

THE PROBLEMS

Stock markets are really complicated

Markets move way faster than people

You are not The Wolf of Wall Street

But...

THE PROPOSAL

Quick analysis of search trends will predict market movement before it happens

People are bad at this—Computers are not

We will create a way to graph, chart, and analyze search trend data as it pertains to the stock market

THE REALITY

A lot of this information isn't readily available

Only a few APIs available for market interaction

Still...

All of this is absolutely achievable within the scope of this class
