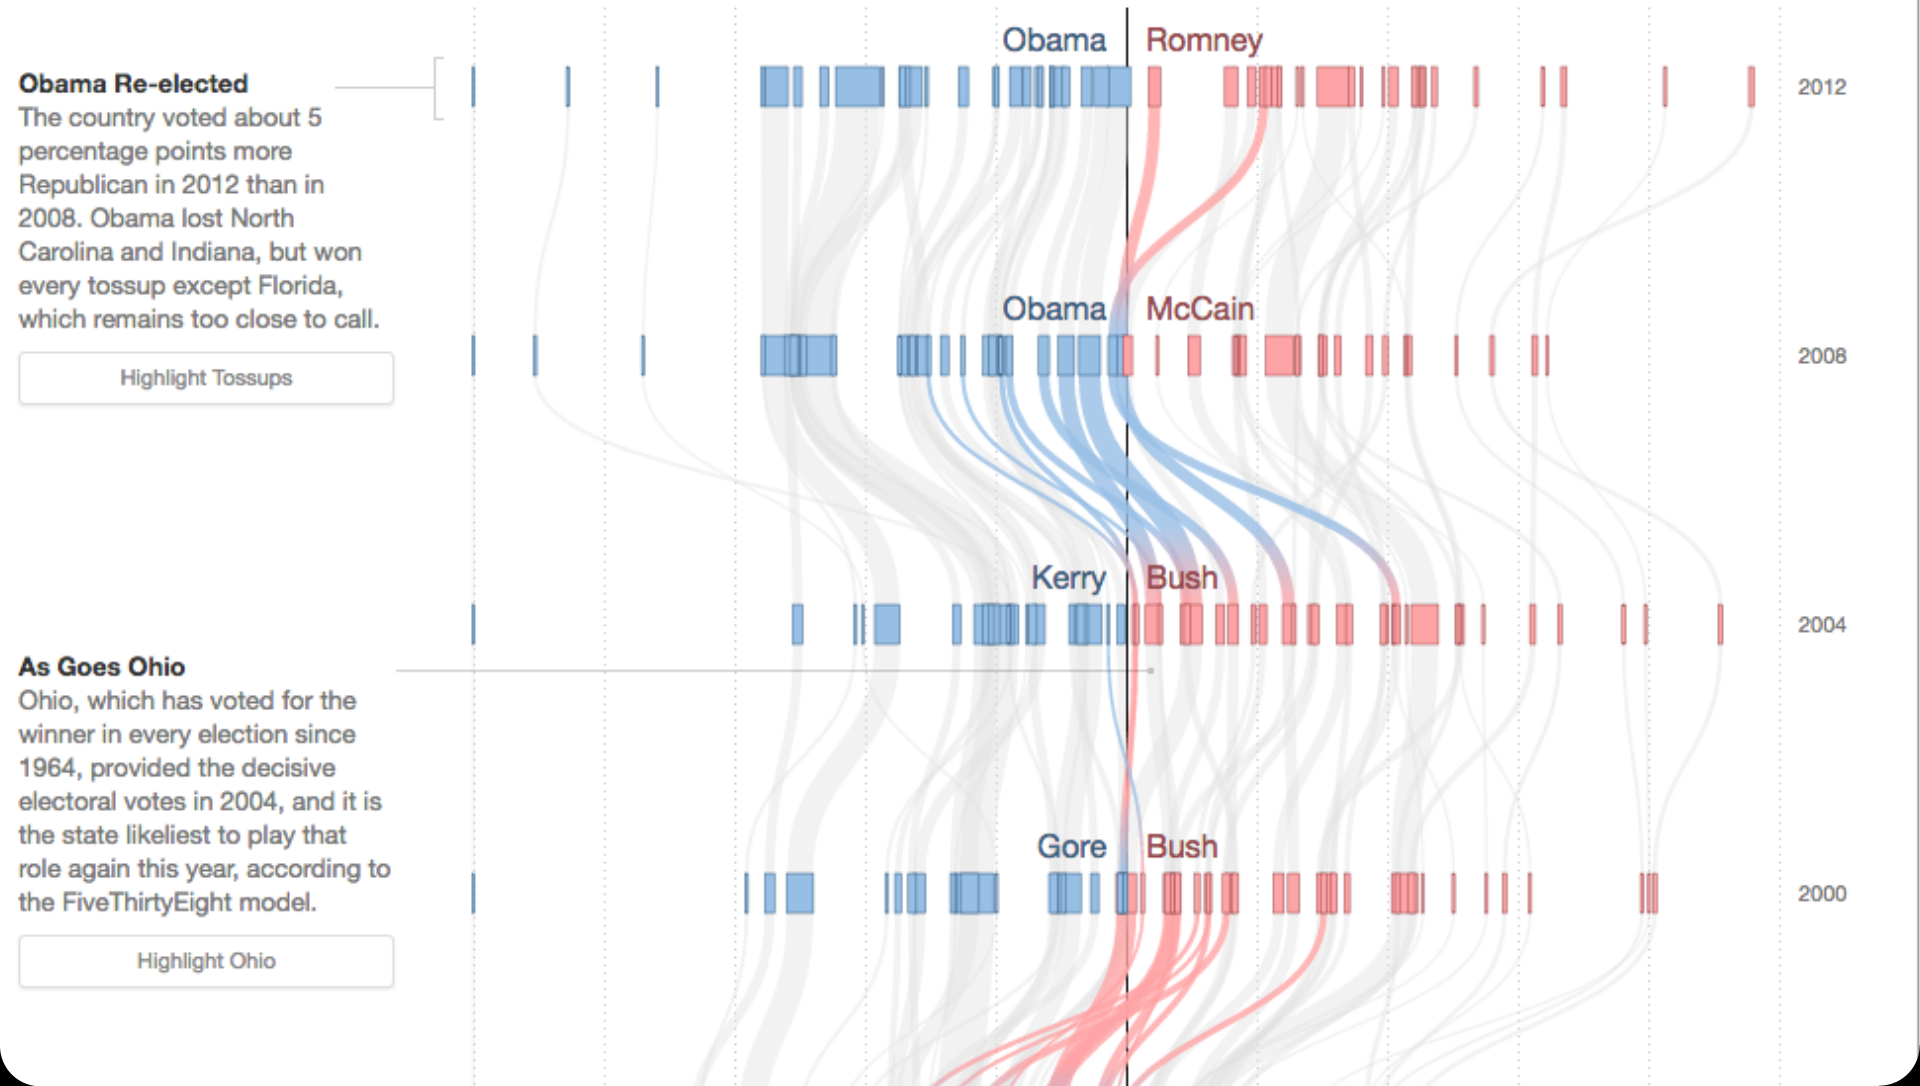
Each box represents a state sized by number of electoral votes.

Each curve shows how much it shifted left or right between elections

Chart **Size of Lead** | Chart **Electoral Votes**

← MORE DEMOCRATIC | MORE REPUBLICAN →

≥50% +40% +30% +20% +10% | +10% +20% +30% +40% ≥50%



Obama Re-elected
The country voted about 5 percentage points more Republican in 2012 than in 2008. Obama lost North Carolina and Indiana, but won every tossup except Florida, which remains too close to call.

Highlight Tossups

As Goes Ohio
Ohio, which has voted for the winner in every election since 1964, provided the decisive electoral votes in 2004, and it is the state likeliest to play that role again this year, according to the FiveThirtyEight model.

Highlight Ohio

You should expect to:

1. *Evaluate and critique* visualization designs
2. *Learn* visualization techniques & theory
3. *Implement* interactive data visualizations
4. *Develop* a substantial visualization project

Instructors

cse512@cs

Instructor

Jeffrey Heer	OH: *Tue after lecture*
Professor, CSE	http://jheer.org

Teaching Assistants

Lisa Elkin	OH: *Mon TBD*
Louis Maliyam	OH: *Fri 1-2p*
Mick Kittivorawang	OH: *Online / Ed*
Yang Liu	OH: *Online / Ed*

Lisa Elkin

Email: lelkin@cs.washington.edu
Office Hours: Monday (time TBD)

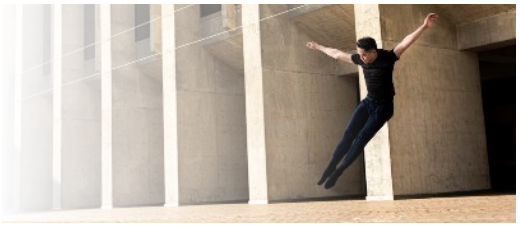
PhD student researching tangible user interfaces, input and interaction techniques, and new quantitative analysis methods.

I have an undergrad in math, master's in entertainment technology, and master's in CS.

My hobbies include yoga, skiing, playing with my dog, cuddling with my dog, being obsessed with my dog, and I love (and miss) travelling!

Louis Maliyam

maliyp@cs.washington.edu



Office Hours: Friday 1-2pm

I'm a BS/MS student from Thailand with several TA experiences (CSE 154, CSE 311, CSE 332, CSE 373). I'm quite familiar with jQuery and general web programming from my internship experiences. I had so much fun taking this class, and I am excited for all of you!

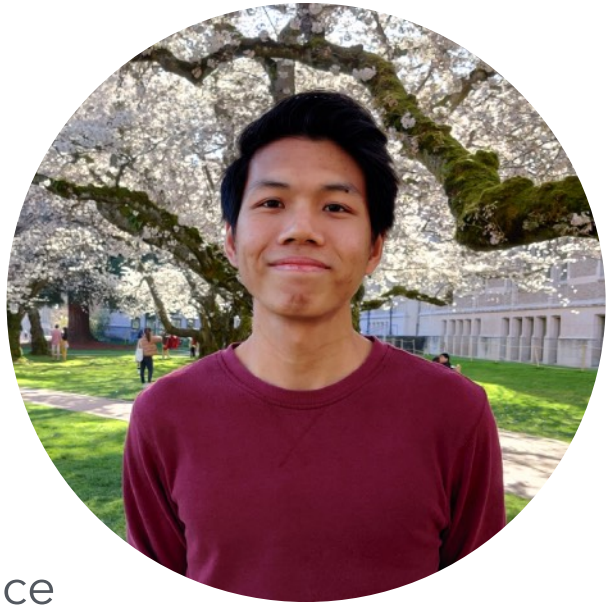
What do I enjoy?

- Dancing: 👍👍👍👍👍👍👍
- Music: 👍👍👍👍👍
- Hiking: 👍👍👍👍

My final project from when I took CSE 442 (Autumn 2020):
https://cse442-20f.github.io/FP-Food-Access-in-the-United-States

Mick Kittivorawong

chanwutk@cs.washington.edu



Research

- Labeling algorithm for chart annotation
- Data Visualization toolkit

Work Experience @OctoML

- Visualization of Relay IR and its TVM performance

Technical Experience

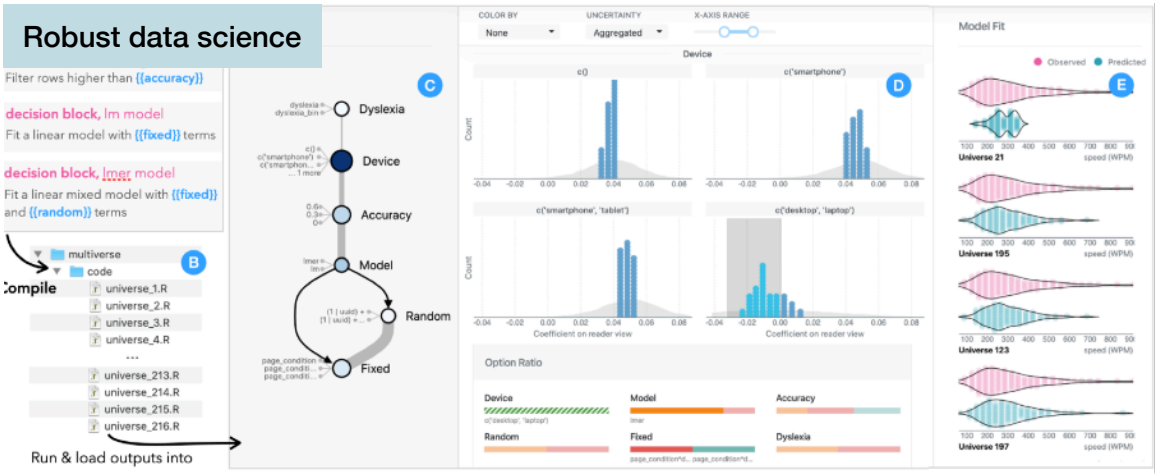
- TypeScript, D3, Vega/Vega-Lite, Arquero, and web programming

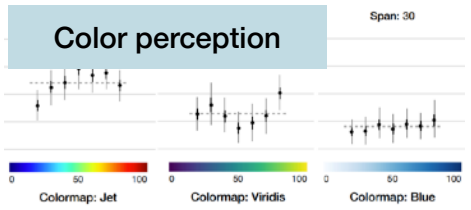
OH: by appointment + Discussion Board

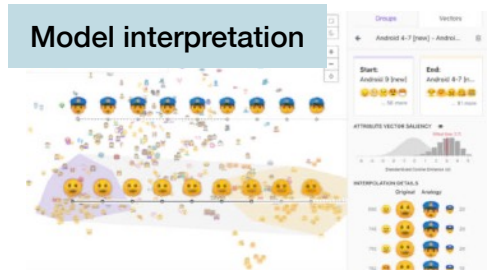
Yang Liu

Office Hours: by appointment
Email: yliu0@uw.edu

I'm a PhD student working on visualization and HCI. I took and TA-ed this class before. Looking forward to a new quarter!







Readings

From books, notebooks, and linked articles.

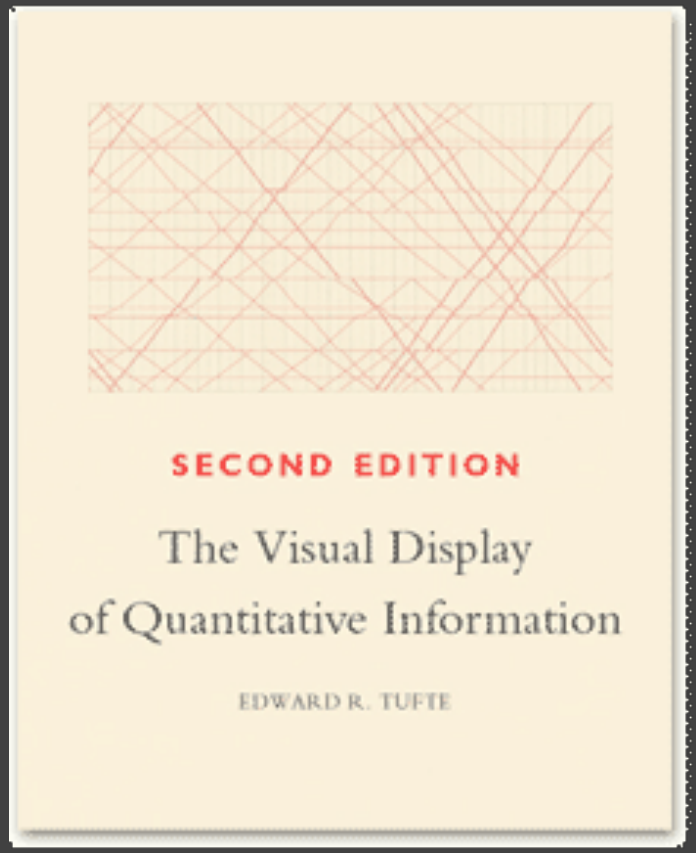
Material in class will loosely follow readings.

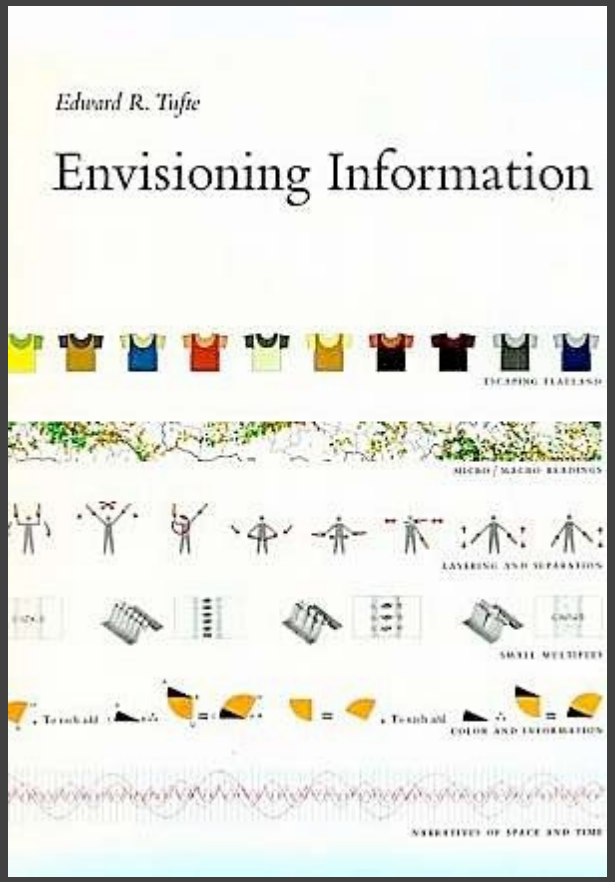
Readings should be read by start of class.

Post comments & quizzes on class forum.

- One comment per week (up through week 8).
- Post comments by Friday 11:59pm.
- You have 1 “pass” for the quarter.

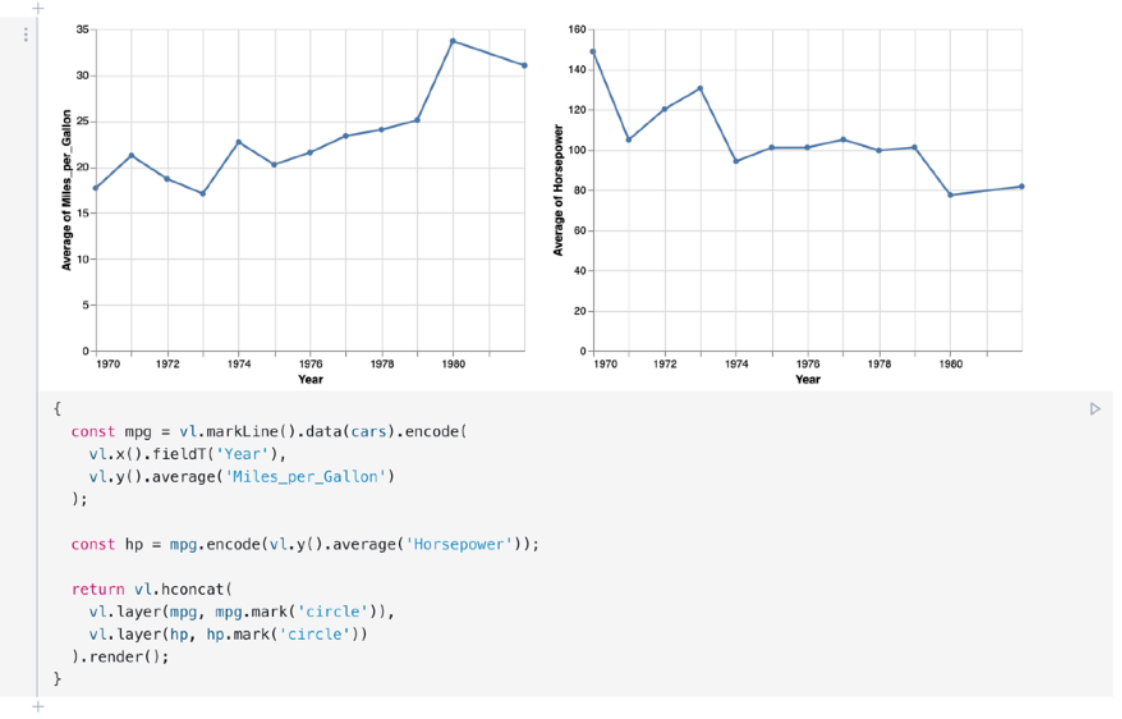
“Textbooks”





See also: www.edwardtufte.com

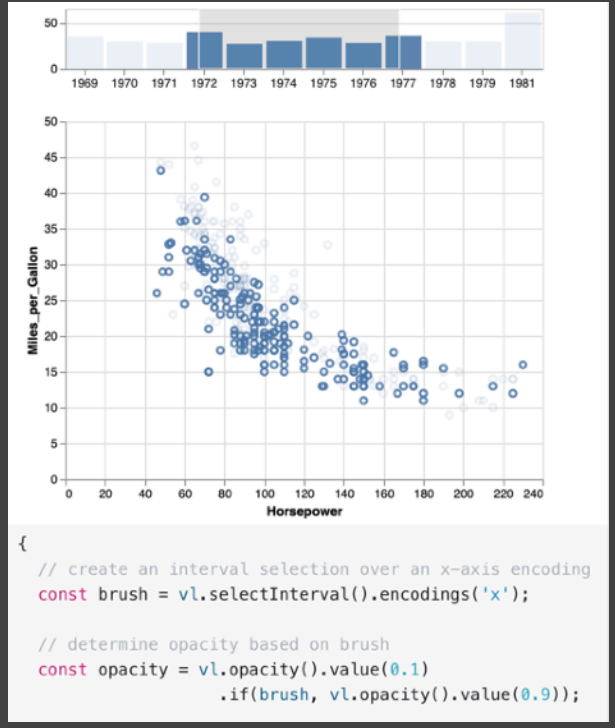
Interactive Notebooks



```
{
  const mpg = vl.markLine().data(cars).encode(
    vl.x().fieldT('Year'),
    vl.y().average('Miles_per_Gallon')
  );

  const hp = mpg.encode(vl.y().average('Horsepower'));

  return vl.hconcat(
    vl.layer(mpg, mpg.mark('circle')),
    vl.layer(hp, hp.mark('circle'))
  ).render();
}
```

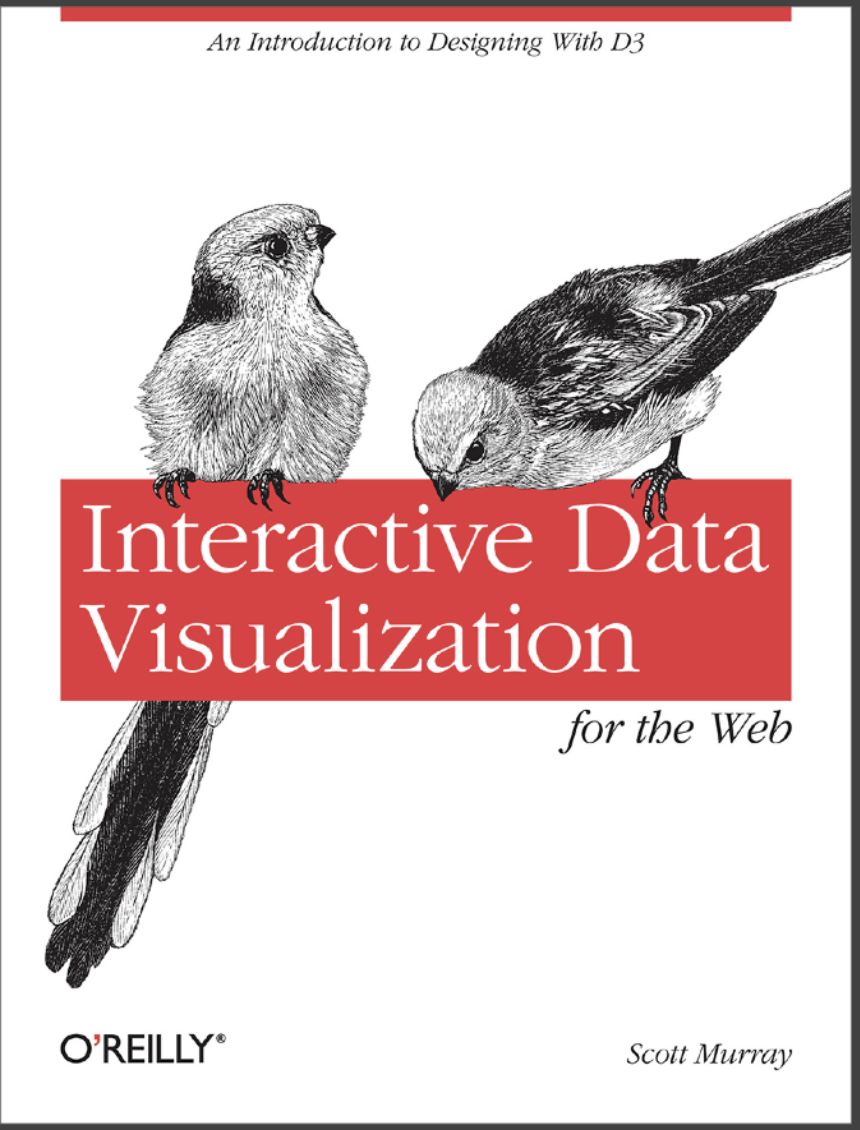


```
{
  // create an interval selection over an x-axis encoding
  const brush = vl.selectInterval().encodings('x');

  // determine opacity based on brush
  const opacity = vl.opacity().value(0.1)
                    .if(brush, vl.opacity().value(0.9));
```

Hands-on engagement with course concepts and visualization tools (Vega-Lite / Altair), in both JavaScript (Observable) *and* Python (Jupyter).

Optional Book



Interactive Data Visualization for the Web, 2nd Edition

For learning D3!
Book available online.
Code / examples on GitHub.

We will be using **D3 v6**.

Assignments

CP Class Participation (10%)

A1 Visualization Design (10%) - *Due 4/7*

A2 Exploratory Data Analysis (15%) - *Due 4/23*

A3 Interactive Prototype (25%) - *Due 5/10*

Peer Evaluation - *Due 5/17*

FP Final Project (40%)

Proposal - *Due 5/14*

Milestone Prototype - *Due 5/31*

Demonstration Video - *Due 6/2*

Final Prototype - *Due 6/9*

Final Project

Visualization research project on topic of choice

Initial **prototype** and **design reviews**

In-class demonstration **video** showcase

Submit and publish online (if feasible)

Projects from **previous classes** have been:

- Published as research papers
- Featured in the New York Times
- Released as successful open source projects

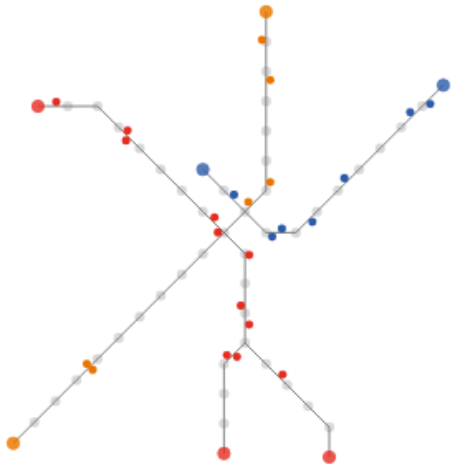
Latent Space Cartography

Visual Analysis of Vector Space Embeddings

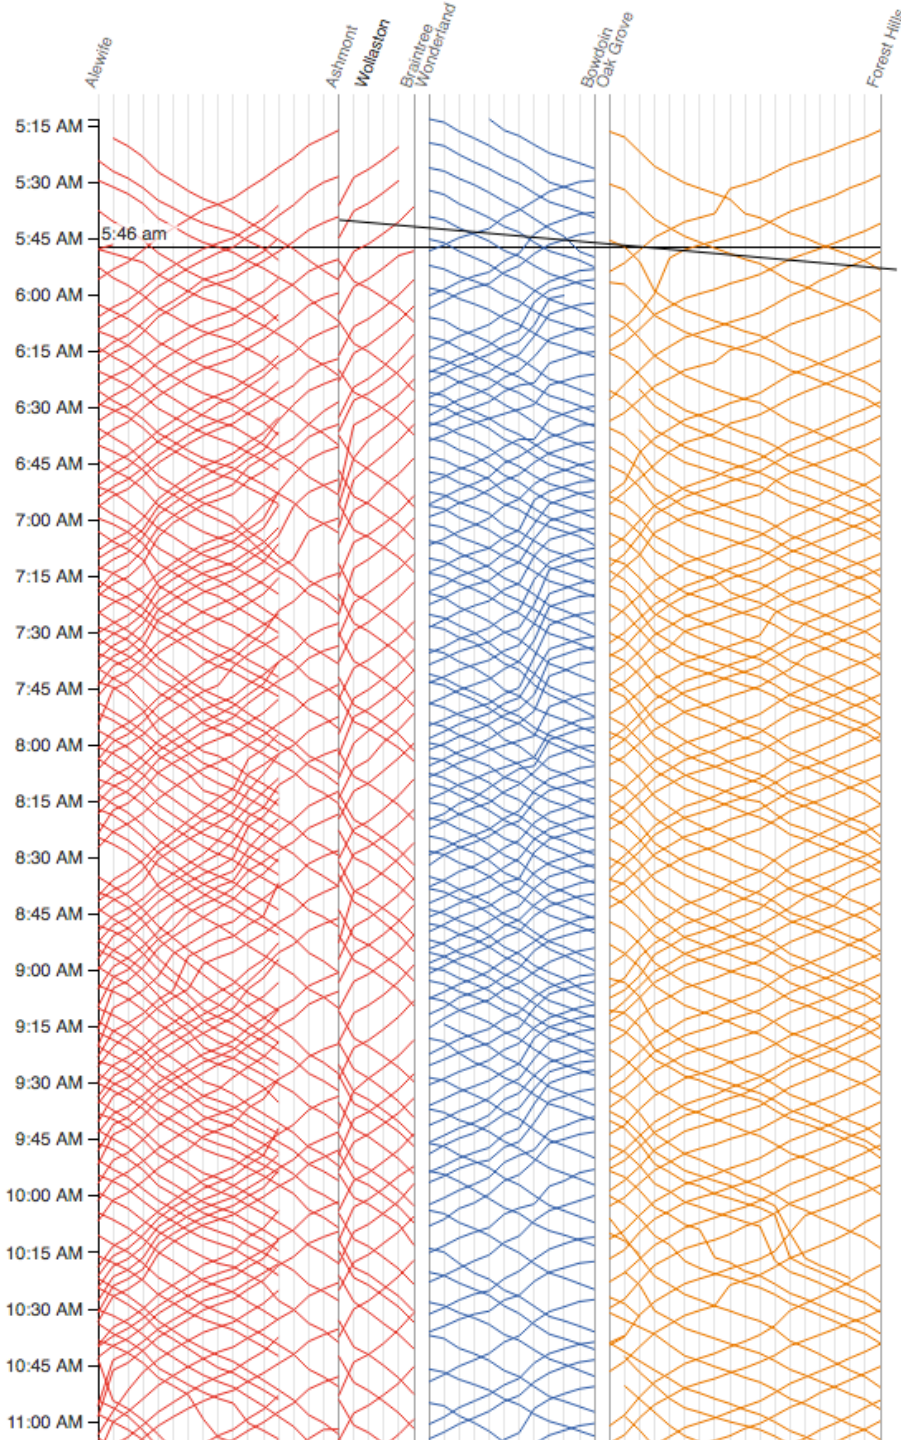
Yang Liu, Eunice Jun, Qisheng Li (CSE 512, Spring '18)



Locations of each train on the red, blue, and orange lines at 5:46 am. Hover over the diagram to the right to display trains at a different time.

Trains are on the right side of the track relative to the direction they are moving.

See the morning rush-hour, midday lull, afternoon rush-hour, and the evening lull.



Service starts at 5AM on Monday morning. Each line represents the path of one train. Time continues downward, so steeper lines indicate slower trains.

Since the red line splits, we show the Ashmont branch first then the Braintree branch. Trains on the Braintree branch "jump over" the Ashmont branch.

Train frequency increases around 6:30AM as morning rush hour begins.

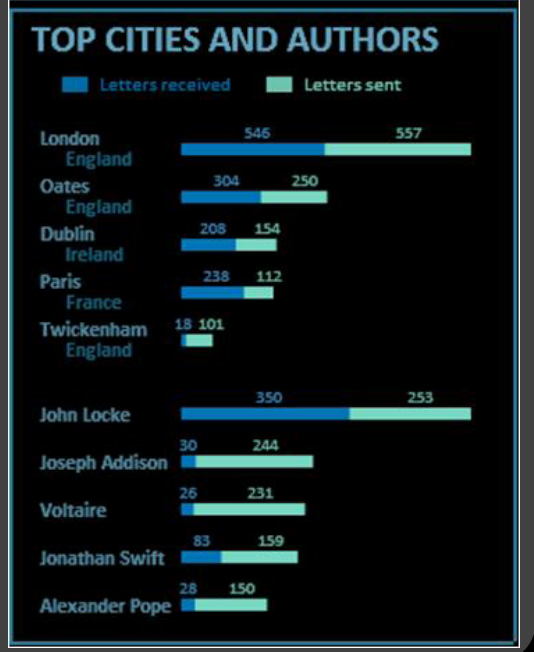
Visualizing the Republic of Letters

Daniel Chang, Yuankai Ge, Shiwei Song



Questions?

A1: Visualization Design

Design a static visualization for a data set.

The climate of a place can have a tremendous impact on people's lived experience. You will examine average monthly climate measurements for six major U.S. cities, roughly covering the edges of the continental United States.

You must choose the message you want to convey. What question(s) do you want to answer? What insight do you want to communicate?

A1: Visualization Design

Pick a **guiding question**, use it to title your vis.
Design a **static visualization** for that question.
You are free to **use any tools** (inc. pen & paper).

Deliverables (upload via Canvas; see A1 page)
Image of your visualization (PNG or JPG format)
Short description + design rationale (≤ 4 paragraphs)

Due by **11:59 pm, Wednesday April 7**.
