

## CSE 331: Software Design & Implementation

### Section 3 – ADTs

Write two different representations for the Rectangle ADT in the starter code below, including **abstraction functions** for each representation.

Write your class specification below

```
/*
```

```
*/
```

```
public class Rectangle {
```

```
    Your fields for your representation go below
```

```
}
```

Write your class specification below  
/\*

\*/  
**public class Rectangle {**  
    Your fields for your representation go below

}
