

LEC 16

# CSE 121

## Array Patterns

BEFORE WE START

***Talk to your neighbors:***

*What is your favorite coffee shop around here?*

Music: [121 25wi lecture playlist](#) ❄️

**Instructor:** Matt Wang

**TAs:**

|         |          |          |             |
|---------|----------|----------|-------------|
| Ailsa   | Alice    | Chloë    | Christopher |
| Ethan   | Hanna    | Hannah   | Hibbah      |
| Janvi   | Judy     | Julia    | Kelsey      |
| Lucas   | Luke     | Maitreyi | Merav       |
| Ruslana | Samrutha | Sam      | Shayna      |
| Sushma  | Vivian   |          |             |

# Announcements, Reminders

- Quiz 2 in section **tomorrow (Thursday, March 6<sup>th</sup>)!**
  - Practice Quizzes and walkthrough videos are great resources for studying!
- P3 will be released tonight & due next **Tuesday, March 11<sup>th</sup> at 11:59pm**
- R5 due tomorrow (eligible: **P1**, C2, P2)
- New: **all** assignments will be eligible for resubmission on R7!
- Details about the final exam will be discussed on Friday

# (PCM) Why Discuss Array Patterns?

- Arrays are important! This is our fourth lecture covering arrays
- Analogy: tools in toolbox
- Helpful for your future in programming

# (PCM) Counting Elements that Meet a Condition

|       |       |         |       |         |         |       |
|-------|-------|---------|-------|---------|---------|-------|
| "one" | "two" | "three" | "six" | "seven" | "eight" | "ten" |
|-------|-------|---------|-------|---------|---------|-------|

```
public static int evenLength(String[] list) {  
    int countEven = 0;  
    for (int i = 0; i < list.length; i++) {  
        if (list[i].length() % 2 == 0) {  
            countEven++;  
        }  
    }  
  
    return countEven;  
}
```

# (PCM) Modifying Elements of an Array

|   |   |    |    |    |    |
|---|---|----|----|----|----|
| 4 | 8 | 15 | 16 | 23 | 42 |
|---|---|----|----|----|----|

```
public static void clamp(int min, int max, int[] list) {  
    for (int i = 0; i < list.length; i++) {  
        if (list[i] > max) {  
            list[i] = max;  
        } else if (list[i] < min) {  
            list[i] = min;  
        }  
    }  
}
```

# (PCM) Searching for an Element

|       |       |         |       |         |         |       |
|-------|-------|---------|-------|---------|---------|-------|
| "one" | "two" | "three" | "six" | "seven" | "eight" | "ten" |
|-------|-------|---------|-------|---------|---------|-------|

```
public static int indexOfIgnoreCase(String phrase, String[] list) {  
    for (int i = 0; i < list.length; i++) {  
        if (list[i].equalsIgnoreCase(phrase) ) {  
            return i;  
        }  
    }  
  
    return -1;  
}
```

# (PCM) Array of Counters

0 1 2 2 0 2

```
public static int[] numCount(Scanner input, int numPrompts) {  
    int[] counts = new int[3];  
    for (int i = 0; i < numPrompts; i++) {  
        int num = input.nextInt();  
  
        counts[num]++;  
    }  
  
    return counts;  
}
```

# (PCM) Analyzing Multiple Elements in an Array

|   |   |   |   |   |
|---|---|---|---|---|
| 0 | 1 | 9 | 1 | 0 |
|---|---|---|---|---|

```
public static boolean isPalindrome(int[] list) {  
    for (int i = 0; i < list.length / 2; i++) {  
        if (list[i] != list[list.length - 1 - i]) {  
            return false;  
        }  
    }  
  
    return true;  
}
```

# (PCM) Shifting Elements

|     |       |       |       |        |      |
|-----|-------|-------|-------|--------|------|
| 9.6 | -88.0 | 4.815 | 0.009 | 7.0184 | 42.9 |
|-----|-------|-------|-------|--------|------|

```
public static void rotateRight(double[] list) {  
    double lastElement = list[list.length - 1];  
  
    for (int i = list.length - 1; i > 0; i--) {  
        list[i] = list[i - 1];  
    }  
  
    list[0] = lastElement;  
}
```

# (PCM) Your Turn!

- On Ed, try the [TODO] rotateLeft: Shifting Elements problem
  - If you finish early, feel free to fill in the patterns we already discussed

# (PCM) Questions to Ask Ourselves

- “Are we looking at each element in the array, one at a time?”
  - Loop traversal
- “Are we changing elements in the array?”
  - Update the array at a specific index
- “Do we only want to do a task if a certain condition is true?”
  - Conditional(s)

# (PCM) Your Questions on Arrays!

- “Do all array problems follow the similar base pattern as the one’s provided”
- “How do you resize an array when you need to add elements”
- “Can arrays of arrays have arrays?”
