

CSE 390Z: Mathematics for Computation Workshop

Resubmissions

Instructions

Over the last three weeks of the quarter, we'll give you opportunities to (re-)submit 390z assignments you didn't get credit for the first time. Here's the process:

- Redo an assignment you didn't get credit for. If you submitted, and didn't get credit the first time, make sure you read the feedback to see what you were missing.
- Shortly before the deadline of the first cycle, **all** boxes on gradescope will be reopened; submit to the original box of the assignment.
- Then, fill out the google form (linked on the webpage) to let us know which box you submitted to (that helps make sure we don't miss any of the resubmissions).
- TAs will grade the new version by the day of the next workshop. You get the highest grade
- You may resubmit only one assignment per week.
- Resubmission slots apply to quick checks and skill assessments. They are not a way to make up attendance (though we may be able to suggest other accommodations—contact the staff if you think you need that).

Resubmission due dates will be the last three weeks of the quarter:

- Tuesday May 19, 9 AM
- Tuesday May 26, 9 AM
- Tuesday June 2, 9 AM
