

CSE142 Lecture Questions for Wednesday, 2/17/21, section A

Time (e.g., 12:45)	Question	Answer
		<p>Be sure to watch the spring 2020 version because the audio was not captured properly today:</p> <p>https://uw.hosted.panopto.com/Panopto/Pages/Viewer.aspx?id=36d3c20b-e724-4c02-a436-ab8c0165d5c6</p>
	<p>When you use <code>\t</code>, does it matter what jGrasp's tab size is set to? For example if I use <code>\t</code> in the homework, will it still match the desired output?</p>	<p>It depends what you mean. The program will run fine either way, but the jGRASP setting will alter how it is displayed.</p> <p>You should never use tabs for homework output.</p>
	<p>Will the "compare to web file" for the homework work now? It says on the 2020 lecture that it doesn't</p>	<p>It is ready.</p>
	<p>Is there an easy explanation for why not to use token and line in the same scanner?</p>	<p>It's confusing because you have to understand the details of how each of them deal with whitespace and other details as well.</p>
