

# **Insta-Feed**

*Connecting your social media needs*

Kevin Tang, Chee Wei Tang, Hampton Terry

# One stop access to your social media

---

Instagram

Insta -Feed

# Proposed Minimal Viable Product

---

- User logs into our site and creates a profile with their credentials to their social media sites.
- Ability to view live feed updates from the multiple sites in one location.
- Support Facebook and Twitter initially.  
Adding more social media sites in the future.

# Future Enhancements

---

- Be able to select a subset of feeds to view at any given point.
- Be able to post content from Insta-Feed back to the social media sites.
- Allow users to view multiple accounts from the same site.
- Links together your friends profiles from different social media sites.
- Support for Insta-Feed on mobile devices.

# Implementation

---

- HTML/CSS/JavaScript front end
- Python/Django backend
- Postgres for data store
- API's from social media sites to access feeds.

*JavaScript*

**django**

PostgreSQL
