Athletes and Teams Database Design

Decide what tables are needed for the database. Assign fields to the appropriate table. Select primary keys.

Draw relationshiop lines between tables. You may not need all the blank table forms below and you may not need all the lines shown.

Fields/Column Names/Attributes

student_id	event_name	coach_name	letters_awarded_date
student_points_awarded_to_date	event_location	team_other_details	team_gender
student_first_name	event_start_date	sport_description	team_name
student_middle_name	event_end_date	division_description	team_description
student_last_name	student_points_awarded_at_event	student_result_at_event	student_address
student_date_of_birth	student_gender
