HOMEWORK 5: SUPPLEMENTARY HTML TAGS

# Slider

```
<input id="slider" type="range" min="0" max="24" step="3" /> HTML
```

```
document.getElementById("slider").onchange = example;

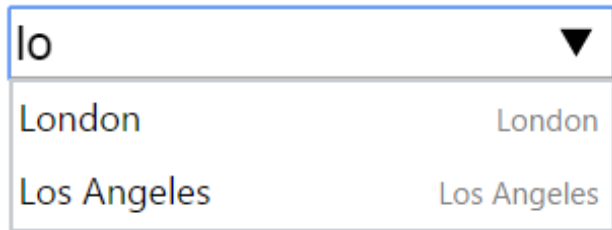

Function example() {
    alert(this.value);    // alerts the current value of the slider
}
JS
```

- a type of input
- to react to the movement of a slider attach an onchange listener to it

# datalist

```
<input id="citiesinput" list="cities">  
<datalist id="cities">  
  <option>Seattle</option>  
  <option>Portland</option>  
</datalist>
```

HTML

A screenshot of a text input field with a dropdown menu. The input field contains the text "lo" and a downward-pointing triangle icon. The dropdown menu is open, showing two suggestions: "London" and "Los Angeles". Each suggestion is displayed in two columns, with the first column being larger than the second.

- a list of autocomplete options for a text input
