

CSE 403

Project Proposals, Q&A

Group formation

- Who is not tripled up into a group?
- Is there a group that has not sent me an email?
- Any group has less than 3 people?
- If your group doesn't turn in a proposal on Friday, we don't know that you exist

Progress

- Anyone want to share an early look?
- What you should be thinking about:
 - Vision
 - What will your project accomplish?
 - What's the Minimum Viable Product?
 - What's the appropriate "scope" for your project
 - What's your toolchain and runtime (early assessment)?
 - Application flow diagrams?

Logistics

- Turn in using Catalyst Dropbox by 12:59AM 9/28/12
- Recommend: 1 presenter talks, others support (drive the slide demo)
- 3 minute presentation. 4 - 6 slides
- Practice! (Read the hints)
- Don't forget the written doc -- allows you go into details that the 3 minute preso doesn't

Class communication

- Website (www.cs.washington.edu/403) -- links offsite to www.uwcse403.com
- Go Post for forums
- Email, twitter (@uwcse403)
- Anonymous feedback on Catalyst
- TA's will be pretty involved in your projects
- I'm happy to chat in office hours and by appointment
