

# Web Crawler/Annotator

By: Harshad Petwe (hsp3), Nolan Cash (nolanac), Cassius Butcher (cbutcher), and Tyler Oshiro (tyoshiro)

# What Does it Do?

- Crawl predetermined international news websites
- Examine metadata of articles
- Build database storing the news data
- Allow for efficient SQL sorting and searching

# Challenges

- Integrating with the already established KNOW database
- Efficiently and successfully crawling many news articles
- Constructing the database
