

CSE 121 Lesson 13: Arrays

Matt Wang & Brett Wortzman
Autumn 2024

[sli.do #cse121](https://sli.do/#cse121)

TAs:

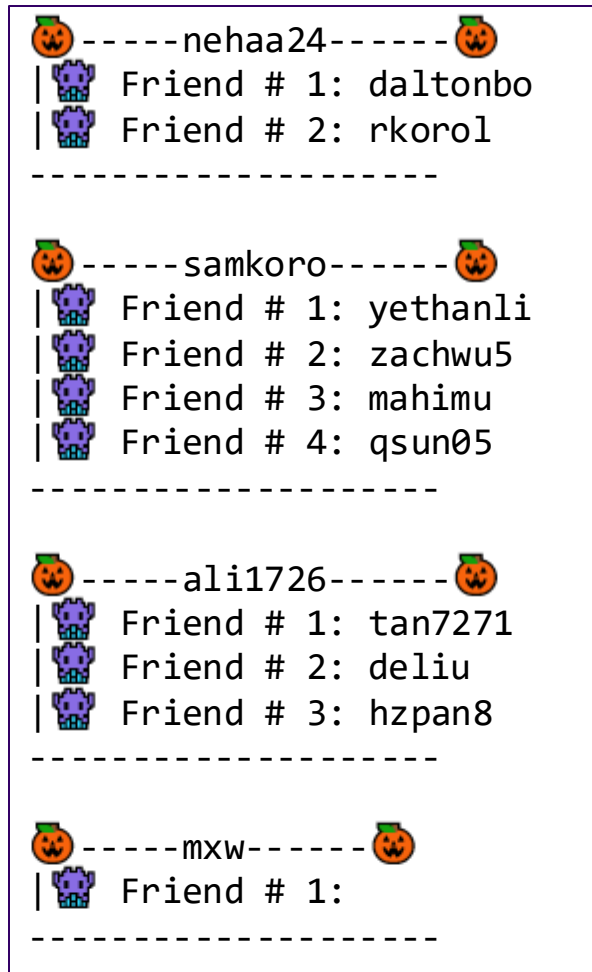

Abby	Afifah	Ailsa	Alice	Aliyan	Arohan
Chloë	Christopher	Dalton	Derek	Elizabeth	Ethan
Hanna	Hannah	Heather	Hibbah	Janvi	Jasmine
Judy	Julia	Kelsey	Lucas	Luke	Mahima
Maitreyi	Maria	Merav	Minh	Neha	Ronald
Ruslana	Sahej	Sam	Samrutha	Sushma	Vivian
Yijia	Zachary				

Today's playlist:
[121 24au lecture tunes](#)

Announcements, Reminders

- P2 due next Tuesday, November 12th
- R4 released, due next Thursday November 14th
- Quiz 2 in 2 weeks (Thursday, November 21st)
 - will include everything up to next Wed's lecture
- Quiz 1 grades *almost certainly* before Quiz 2
 - but, no promises on earlier :(sorry!
- IPL closed for Veteran's Day (November 11th)

Feedback & Closing the Loop: The Good

- Your TAs (esp. quiz sections & IPL) :)
- Practice Quizzes & Problems
- Pre-class materials
- Lectures (esp. live coding & interaction)
- Assignments
- Ed discussion board
- Classroom vibes & peer engagement
- Being funny (sometimes?) & empathetic

Feedback & Closing the Loop: Suggestions

Network visualization:

nehaa24's friends:

- ◆ daltonbo
- ◆ rkorol

samkoro's friends:

- ◆ yethanli
- ◆ zachwu5
- ◆ mahimu
- ◆ qsun05

ali1726's friends:

- ◆ tan7271
- ◆ deliu
- ◆ hzpan8

mxw's friends:

- ◆ None :(womp womp

- Time management & pace in lecture, including longer time spent coding
 - overall agree – we’re on it!
- Even more practice quizzes (& problems!)
 - stay tuned! (esp. for the final)
 - but also: more practice quizzes != doing better!
- More debugging & code quality, but split on whether it should be in lecture or not
 - we’re thinking about this! & talking to TAs

Feedback & Closing the Loop: Practice (1/2)

Network visualization:

🌟🌟🌟🌟 nehaa24's 2 friends 🌟🌟

*--daltonbo

*--rkorol

🌟🌟🌟🌟 samkoro's 4 friends 🌟🌟

*--yethanli

*--zachwu5

*--mahimu

*--qsun05

🌟🌟🌟🌟 ali1726's 3 friends 🌟🌟

*--tan7271

*--deliu

*--hzpan8

🌟🌟🌟🌟 mxw's 0 friends 🌟🌟

Practice can happen...

- in structured environments (e.g. quiz section, IPL)
- in unstructured environments (e.g. on your own)

Practice problems! (in order of relevance)

1. Practice quizzes, section problems
2. “Extra Review” problems
3. Pre-class & Lecture Problems
4. Practicelt

Feedback & Closing the Loop: Practice (2/2)

But: what we care about in this class is transfer: how can you use your knowledge on new tasks.

- won't ask you *exactly* what's on the practice quiz
- more practice quizzes has diminishing returns
- what programming in real life looks like!

User 😎: nehaa24
Friend(s) 🍀: daltonbo, rkorol

User 😎: samkoro
Friend(s) 🍀: yethanli, zachwu5, mahimu, qsun05

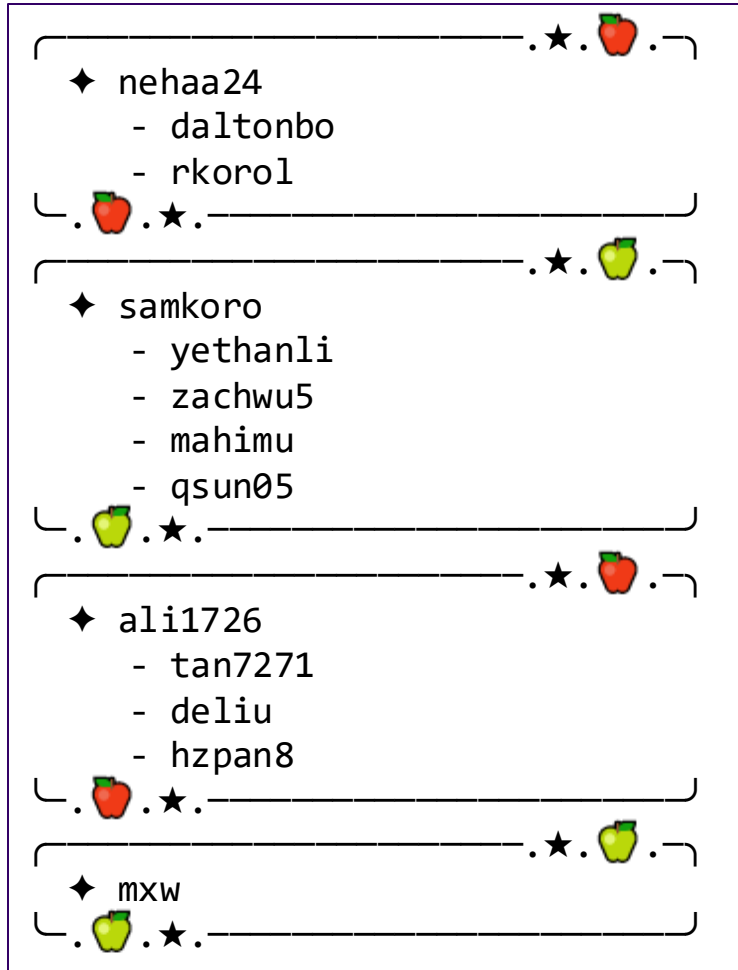

User 😎: ali1726
Friend(s) 🍀: tan7271, deliu, hzpan8

User 😎: mxw
Friend(s) 🍀: No FRIEND 😬

Find yourself hitting a wall with practice (or on work)?
A sign that you should be doing something different!

Advice: reflect on what's working & talk to someone (office hours, IPL, or your bestie)

Feedback & Closing the Loop: in closing...

Reading specifications carefully is a skill!

- “Fun” fact: Matt has to read specs too...

Make use of the IPL!

- not *just* for homework help!
- some times are busier than others ... plan for this!

And finally, please keep giving us feedback!

and one last C2 that made me chuckle

What the emoji means:

(mxw has no friends + are fake somehow !? 🙄❌)

(PCM) Arrays

- Elements must all be the same type
- Indices (starting at 0)
- Must decide size when created!
- `arr.length` to get arr's length
- `Arrays.toString(arr)` to get a nice `String` version

`int[]` `arr` = `new int[4];`
type name array creation code

```
int[] arr = new int[4];
```

(PCM) Array Traversal Pattern

```
for (int i = 0; i < arr.length; i++) {  
    // do something with arr[i]  
}
```

Poll in with your answer!

[sli.do #cse121](#)

How can we get the last element of an array `arr`?

- A. `arr[arr.length()]`
- B. `arr[length()]`
- C. `arr[arr.length]`
- D. `arr[arr.length() - 1]`
- E. `arr[arr.length - 1]`

Poll in with your answer!

[sli.do #cse121](https://sli.do/#cse121)

What would the array a store at the end of this arrayMystery method if $\{-20, 20, 26, 32, 50, 3\}$ was passed in?

```
public static void arrayMystery(int[] a) {  
    for (int i = a.length - 1; i >= 1; i--) {  
        if (a[i] > a[i - 1] + 10) {  
            a[i - 1] = a[i - 1] + 5;  
        }  
    }  
}
```

- A. $\{-20, 20, 26, 32, 50, 3\}$
- B. $\{-15, 25, 31, 37, 55, 8\}$
- C. $\{-15, 25, 31, 37, 50, 3\}$
- D. $\{-15, 20, 26, 37, 50, 3\}$

Poll in with your answer!

[sli.do #cse121](#)

Tracing through $\{-20, 20, 26, 32, 50, 3\}$

```
public static void arrayMystery(int[] a) {
    for (int i = a.length - 1; i >= 1; i--) {
        if (a[i] > a[i - 1] + 10) {
            a[i - 1] = a[i - 1] + 5;
        }
    }
}
```
