

# CSE 390Z: Mathematics for Computation Workshop

---

## QuickCheck: Predicate Logic (due Monday, January 22)

Please submit a response to the following questions on Gradescope. We do not grade on accuracy, so please submit your best attempt. You may either typeset your responses or hand-write them. Note that hand-written solutions must be legible to be graded.

We have created [this template](#) if you choose to typeset with Latex. [This guide](#) has specific information about scanning and uploading pdf files to Gradescope.

### 0. English to Logic Translation

Translate the following English statements to predicate logic:

**Domain of Discourse:**  $D := \text{"Mammals"}$

**Predicates:**

$Walks(x, y) := \text{"}x \text{ walks } y\text{"}$   
 $Dog(x) := \text{"}x \text{ is a dog"}$   
 $Human(x) := \text{"}x \text{ is a human"}$   
 $Friends(x, y) := \text{"}x \text{ and } y \text{ are friends"}$

- (a) Humans are not friends with each other.  
*Note that this means a human is also not friends with their self*
- (b) All humans are friends with the dogs that they walk.
- (c) Every human walks exactly one dog.

### 1. Video Solution

Watch [this video](#) on the solution **after** making an initial attempt. Then, answer the following questions.

- (a) What is one thing you took away from the video solution?
- (b) What topic from the quick check or lecture would you most like to review in workshop?
