# Use Cases

- People with unexpected free time
  - Cancelled date
  - Finished project
- Travellers
  - Party with locals
- Single people
  - Find like-minded people
  - Connect via app

# Application Architecture & Challenges

## Back End:

1. User login FB API
2. Google Maps API
3. FB data into Map
4. User interacts w/ EM

## Front End:

- Map w/ listings controlled by 'Search Filters'
- Event
- User Profile
- Settings

## Challenges:

1. Duplicates
2. Accuracy
3. Spam
4. Scope

We want people to use us  
and only  
us!
