For Loop Practice

```
for (int value=0; value >= 7; value = value + 1) {
    println(value);
}
```

```
for (int value=7; value < 0; value = value - 1) {
    println(value);
}
```

```
for (int value=1; value <= 20; value = value + 4) {
    println(value);
}
```

```
int num = 58;
int max = 20;
for (int value=num; value <= max; value = value + 1) {
    println(value);
}
```

```
int num = 58;
int max = 20;
for (int value=num; value <= max; value = value + 1)
    if (value%4 != 0) {
        println(value);
    }
}
```
