

CSE 143x Section Handout #4 Solutions

1.

```
public static void boyGirl(Scanner input) {
    int boys = 0;
    int girls = 0;
    int diff = 0;    // difference between boys' and girls' sum

    while (input.hasNext()) {
        String throwAway = input.next(); // throw away name
        if (boys == girls) {
            boys++;
            diff -= input.nextInt();
        } else {
            girls++;
            diff += input.nextInt();
        }
    }
    System.out.println(boys + " boys, " + girls + " girls");
    System.out.println("Difference between boys' and girls' sums: " + Math.abs(diff));
}
```

or

```
public static void boyGirl(Scanner input) {
    int boys = 0;
    int girls = 0;
    int people = 0;
    int boySum = 0;
    int girlSum = 0;

    while (input.hasNext()) {
        String throwAway = input.next(); // throw away name
        people++;
        if (people % 2 == 1) {
            boys++;
            boySum += input.nextInt();
        } else {
            girls++;
            girlSum += input.nextInt();
        }
    }
    int diff = Math.abs(boySum - girlSum);
    System.out.println(boys + " boys, " + girls + " girls");
    System.out.println("Difference between boys' and girls' sums: " + diff);
}
```

2.

```
public static void evenNumbers(Scanner input) {
    int count = 0;
    int evens = 0;
    int sum = 0;
    while (input.hasNextInt()) {
        int number = input.nextInt();
        count++;
        sum += number;
        if (number % 2 == 0) {
            evens++;
        }
    }
    double percent = 100.0 * evens / count;
    System.out.println(count + " numbers, sum = " + sum);
    System.out.printf("%d evens (%.2f%%)\n", evens, percent);
}
```
