

Story Teller:

Sell a Story, Not a BOOK

Yina Zhu (yinazhu@cs.washington.edu)

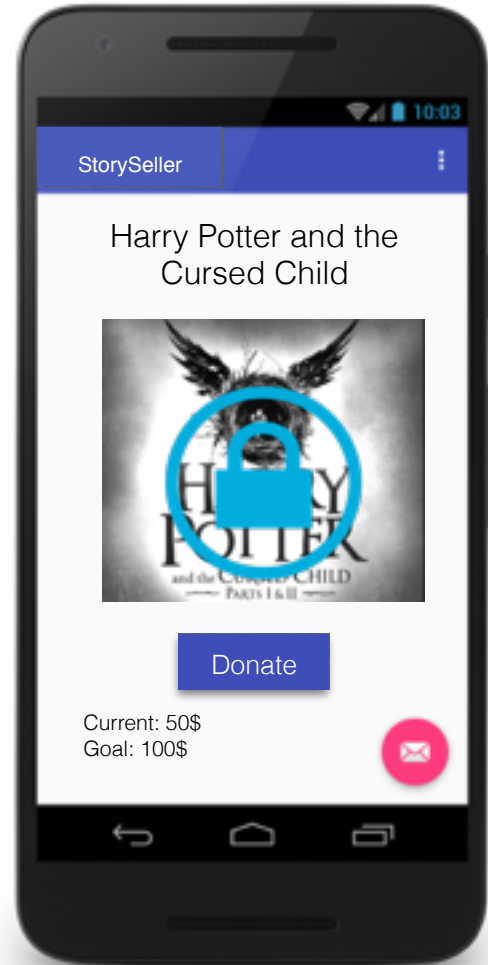

Rakib Mirza (rakibm@cs.washington.edu)

Vision

There is a lot of talent on the internet. And often fan-created content or amateur content gets no compensation for their work.

We wanted to focus on stories. And provide a way for amateurs to publish and be crowd-funded.

On our app, people will be post a story. They will then ask for a certain amount from the crowd. Once the funds are raised the story will be available to read for the everyone.

Logistics

Android App Using Amazon Cloud Service and PayPal API

Concerns:

Lack of knowledge about the existing Book Publishing space

Integrating different tools together.
