HobbySwap: Connecting Hobbyists To Trade Knowledge/Lessons

**"I play piano
and want to
learn coding."**

**"I know coding
and want to
learn piano."**

HobbySwap: Connecting Hobbyists To Trade Knowledge/Lessons

- Hobbies are great, everyone should have at least one.
- People want to learn a new skill, but don't want to pay for overpriced lessons or useless "how to" books.
- HobbySwap lets users list their own hobbies and skills they want to learn, and matches compatible partners.

Proposed Minimum Viable Product

- Users should be able to register a profile with their hobbies.
- Users should be able search search for other people by desired hobby.
- Service should find matching users by hobbies.
- Users should be able to communicate with each other.

Proposed Technical Details

- HTML/CSS/JS frontend
- Python/Django web app/site backend.
- MySQL or PostgreSQL data store.
- Facebook for authentication?
- Deploy using heroku?
