

```
Kruskal's Algorithm in C
Forest Kruskal_MST( Graph g, int n, double **costs ) {
   Forest T;
   Queue q;
   Edge e;
   DisjSet S = InitializeSet( g );
   T = ConsForest(g);
   q = BuildHeap( g, costs );
   for(i=0;i<(n-1);i++) {</pre>
       do {
          e = DeleteMin(q); // e = (u,v)
       } while ( (Find(u,S) == Find(v,S)) );
       AddEdge( T, e );
       Union(S, u, v);
   }
   return T;
             }
