

CSE142 Lecture Questions for Friday, 1/29/21, section A

Time (e.g., 12:45)	Question	Answer
	Start of lecture ties in with homework 4, correct?	yes
	Will there be exams? If so, during what date?	You will be asked to do a midterm and a final. The midterm is in approximately two weeks and the final will be at the end of the quarter.
	Are the midterm and final at a specific date or is it like the homework and once you're done u arrange a time with ur ta?	You will have a window of time in which to complete the exam and meet with your TA, more like homework.
	Is the midterm/final multiple choice or do we write code? Alright, sounds good!	The questions are similar to the questions we go over in section (combination of short answer and programming).
	What exactly are strings and are they expected to be used in HW 4?	A String object stores a sequence of characters. They will be used in homework 5.
	Is there a chart on the slides for codes to use console with? Because im confused with how console works or how to use it Thank you!	The lecture slides for 1/25 cover the console Scanner: https://courses.cs.washington.edu/courses/cse142/21wi/lectures/09-ch03-3-scanner.pdf
	If you assign an object to another object, will they still be different objects?	We store references to objects. You can make a copy of such a reference in which case you have two references to the same object.
	Are there office hours available on the weekends?	No, but you can email your individual TA to see if they might be available.
