CSEP 590 Spring 2017 Homework 5

Due: Friday, June 2, 11:59pm Seattle time (end of quarter)

Please use the Dropbox linked from the CSEP590 web page to submit your review online. Any common readable document format is fine.

Problems 1 and 2

Select two of the readings for Class 7 on the course web (https://courses.cs.washington.edu/courses/csep590a/17sp/). Write a short review and summary of each (between a half and a full page each, using a reasonable font size).

Problem 3

In a language (or languages) of your choosing, give an example of name equivalence and an example of structural equivalence. Write code snippets that illustrate the difference (e.g., show code that does and does not type check in the different models).
