## CSE 311: Foundations of Computing I

## Section : CFGs \& FSMs Solutions

## 0. CFGs

Construct CFGs for the following languages:
(a) All binary strings that end in 00 .

## Solution:

$$
\mathbf{S} \rightarrow 0 \mathbf{S}|1 \mathbf{S}| 00
$$

(b) All binary strings that contain at least three 1's.

## Solution:

$$
\begin{aligned}
\mathbf{S} & \rightarrow 0 \mathbf{S} \mid 1 \mathbf{T}_{1} \\
\mathbf{T}_{1} & \rightarrow 0 \mathbf{T}_{1} \mid 1 \mathbf{T}_{2} \\
\mathbf{T}_{2} & \rightarrow 0 \mathbf{T}_{2} \mid 1 \mathbf{T}_{3} \\
\mathbf{T}_{3} & \rightarrow 0 \mathbf{T}_{3}\left|1 \mathbf{T}_{3}\right| \varepsilon
\end{aligned}
$$

(c) All binary strings with an equal number of 1 's and 0 's.

## Solution:

$$
\begin{gathered}
\mathbf{S} \rightarrow 0 \mathbf{S} 1 \mathbf{S}|1 \mathbf{S} 0 \mathbf{S}| \varepsilon \\
\mathbf{S} \rightarrow \mathbf{S S}|0 \mathbf{S} 1| \mathbf{S} 0 \mid \varepsilon
\end{gathered}
$$

## 1. DFAs, Stage 1

Construct DFAs to recognize each of the following languages. Let $\Sigma=\{0,1,2,3\}$.
(a) All binary strings.

## Solution:

(b) All strings whose digits sum to an even number.

## Solution:

(c) All strings whose digits sum to an odd number.

## Solution:

## 2. DFAs, Stage 2

Construct DFAs to recognize each of the following languages. Let $\Sigma=\{0,1\}$.
(a) All strings which do not contain the substring 101.

## Solution:

(b) All strings containing at least two 0 's and at most one 1 .

Solution:

(c) All strings containing an even number of 1 's and an odd number of 0 's and not containing the substring 10.

## Solution:
