Announcements, Reminders

- Feedback for C0 released today
 - Please view your feedback – crucial part of learning process
 - For regrades (not resubs), please make a private Ed post
 - Use the [minimum grade calculator](#) to track your grades!
- C1 releasing later today, due Tuesday, April 21st
- Quiz 0 is *next* Thursday, April 23rd (in your registered quiz section)
 - Can't make it? Email Matt ASAP (mxw@cs.washington.edu)
- Resubmission Cycle 0 (R0) opening tomorrow, due Thursday, April 23rd

Reminder: Resubmissions (or “resubs”)

- Each week, you may resubmit one Programming Assignment or Creative Project with **no penalty**. The grade of your resubmission will completely replace your previous grade.
- This is a huge opportunity: you get to resubmit your work after we grade it and give you feedback! Please take advantage of this :))
- If you miss an assignment and/or only finish it late – use a resub!

Resub Logistics

Some logistics:

- There are 8 total resub cycles this quarter (and 8 assignments)
- Assignments eligible to resubmit for 3 cycles after feedback is out

To resubmit:

1. Make and submit your changes
2. Set the submission you want graded as “Final”
3. **Submit a Google Form**, with a reflection, to confirm your resub
 - You must submit the form before the deadline for resub to count

Practice: Think

sli.do

#cse121

Suppose `s` contains the String "bubble gum".

Which statement would result in `s` containing "Gumball" instead?

b	u	b	b	l	e		g	u	m
0	1	2	3	4	5	6	7	8	9

A. `s.substring(7) + "ball";`

B. `s = s.substring(7, 9) + "ball";`

C. `s = s.charAt(7).toUpperCase() + "ball";`

D. `s = s.substring(7, 8).toUpperCase() + s.substring(8) + "ball";`

Practice: Pair

sli.do

#cse121

Suppose `s` contains the String "bubble gum".

Which statement would result in `s` containing "Gumball" instead?

b	u	b	b	l	e		g	u	m
0	1	2	3	4	5	6	7	8	9

- A. `s.substring(7) + "ball";`
- B. `s = s.substring(7, 9) + "ball";`
- C. `s = s.charAt(7).toUpperCase() + "ball";`
- D. `s = s.substring(7, 8).toUpperCase() + s.substring(8) + "ball";`

Chaining methods in expressions

```
s.substring(7, 8).toUpperCase() + s.substring(8) + "ball"
```

```
"g".toUpperCase() + s.substring(8) + "ball"
```

```
"G" + s.substring(8) + "ball"
```

```
"G" + "um" + "ball"
```

PCM Review: for loops!

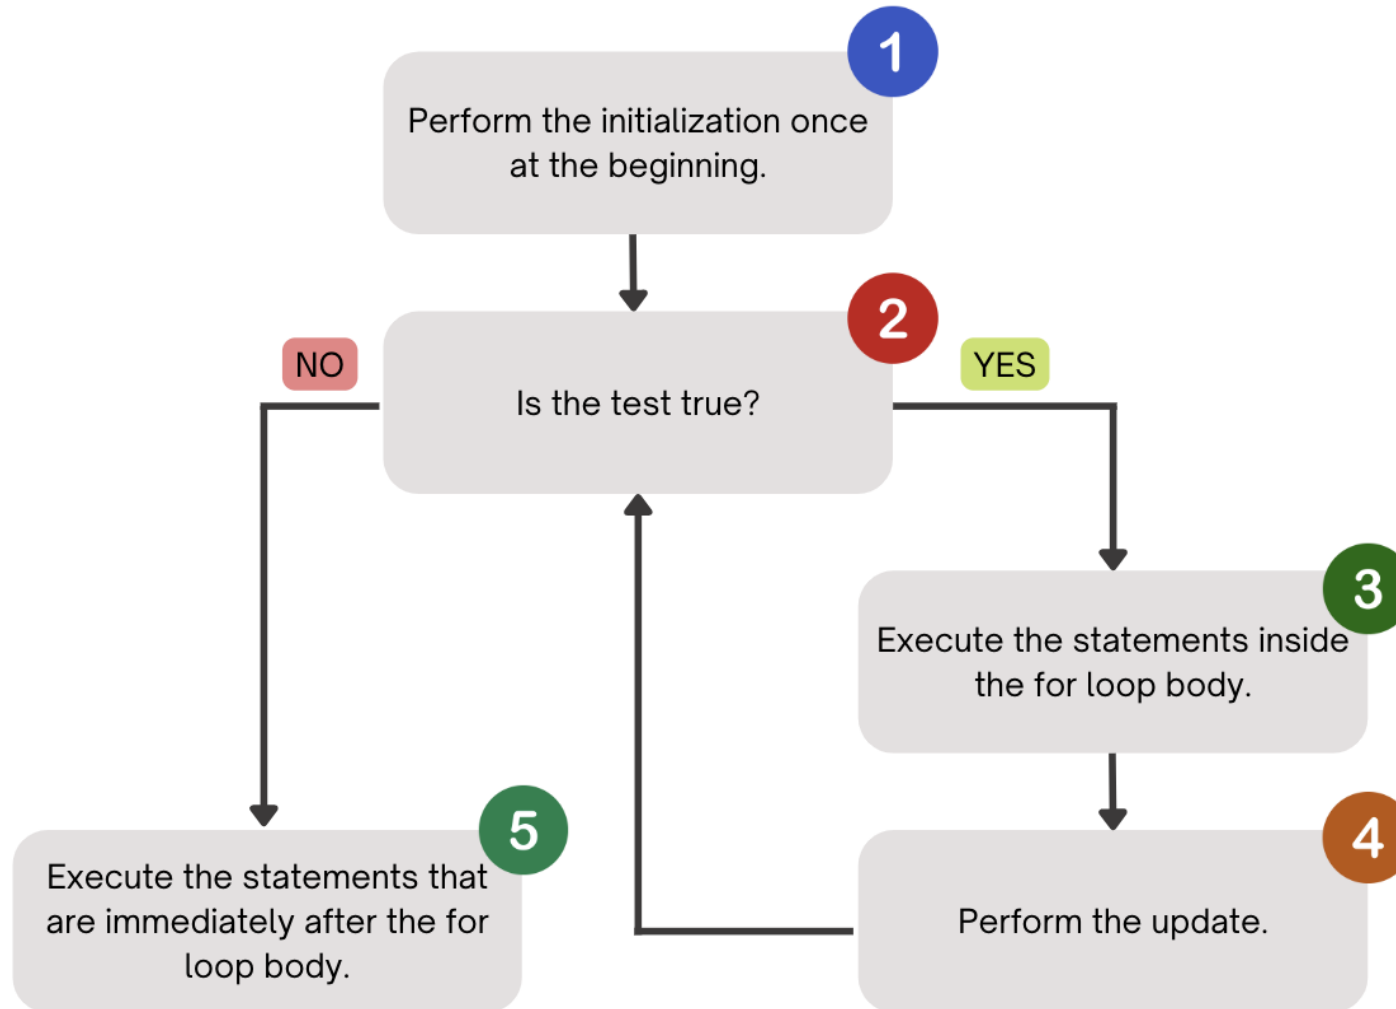

For loops are our first **control structure**: a syntax *structure* that *controls* the execution of other statements.

```
for ( initialization ; test ; update ) {  
    body (statements to be repeated)  
}
```

PCM Review: for loops (example)

```
for (int counter = 1; counter <= 5; counter++) {  
    System.out.println("I love CSE 121!");  
}
```

PCM Review: for loops (a helpful flowchart)

Tracing through a for loop

```

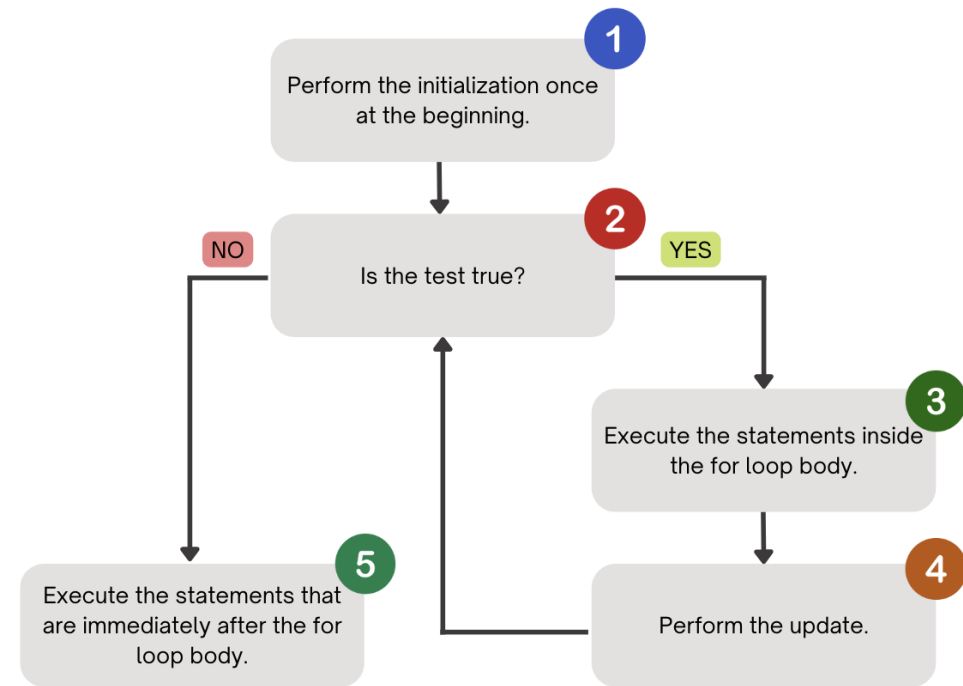

1 for (int counter = 1; counter <= 5; counter++) {
3     System.out.println("I love CSE 121!");
4 }
5
    
```

5

```

I love CSE 121!
I love CSE 121!
I love CSE 121!
I love CSE 121!
I love CSE 121!
    
```

Practice: Think

sli.do

#cse121

What output does the following code produce?

```
for (int i = 1; i <= 7; i++) {  
    System.out.println(i + " squared = " + i * i);  
}
```

A.

```
i squared = i * i  
i squared = i * i  
i squared = i * i  
i squared = i * i  
i squared = i * i  
i squared = i * i
```

B.

```
i squared = i * i  
i squared = i * i  
i squared = i * i  
i squared = i * i  
i squared = i * i  
i squared = i * i  
i squared = i * i
```

C.

```
1 squared = 1  
2 squared = 4  
3 squared = 9  
4 squared = 16  
5 squared = 25  
6 squared = 36
```

D.

```
1 squared = 1  
2 squared = 4  
3 squared = 9  
4 squared = 16  
5 squared = 25  
6 squared = 36  
7 squared = 49
```

PCM Review: String Traversals

```
// For some String s  
for (int i = 0; i < s.length(); i++) {  
    // do something with s.charAt(i)  
}
```

The Fencepost Pattern

Some task where one piece is repeated n times, and another piece is repeated $n-1$ times and they alternate
