

# OneDrinkAway

Andrea Martin (mieko101) and

Nicole Kihara (kiharank)

# Vision

## Why?

- Get drink suggestions that actually suit you
- Try something new

## Features

- Provides cocktail suggestions based on your personal taste preferences
- Drink recipes that are searchable by category and ingredient
- Favorites list which can suggest more cocktails based on your favorite drinks

# Architecture & Risks

## Architecture

- Cocktail database called cocktaildb
- Android SDK
- Android Framework
- SQLite for our cocktail database containing categorized drinks

## Risks

- A uniform way to categorize each drink based on its flavor profiles
- Need team members experienced with databases and Android
- Need efficient algorithm for deciding drinks to recommend
