LEC 07

CSE 121

Methods, Parameters 2

Questions during Class?

Raise hand or send here

sli.do #cse121

BEFORE WE START

Talk to your neighbors:

What are your weekend plans?

Music: CSE 121 25sp Lecture Tunes

Instructor: Miya Natsuhara

TAs:

Chloë	Hibbah	Sushma
Ailsa	Julia	Kelsey
Johnathan	Sahej	Shayna
Christian	Ruslana	Hannah
Merav	Hanna	Zach
Judy	Maitreyi	
Janvi	Ayesha	

Agenda

- **Announcements, Reminders** 
- Revisiting Class Constants
- Case study

Announcements, Reminders

- P1 is out, due next Tuesday, April 29th
  - Start early – this one is tough!
- R1 released yesterday, due Thursday May 1st
- Quiz 0 was yesterday!
  - Grades will be out before Quiz 1

Agenda

- Announcements, Reminders
- **Revisiting Class Constants** ⟵
- Case study

New: Class Constants

A fixed value visible (in-scope) to the whole program (the entire ***class***).

Value is set at declaration, **cannot** be reassigned – value is ***constant***.

```
public static final type NAME_OF_CONSTANT = expression;
```

Practice: Think

sli.do #cse121

```
public static final int COUNT = 7;

public static void main(String[] args) {
  int count = 5;
  line(count);
  System.out.println("COUNT is: " + COUNT);
  System.out.println("count is: " + count);
}

public static void line(int count) {
  for (int i = 1; i <= count; i++) {
    System.out.print("*");
  }
  count++;
  System.out.println();
}
```

What will be the **last line of output** from this code?

A. `count is: 1`

B. `count is: 5`

C. `count is: 6`

D. `count is: 7`

Practice: Pair

sli.do #cse121

```
public static final int COUNT = 7;

public static void main(String[] args) {
  int count = 5;
  line(count);
  System.out.println("COUNT is: " + COUNT);
  System.out.println("count is: " + count);
}

public static void line(int count) {
  for (int i = 1; i <= count; i++) {
    System.out.print("*");
  }
  count++;
  System.out.println();
}
```

What will be the **last line of output** from this code?

A. `count is: 1`

B. `count is: 5`

C. `count is: 6`

D. `count is: 7`

Walkthrough: Counting Counts

```
public static final int COUNT = 7;
public static void main(String[] args) {
  int count = 5;
  line(count);
  System.out.println("COUNT is: " + COUNT);
  System.out.println("count is: " + count);
}

public static void line(int count) {
  for (int i = 1; i <= count; i++) {
    System.out.print("*");
  }
  count++;
  System.out.println();
}
```
