In reading P2 reflections...

I loved reading your P2 reflections (and some said hi to me directly!!).

A quick survey of some particularly interesting points:

• many of you said that we should ignore zip codes & insurance
  • there are some laws that prohibit discrimination on insurance
  • but, there are practical reasons you need zip codes – how to balance this?

• many great suggestions on what to change/include
  • e.g. prior medical conditions, disability status, family history
  • also: reweighting existing parameters (e.g. pain level and age)
...and C3 reflections!

So many lovely reflections on accessibility
(and your fave games – shoutout to the Borderlands 2 fan!)

Synthesizing some summaries serendipitously:

• disability is a wide spectrum
  • many mentioned not previously thinking about cognitive disabilities
• designing with accessibility in mind from the start is much easier (and more effective) than “tacking it on at the end”
• accessibility helps everyone (e.g. subtitles, graphics options)
Recent Development: Accessible Controllers
A broader takeaway

Three themes underlying P2 & C3’s reflections (and more!):

1. Technology is not separate from people – or issues people face!
2. Solving these issues is easier & more effective when you design for them from the start, rather than retrofitting them at the end.
3. As an individual, you have the power to make better technology – even by just asking questions :)

We’ll talk quite a bit more about “what’s next” on Friday!
Evaluations and Awards

I hope I’ve convinced you … we read everything you write!!

• Course Evals are due **Sunday, June 2nd at 11:59 PM**
  • Please give us feedback! TAs will be collecting feedback in quiz sections too!
• CERSE survey – please see Dan Grossman’s email!
  • This is a **different** kind of feedback from course evals
• Bob Bandes TA Award nominations open!
