1. P & NP Membership

2. P & NP Membership

For problems A and B below, show that they belong to both P and NP. Show that problem C belongs to NP.

a) Problem A: Given a list of 2-dimensional points, return true or false to indicate

| Belongs to P | | | | | |

| a) | How do you show that a problem belongs to NP-Hard |

5. Practice

| If A polynomia | al-time reduces to B ar | nd B is NP-Hard then A is NP-Hard. |
|----------------------------------|---|--|
| | True | False |
| If B is NP-Har | d and there exists a p | olynomial time algorithm for B, then P=NP. |
| | True | False |
| If B is NP-Har equal NP. | d and there does not e | exist a polynomial time algorithm for B, then P does not |
| | True | False |
| If A reduces to then C is NP- | - | , and B reduces to C in polynomial time, and A is NP-Hard, |
| | True | False |
| | o B in polynomial time , then C is NP-Comple | , and B reduces to C in polynomial time, and A is ete. |
| | True | False |
| If A reduces to then C is EXP | | , and B reduces to C in polynomial time, and A is in EXP, |
| | True | False |
| If A reduces to C is P. | o B in polynomial time | , and B reduces to C in polynomial time, and A is in P, then |
| | True | False |
| If A reduces to C is in P, then | • • | , and B reduces to C in polynomial time, and A is in NP, and |
| | True | False |
| | B in polynomial time C is in P, then P=NP. | , and B reduces to C in polynomial time, and A is in |
| | True | False |
