

Formatting Writeups with Markdown

Each project write-up is submitted as a **Markdown** file which will be viewed on **GitLab**. This means that all features of **GitLab Flavored Markdown** will work in your write-up files.

The main formatting feature you'll use is **images**.

To insert an image into your write-up:

- (a) Save your image in the same folder as WriteUp.md.
- (b) Add the text `` to the line in your WriteUp.md where you want to insert the image.
- (c) Commit and push both the image and the updated WriteUp.md to GitLab.
