

Announcements

Final project presentations on **Wednesday**

- Each group has **10 minutes**
- Place .ppt talk in artifact directory

Final reports due on Friday at 11:59pm

- Web page (see project4 web page)
- Does not have to be long, but should be sufficient to describe what you did, related work, results, and discussion

Evals at the end of class today

Matting and Transparency

Slides adapted from Alexei Efros, Yung-Yu Chuang, and Shree Nayar

How does Superman fly?

Super-human powers?

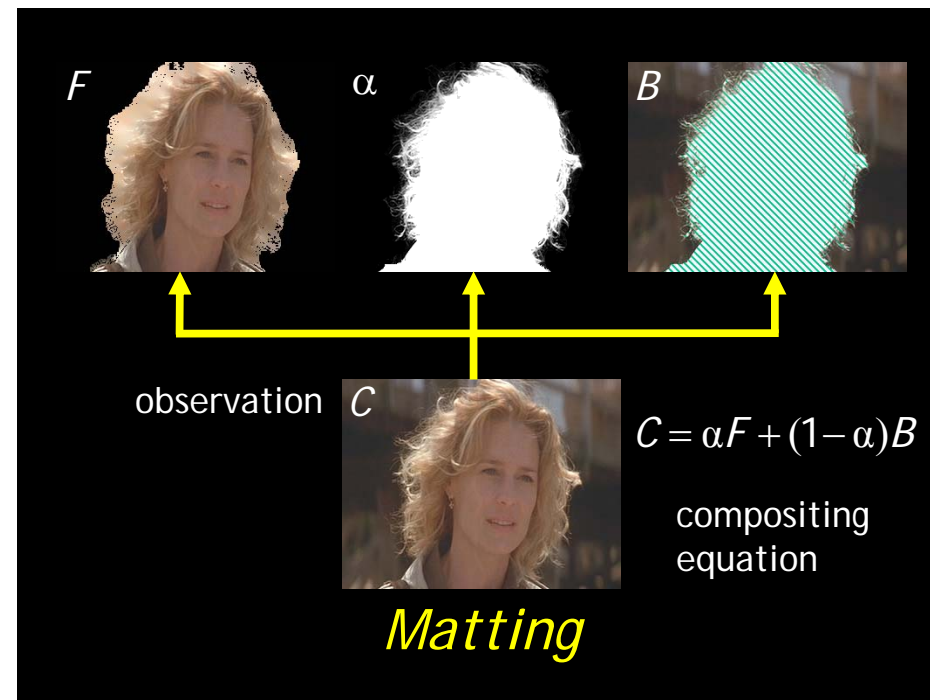

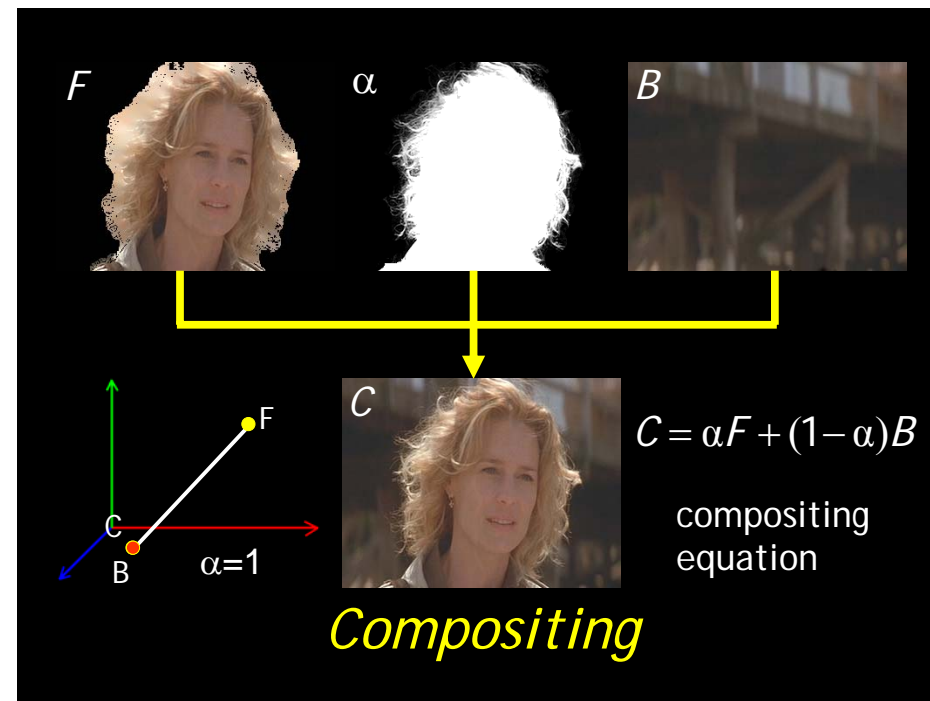

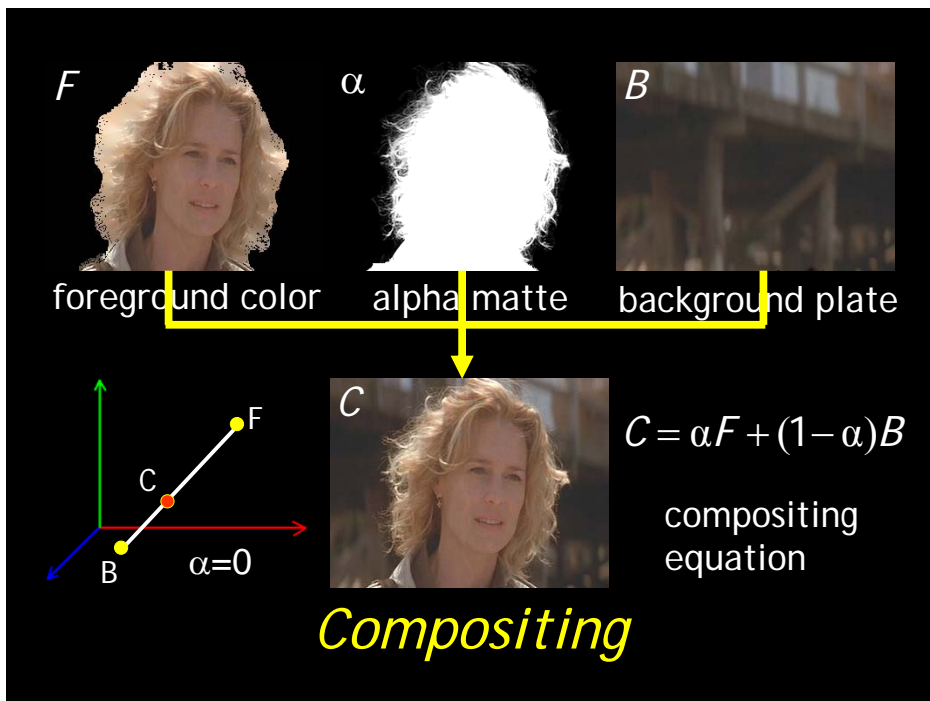

OR

Image Matting?

Digital matting

Forrest Gump (1994)

Three approaches:

- 1 reduce #unknowns
- 2 add observations
- 3 add priors

$C = \alpha F + (1 - \alpha) B$
compositing equation

Matting

$C = \alpha F + (1 - \alpha) B$
difference matting

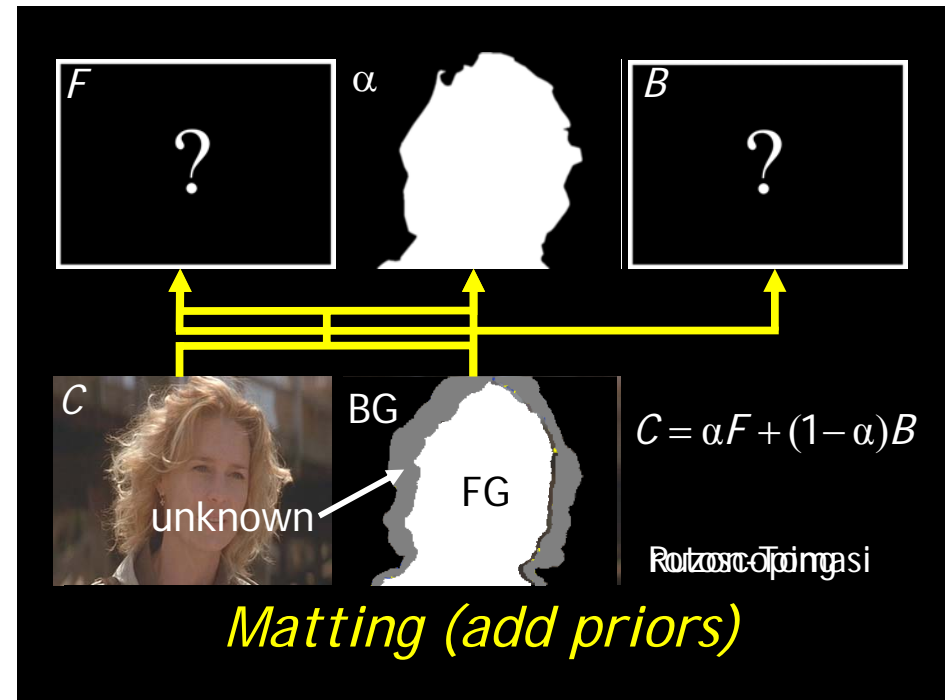

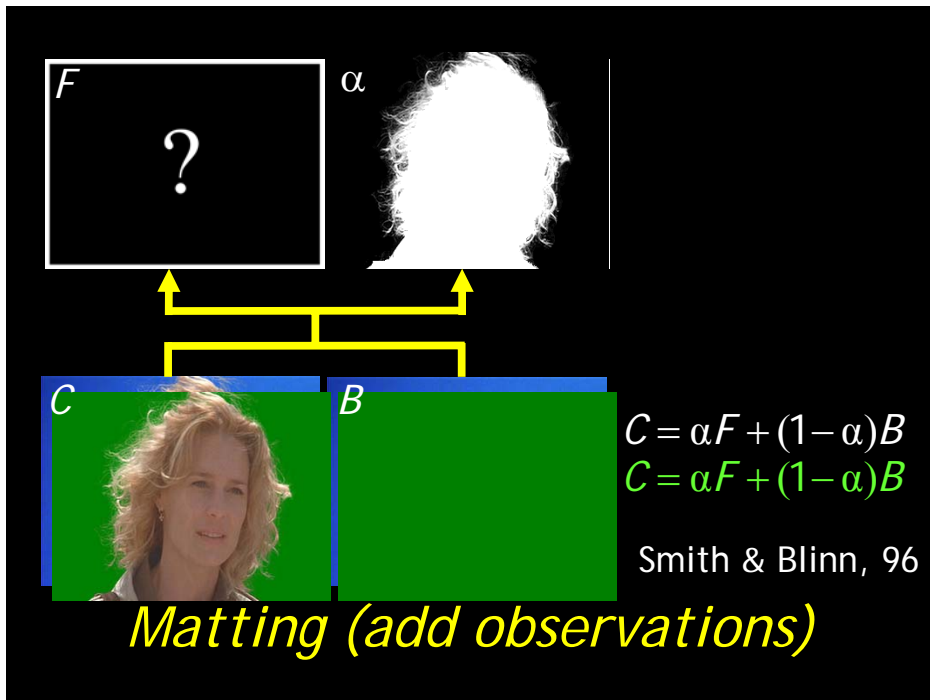

Matting (reduce #unknowns)

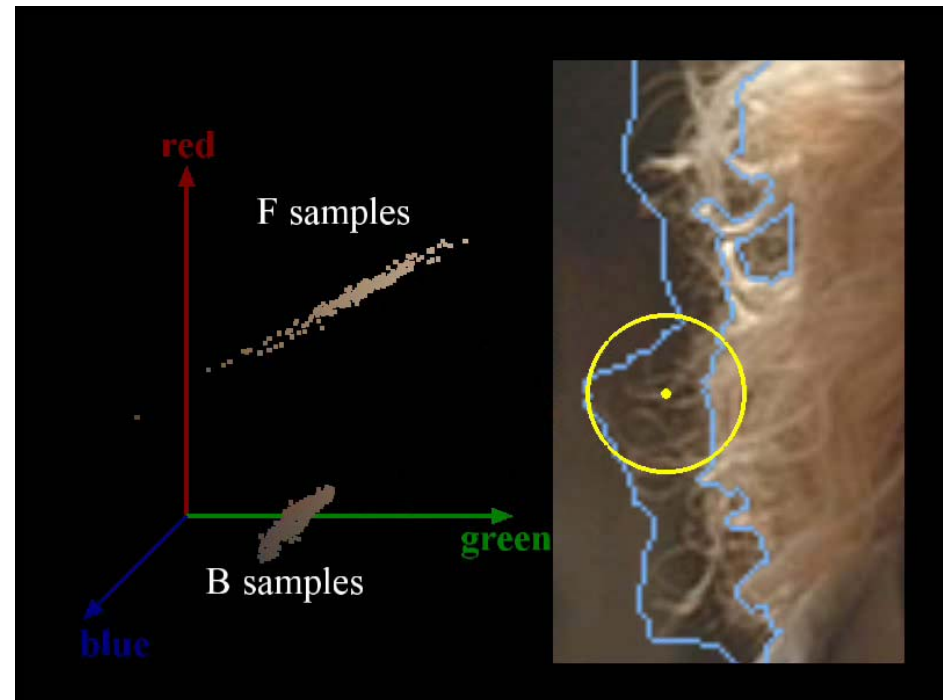

$C = \alpha F + (1 - \alpha) B$
blue screen matting

Matting (reduce #unknowns)

Problems with color difference

Background color is usually not perfect! (lighting, shadowing...)

Environment Matting and Compositing

Fast Separation of Direct and Global Images Using High Frequency Illumination

Shree K. Nayar

Gurunandan G. Krishnan

Columbia University

Michael D. Grossberg

City College of New York

Ramesh Raskar

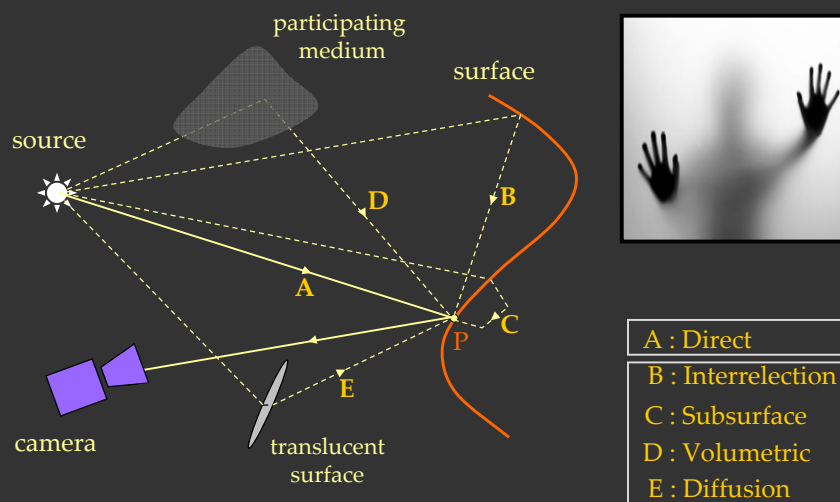

MERL

SIGGRAPH Conference

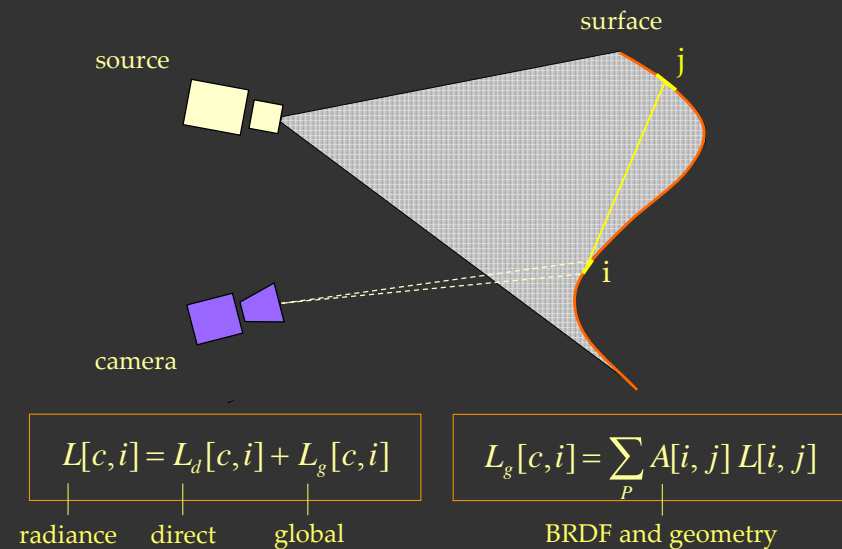

Boston, July 2006

Support: ONR, NSF, MERL

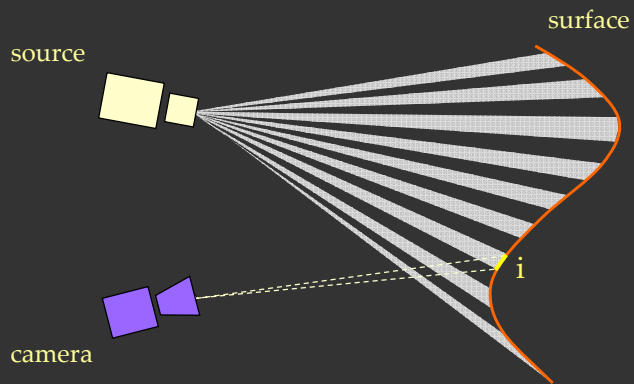

Direct and Global Illumination

Direct and Global Components: Interreflections

High Frequency Illumination Pattern

$$L^+[c,i] = L_d[c,i] + \alpha L_g[c,i]$$

fraction of activated source elements

High Frequency Illumination Pattern

$$L^+[c,i] = L_d[c,i] + \alpha L_g[c,i]$$

fraction of activated source elements

$$L^-[c,i] = (1 - \alpha) L_g[c,i]$$

Separation from Two Images

$$\alpha = \frac{1}{2}$$

$$L_d = L_{\max} - L_{\min}, \quad L_g = 2L_{\min}$$

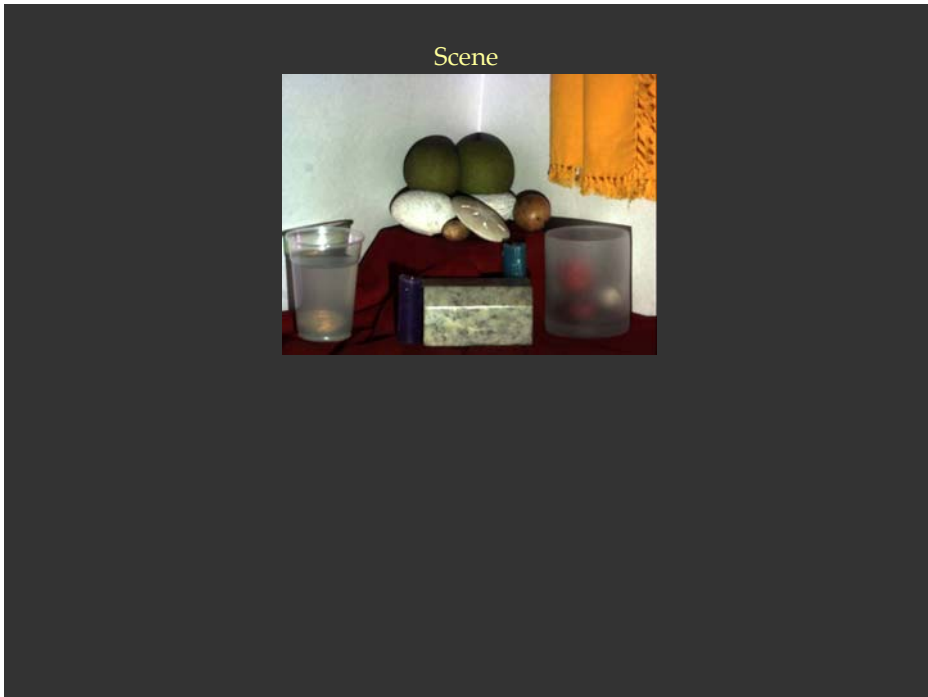

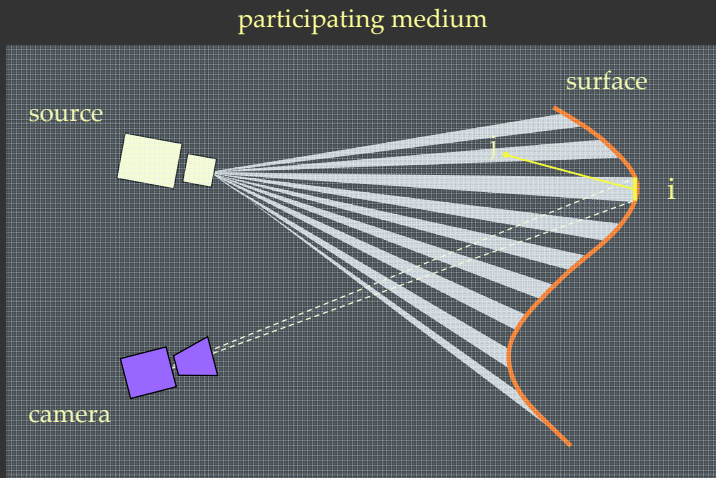

direct

global

Other Global Effects: Subsurface Scattering

Other Global Effects: Volumetric Scattering

Real World Examples:
Can You Guess the Images?

Eggs: Diffuse Interreflections

Direct

Global

Wooden Blocks: Specular Interreflections

Direct
