Vision and Features

Problem

- UW time schedule is awful
- Must search multiple places for information about classes

Solution – Desktop Application

- Only display relevant information
- Group everything in one place
 - course information
 - professor ratings
- Provide quick, comprehensive class comparisons

The screenshot shows the EZTimeTable application interface. It includes a search bar for 'Field of Study', a list of course options on the left, and a main area displaying details for selected courses (CSE 142, CSE 331, CSE 333). The main area shows lecture and section information, and a table of course catalog ratings. At the bottom, there is a table of instructor ratings.
