CSE 122 Autumn 2023

LEC 20: Victory Lap & Next Steps

Questions during Class?
Raise hand or send here

sli.do #cse122

Victory Lap & Next Steps

Talk to your neighbors:
What was your favorite part of this quarter?
Doesn’t have to be about CSE 122!

(Put AMA questions in sli.do!)

Music: Rhythm Nation – Janet Jackson

Instructor
Elba Garza

TAs
Abigail Autumn Claire Jacob Kevin Mia Rucha Shreya
Ambika Ayush Colin Jasmine Kyle Poojitha Saivi Smriti
Arthur Chaafen Elizabeth Jaylyn Marcus Rishi Shananda Steven
Atharva Chloe Helena Kavya Megana Rohini Shivani Zane
Announcements

• Lots of information posted on Wednesday!
  - Bob Bandes TA Award
  - Two Dropped Letter Grades now include the final exam!
  - Course Evaluations (due by December 10th)
  - IPL closes after Friday (December 8th)
  - Review Session Friday (December 8th)
  - Gigi & Gumball visit on Monday (December 11th)

• Resubmission Cycle 7 (R7) due December 8th
  - Submit anything but C3!

• Resubmission Cycle 8 (R8) dates coming soon!
  - Solely for C3 submissions/resubmissions!
You Made It!
Lecture Outline

• Looking Back

• Looking Forward

• Thank You!
CSE 121 (or CS1) vs. CSE 122

CSE 121 / AP CS / IB CS / CS1
or Other Programming Experience

- Print statements
- Data types (int, String, boolean)
- Methods / Functions
  - Parameters
  - Returns
- Control structures
  - Loops
  - Conditionals
- File I/O
- Arrays
- Computational Thinking
  (language agnostic)

CSE 122 – Computer Programming II

- Decomposing large problems into
  smaller, manageable, subproblems
- Using data structures
  - List
  - Stacks / Queues
  - Sets
  - Maps
  - 2D Arrays
- Object Oriented Programming
  - Interfaces
  - Separation of Concerns
Why 122?

1. Build a strong foundation of data structures that will let you tackle the biggest problems in computing
Why 122?

2. Learn an important structural pattern for representing objects in code to make our code more reusable and maintainable and easier to understand.

• Java is designed around this idea of objects. We haven’t been leveraging that yet!

• Used in almost every real-world software project.
Review So Far

**CS Concepts**
- Problem Solving
- Debugging
- Client/Implementer
- Object Oriented Programming
- Encapsulation
- Testing
- Third Party Libraries

**Data Structures**
- Lists
- Stacks
- Queues
- 2D Arrays
- Sets
- Maps

**Java Language**
- Intro to Java (e.g., File Processing)
- Iterators and For-each Loops
- Exceptions
- Interfaces
- References
- JUnit

**Java Collections**
- Arrays / 2D Arrays
- ArrayList
- LinkedList
- Stack
- TreeSet / TreeMap
- HashSet / HashMap
- Interfaces for Java Collections
Lecture Outline

• Looking Back

• Looking Forward

• Thank You!
What Can Come Next?

• Some ideas
  - Work on a project
  - Learn a new language
  - Learn a new library
  - Take more courses
  - Explore CS beyond programming

• The general idea though is... whatever you want!
  - You’ve learned an extremely powerful set of skills, use it on what you are most interested in pursuing!
What Project?

• Add a Graphical User Interface (GUI) to an assignment
• Automate some boring tasks in your life
  - Maybe even automate writing code with good style?
• Organize and process data from your life (favorite quotes, your calendar, etc.)
• What are you currently doing that a computer could do?
• List of some project ideas (UW CSE alum)
What Language?

• Expanding your Java knowledge with a project is valuable. Or use a project to learn a new language!

• Pick a project, see what similar projects use! No wrong language to learn, certain tasks favor certain languages
  - iOS: Swift
  - Android: Java, Kotlin
  - Client-side web: Javascript (many frameworks to choose from)
  - Beautiful visuals: Processing
  - Data Processing + Machine Learning: Python
  - Data Management: SQL
  - Embedded systems: C / C++ / Rust

• Learn a new programming paradigm
  - Functional languages: Racket, Haskell, Scala, (now, Java 8!)
What Library?

Here are just a FEW examples. There is so much more!

• Processing language
  - http://nlp.stanford.edu/software/

• Building games
  - http://lwjgl.org/
  - http://jbox2d.org/ (with physics!)

• Processing biological data
  - http://biojava.org/wiki/Main_Page

• Accessing Facebook data
  - http://restfb.com/

• Make a website backed by Java
What Classes?

• CSE 123 is the most common next class. Continue the story, learn how data structures are implemented

• Other courses
  - CSE 154: Web Programming (HTML/CSS/Javascript)
  - CSE 163: Intermediate Data Programming (Python)

• Large set of CSE courses for both Allen School majors and students from all over UW campus. Many exciting courses, many (but not all) require CSE 123.
  - Allen School Majors
  - All UW Students

• Courses in Tech Related Majors: INFO, AMATH, HCDE, DXARTS, ...
What is CSE?

The changing nature of the field: From smaller/faster/cheaper to tackling societal challenges

CORE CSE
AI, systems, theory, languages, etc.

- Medicine & Global Health
- Energy & Sustainability
- Transportation
- Education
- Scientific Discovery
- Neural Engineering
- Elder Care
- Accessibility
- Robotics
- Computer vision
- Human computer interaction
- Machine learning
- Cloud computing
- Data science
- Sensors
- Natural language processing
- Mobile computing

Technology Policy and Societal Implications
Security, Privacy, & Safety
Advancing the Developing World
Interacting with the Physical World: “The Internet of Things”

UW has led this modern view of the field – both in concept and in implementation
Research Beyond Programming

Learn a new CS Topic

- Investigate how to best distribute relief funds
- Digitize basketball players
- Help deaf/hard-of-hearing people identify sounds
- Detect and prevent toxicity online
- Recognize disinformation online
- Make movies
- Improve digital collaboration
- Design algorithms that are more fair and better respect privacy
- Fix Olympic badminton
- And so much more!

Attend Weekly Meetings

- Change – technologies for low-income regions
- Dub – human-computer interaction and design
- ComputingEd@UW – computer science education

Read a Book! (links on pictures)
Lecture Outline

• Looking Back
• Looking Forward
• Thank You!
Thank You! (Students)

• This is still a very new course! We are always looking for feedback on how to improve the class for you and for future students! Thank you for your patience and understanding as we develop everything. 😊
  - We really value your feedback!
  - Let us know what’s working and what isn’t working for you
  - Something that went well in another course? Tell us about it!

• Please fill out the Course Evaluation by Sunday December 10th at 11:59 PM to provide feedback about the course!
Thank You! (TAs)

Elba and all of the students couldn’t have done this quarter without all of your amazing TAs! Thanks to them for running the course!
