

CSE 142

Objects and Classes

4/7/2003

(c) 2001-3, University of Washington

D-1

Outline for Today

- Short review of objects
- Discussion of objects and classes
- Object and class exercise
- Major concepts
 - Objects as instances of classes
 - Classes as templates
 - Objects as properties

4/7/2003

(c) 2001-3, University of Washington

D-2

Object Review

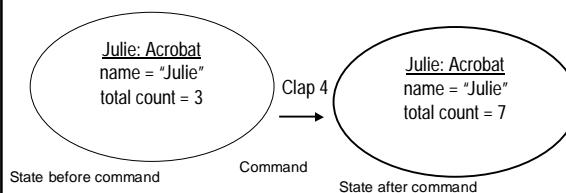

- Objects have properties and responsibilities
- Can send messages to objects
 - Queries [Find out values associated with properties]
 - Commands [Instruct an object to do something]
May cause a change in state
- Acrobat Example
 - Count is a query
 - Clap and Twirl are commands
Increase total count for objects

4/7/2003

(c) 2001-3, University of Washington

D-3

State

What is the state after the command Twirl 2?
What is the state after the query Count?

4/7/2003

(c) 2001-3, University of Washington

D-4

Classes

- Classes serve as templates or patterns for creating objects
- Objects in a class share same properties and responsibilities
 - Note: "same properties" does not imply "same values"
- Every object is an instance of a class

The class is the basic unit of programming in object-oriented programming

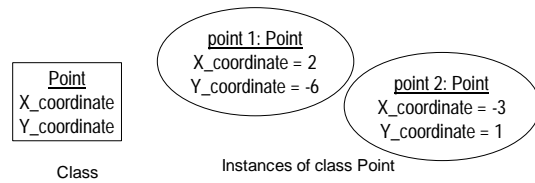

4/7/2003

(c) 2001-3, University of Washington

D-5

Drawing Classes and Objects

- Typically a system has a small number of classes but may have a large number of objects
- Drawing: rectangle for class, blob for objects

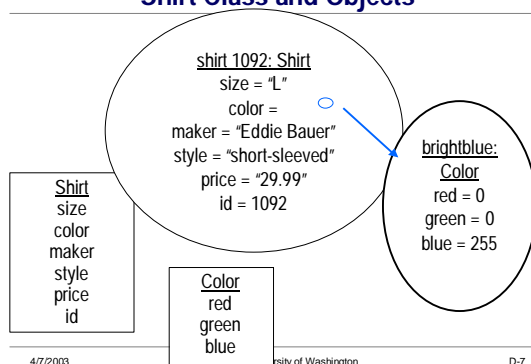

4/7/2003

(c) 2001-3, University of Washington

D-6

Shirt Class and Objects

4/7/2003

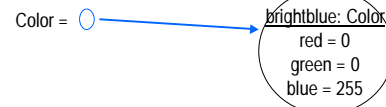

(c) 2001-3, University of Washington

D-7

Relationships Between Objects

- Objects may interact to solve a problem
- Two or more objects may have a well-defined relationship
- Example relation: One object as a property of another object
 - Reference value: refers or denotes an object

The color property in the Shirt object refers to a Color object

4/7/2003

(c) 2001-3, University of Washington

D-8

Type Review

• What is a type?

<u>Shirt Property</u>	<u>Value</u>	<u>Type</u>
Size	"L"	
Color	Reference value	
Maker	"Eddie Bauer"	
Style	"short-sleeved"	
Price	29.99	
ID	1092	

4/7/2003

(c) 2001-3, University of Washington

D-9

Student Registration System

• What classes would you use?

- Remember: a class is a set of objects with the same properties and responsibilities

4/7/2003

(c) 2001-3, University of Washington

D-10

Student Class

• Properties

- Student ID
- Name
- Address
- Schedule
- GPA
- Phone Number
- Transcript
- Total credits
- Full-time?

• Responsibilities

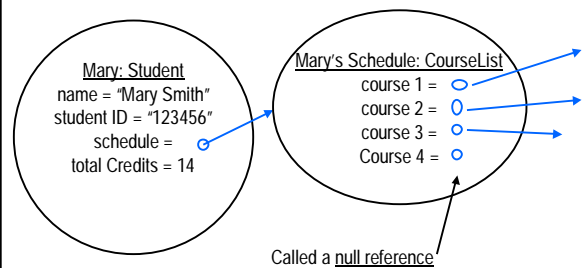

- Add course
- Drop course
- Update address
- Get GPA
- Get transcript
- Get schedule
- Get student ID
- Get total credits
- Get full-time status

4/7/2003

(c) 2001-3, University of Washington

D-11

Student Object Example

4/7/2003

(c) 2001-3, University of Washington

D-12

Student Registration System Exercise

Student:
name
student ID
schedule
total Credits

CourseList
course 1
course 2
course 3
course 4

1. Determine properties for classes for Course and Room
2. Use these classes to create instances (objects) modeling the students and schedules on the sheet
3. Draw object diagrams to represent the objects you create and use arrows to show references to objects

4/7/2003

(c) 2001-3, University of Washington

D-13

Example: Mary

Mary Smith, Student ID: 123456

Schedule:

CSE 142	Course ID: 2520	4 credits	Guggenheim 224 room capacity: 275
MATH 120	Course ID: 5009	5 credits	Mary Gates 095 room capacity: 40
MUSIC 160	Course ID: 5669	5 credits	Music 126 room capacity: 220

4/7/2003

(c) 2001-3, University of Washington

D-14

Example: Joe

Joe Johnson, Student ID: 234567

Schedule:

MATH 120	Course ID: 5009	5 credits	Mary Gates 095 room capacity: 40
CSE 142	Course ID: 2520	4 credits	Guggenheim 224 room capacity: 275
MUSIC 310	Course ID: 4216	4 credits	Music 126 room capacity: 220
DANCE 105	Course ID: 2655	2 credits	Meany 267 room capacity: 45

4/7/2003

(c) 2001-3, University of Washington

D-15

Example Model of Mary and Joe

4/7/2003

(c) 2001-3, University of Washington

D-16

Queries about Mary and Joe

- What is the room number of Mary's first course?
- What department teaches Joe's second course?
- How many seats does the room for Mary's second course have?
- What is the course ID for Joe's third course?
- How many courses is Joe taking?
- To think about:
 - What would happen if the course ID for CSE 142 changed?
 - What if the room capacity for MUSIC 126 changed?

4/7/2003

(c) 2001-3, University of Washington

D-17

Classes and Objects in Java

- Preview of what's to come:
 - Objects have properties
 - In Java, we'll call these instance variables
 - Objects have responsibilities
 - In Java, we'll call these methods
- Now we'll begin studying Java directly
 - Now you have a solid foundation of concepts we'll use throughout the quarter

4/7/2003

(c) 2001-3, University of Washington

D-18

Summary

- Objects are instances of classes
- Classes serve as templates for creating objects
 - Objects in a class share the same properties and responsibilities
- Objects can be properties of other objects
 - Defines a relation between objects

4/7/2003
