## CSE 311: Foundations of Computing I

## Section 1: Logic Solutions

## 0. Exclusive Or

For each of the following, decide whether inclusive-or or exclusive-or is intended:
(a) Experience with C or Java is required.

## Solution:

Inclusive Or.
(b) Lunch includes soup or salad.

## Solution:

Exclusive Or.
(c) Publish or perish

## Solution:

Exclusive Or.
(d) To enter the country you need a passport or voter registration card.

## Solution:

Inclusive Or.

## 1. Translations

For each of the following, define propositional variables and translate the sentences into logical notation.
(a) I will remember to send you the address only if you send me an e-mail message.

## Solution:

$$
\begin{aligned}
& p: I \text { will remember to send you the address } \\
& q: \text { You send me an e-mail message } \\
& \qquad p \rightarrow q
\end{aligned}
$$

(b) If berries are ripe along the trail, hiking is safe if and only if grizzly bears have not been seen in the area.

## Solution:

$$
\begin{aligned}
& p: \text { Berries are ripe along the trail } \\
& q: \text { Hiking is safe } \\
& r: \text { Grizzly bears have been seen in the area }
\end{aligned}
$$

$$
p \rightarrow(q \leftrightarrow \neg r)
$$

(c) Unless I am trying to type something, my cat is either eating or sleeping.

## Solution:

$$
\begin{aligned}
& p: \text { My cat is eating } \\
& q: \text { My cat is sleeping } \\
& r: \text { I'm trying to type }
\end{aligned}
$$

$$
\neg r \rightarrow(p \oplus q)
$$

## 2. Teatime

Consider the following sentence:
If I am drinking tea then I am eating a cookie, or, if I am eating a cookie then I am drinking tea.
(a) Define propositional variables and translate the sentence into an expression in logical notation.

## Solution:

$$
\begin{aligned}
& p: \text { I am drinking tea } \\
& q: \text { I am eating a cookie } \\
& (p \rightarrow q) \vee(q \rightarrow p)
\end{aligned}
$$

(b) Fill out a truth table for your expression.

## Solution:

| $p$ | $q$ | $(p \rightarrow q)$ | $(q \rightarrow p)$ | $(p \rightarrow q) \vee(q \rightarrow p)$ |
| :---: | :---: | :---: | :---: | :---: |
| T | T | T | T | T |
| T | F | F | T | T |
| F | T | T | F | T |
| F | F | T | T | T |

(c) Based on your truth table, classify the original sentence as a contingency, tautology, or contradiction.

## Solution:

Tautology

## 3. Truth Tables

Write a truth table for each of the following:
(a) $(p \oplus q) \vee(p \oplus \neg q)$

## Solution:

| $p$ | $q$ | $p \oplus q$ | $p \oplus \neg q$ | $(p \oplus q) \vee(p \oplus \neg q)$ |
| :---: | :---: | :---: | :---: | :---: |
| T | T | F | T | T |
| T | F | T | F | T |
| F | T | T | F | T |
| F | F | F | T | T |

(b) $(p \vee q) \rightarrow(p \oplus q)$

## Solution:

| $p$ | $q$ | $p \vee q$ | $p \oplus q$ | $(p \vee q) \rightarrow(p \oplus q)$ |
| :---: | :---: | :---: | :---: | :---: |
| T | T | T | F | F |
| T | F | T | T | T |
| F | T | T | T | T |
| F | F | F | F | T |

(c) $p \leftrightarrow \neg p$

Solution:

| $p$ | $\neg p$ | $p \leftrightarrow \neg p$ |
| :---: | :---: | :---: |
| T | F | F |
| F | T | F |

## 4. Circuitous

Translate the following circuit into a logical expression.

Solution:
$\neg(\neg p \vee(p \wedge \neg q))$
