Welcome! 🙋‍♀️

Before we start:

Talk to your neighbors: Introduce yourself to your neighbor!

What is your name? Major? What did you do over spring break?

Music: [122 24sp Lecture Tunes](#)

**Instructors:** Miya Natsuhara and Kasey Champion

**TAs:**
- Ayush
- Poojitha

Lecture Outline

• Introductions
• About this Course
  - Course Components & Tools
  - Grading
  - Policies
  - Making the Most of this Class
• Intro/Review Java
Course Staff

• Instructors: Miya Natsuhara and Kasey Champion

• Teaching Assistants: 28 Fantastic TAs!
  - Available in section, office hours, and discussion board
  - Invaluable source of information & help in this course

• We’re excited to get to know you!
  - Our goal is to help you succeed ☺
Students

• Currently 310 students registered for the course!

• Strength in numbers
  - With 310 students, if you’re confused about something, we guarantee someone else is too! Ask questions in Slido or in class 😊
  - Students come from all different backgrounds & majors & interests in future career goals.

• Focus on us trying to help you build community
  - Meet others in the class to form study groups or have people you can work with.
What is this Class?

CSE 121 – Computer Programming I
or Other Programming Experience

- Print statements
- Data types (int, String, boolean)
- Methods / Functions
  - Parameters
  - Returns
- Control structures
  - Loops
  - Conditionals
- Arrays & 2D arrays
- Computational Thinking
  (language agnostic)

CSE 122 – Computer Programming II

- Decomposing large problems into smaller, manageable, subproblems
- File I/O
- Using data structures
  - List
  - Stacks / Queues
  - Sets
  - Maps
- Object Oriented Programming
  - Interfaces
Prerequisite Knowledge

• Students entering CSE 122 are coming from many of different backgrounds
  - UW: CSE 121 or other intro programming course
  - Community College: Intro Programming Course
  - High School Programming Course (e.g., UWHS, AP CS, IB CS, etc.)
  - Self-taught or other previous experience

• Importantly: CSE 122 is in Java, but we do not expect prior experience in Java! Do expect knowing the list of CSE 121 topics in some language.
  - Students who do not have experience in Java will be focusing on practicing the programming skills you know in a new language!
  - You will find the Java Tutorial and Creative Project 0 very helpful!

• If you want to know if this class is the right fit for you, take the Allen School Self-Placement Test
Why 122?

1. Build a strong foundation of data structures that will let you tackle the biggest problems in computing
Why 122?

2. Learn an important structural pattern for representing objects in code to make our code more reusable and maintainable and easier to understand.

• Java is designed around this idea of objects. We haven’t been leveraging that yet!

• Used in almost every real-world software project.

Course Components

Meetings

**LECTURES** (x20)
- We’re here!
- Introduce concepts, practice ideas, discuss applications.
- Pre-class materials to prepare for class each day. Due **before** class.
- Recorded 😎

**SECTIONS** (x19)
- Held in person
- More practice, reviews, applications
- TA advice, how to be an effective student
- Preparation for quizzes / exams
- Not Recorded!

Assessments

**PROGRAMMING ASSIGNMENTS** (x4)
- Structured assignments
- Programming in Java
- Applying & implementing course concepts

**CREATIVE PROJECTS** (x4)
- More open-ended assignments
- Explore new ideas and applications

**QUIZZES** (x3)
- Taken in quiz section
- 45 minutes on computer

**EXAM** (x1)
- Culminating exam
- **Thursday, June 6**
  8:30am-10:20am
Course Website

**cs.uw.edu/122**

**Staff**

**Instructor**

Miya Natsuhara

Hi all, I’m Miya! I’ve lived in various parts of the Seattle area for all of my life (Renton, Bellevue, Downtown Seattle) and now live in West Seattle. We’ve been considered a temporary island out here for the past 2.5 years as the West Seattle Bridge has been closed but it’s recently opened so we are happy to reunite with the greater Seattle area.

I graduated with a BA in Mathematics along with a BS and MS in Computer Science from the Allen School here at UW. I had no knowledge of programming or Computer Science when I started at UW, and only very reluctantly took the first course. I’ve since fallen in love with programming, software development, and CS in general. I love to teach and expose everyone to the computer science world.

Office Hours

Mondays 1:00-2:00pm, Fridays 1:30-2:30pm

CSE 460 or Zoom

**Get to know the course staff**

**Announcements**

Contains most course info – check frequently!

Announcements, Calendar, Lecture Slides, Office Hours schedule, Staff Bios, Important Links

Graded Course Components

- Your grade will consist of the following categories:
- Each mark is graded on the scale:
  - E(xcellent)
  - S(atisfactory)
  - N(ot yet)

<table>
<thead>
<tr>
<th>Category</th>
<th>#</th>
<th>Marks per</th>
<th>Total Marks</th>
</tr>
</thead>
<tbody>
<tr>
<td>Programming Assignments</td>
<td>4</td>
<td>4 (Behavior, Concepts, Quality, Testing/Reflection)</td>
<td>16</td>
</tr>
<tr>
<td>Creative Projects</td>
<td>4</td>
<td>1</td>
<td>4</td>
</tr>
<tr>
<td>Quizzes</td>
<td>3</td>
<td>3 (3 questions)</td>
<td>9</td>
</tr>
<tr>
<td>Exam</td>
<td>1</td>
<td>6 (6 questions)</td>
<td>6</td>
</tr>
</tbody>
</table>
Course Grades

In assigning course grades, we’ll use a bucket system:

- Marks earned place in an initial bucket, additional S+ marks improve grade.
- Must meet all requirements of a bucket for initial placement.
- These are minimum GPA guarantees – grade can always be higher than minimum promise. 😄

<table>
<thead>
<tr>
<th>Minimum Grade</th>
<th>Required S+</th>
<th>Required E</th>

Resubmissions

Learning is a challenging process that takes time, it doesn’t always happen on your first try.

• Each week, one previous Programming Assignment or Creative Project can be resubmitted
  - Must be accompanied by write up explaining changes
  - Grade on resubmission replaces original grade.
  - An assignment can be resubmitted in the 3 cycles after feedback has been published
  - Tip: Resubmit as early as possible

See syllabus for more details
Collaboration

• These concepts are challenging—we strongly encourage discussion + collaboration!
  - Don’t attempt to gain credit for something you didn’t do
  - In general, share ideas and work together, but don’t copy work. Never show someone else your code or solution write up.
  - For any ungraded work (e.g., pre-class materials) there is no concern about academic misconduct! You should be collaborating on those without reservation.
  - On graded assignments you should still collaborate, but the code you write should be of your own creation.
  - Always cite the help you receive on graded work

• Withdrawal Policy

• Read full policy in Syllabus
Textbook

Pre-class Materials

• All required readings are available free on Ed!
• Should be finished before class (not graded)

Optional Textbook

• Building Java Programs by Reges and Stepp (5th Edition)
• Not required but does add another perspective. Will reference relevant chapters.
• Advice: only purchase if you learn best with a textbook, otherwise not recommended.

How Learning Works

• Learning requires **active participation** in the process. It’s not as simple as sitting and listening to someone talk at you.
  - Requires **deliberate practice** in **learning by doing**
  - Benefits from **collaborative learning**

• Hybrid classroom model
  - Asks you to do some preparation before class in the form of readings and practice problems.
    - Should take ~30 minutes a day
  - Class will start with brief recap, then pick up where the reading and practice problems leave off.
  - Attendance isn’t graded, but showing up and trying is the first step in succeeding in the class!

• Pre-class materials are ungraded, but...
  - It’s okay if you find them challenging! That means you are learning!
Metacognition

- **Metacognition**: asking questions about your solution process.

- **Examples:**
  - **While debugging**: explain to yourself why you’re making this change to your program.
  - **Before running your program**: make an explicit prediction of what you expect to see.
  - **When coding**: be aware when you’re not making progress, so you can take a break or try a different strategy.
  - **When designing:**
    - Explain the tradeoffs with using a different data structure or algorithm.
    - If one or more requirements change, how would the solution change as a result?
    - Reflect on how you ruled out alternative ideas along the way to a solution.
  - **When studying**: what is the relationship of this topic to other ideas in the course?
Getting Help

• Discussion Board
  - Feel free to make a public or private post on Ed
  - We encourage you to answer other peoples’ questions! A great way to learn

• Introductory Programming Lab (Office Hours)
  - TAs can help you face to face in office hours, and look at your code
  - You can go to the IPL with **any** course questions, not just assignments

• Section
  - Work through related problems, get to know your TA who is here to support you

• Your Peers
  - We encourage you to form study groups! Discord or Ed are great places to do that

• Email
  - We prefer that all content and logistic questions go on the Ed discussion board (even if you make them private). 310 of you >>> 31 of us!
  - For serious personal circumstances, you can email Miya and Kasey directly. It never hurts to email us, but if it’s a common logistic question, we may politely ask you to post on the discussion board instead.
Help Us Improve!

• This is a relatively new course! We are always looking for feedback on how to improve the class for you and for future students! Thank you in advance for your patience and understanding as we develop everything. 😊
  - We really value your feedback!
  - Let us know what’s working and what isn’t working for you
  - Something that went well in another course? Tell us about it!

• Post on the discussion board (can be public/private).
  - Note: Anonymous here is anonymous to other students, not to the staff.

• Submit feedback via the Anonymous Feedback Tool (linked under “Course Tools” on the website)
The World Around CSE 122

• Our goal is to give you a great CSE 122 experience
  - But CSE 122 does not exist in a vacuum – there’s a lot going on in the world right now that can impact your education

• We’ve designed course policies for maximum flexibility: ability to resubmit assignments and drop low letter grades in quizzes
  - But we cannot cover every individual situation

• Please reach out if you need accommodations of any kind to deal with these unfamiliar situations

Hello World

- Java Specifics
  - Every program needs a **class**
  - Runnable programs need a **main** method (**signature** must exactly match)
  - System.out.println to print
  - "Hello world" is a String

- Running on **Ed**
  - **Run** runs your program
  - **Mark** submits and runs autograder
    - Submit as many times as you like
    - “Shotgun submission” = Unhelpful habit
  - **Solution** shows solution (if applicable)

```java
public class HelloDemo {
    public static void main(String[] args) {
        System.out.println("Hello world");
    }
}
```
Review Java Syntax

Java Tutorial reviews all the relevant programming features you should familiar with (even if you don’t know them in Java).

- Printing and comments
- Variables, types, expressions
- Conditionals (if/else if/ else)
- Loops (for and while)
- Strings
- Methods
- Arrays & 2D Arrays
“Homework” for Next Time

• First assignment will be released Friday, but there are some things to do in the meantime.

• TODO this week
  - Fill out the introductory survey
  - Optional: Introduce yourself in a Video Introduction!
  - Go meet your TA and classmates in Thursday’s quiz section
  - ⭐️ Complete the pre-class material for Friday (see calendar)
  - Check over syllabus details
