

Drive In Turns

...

Ziyao Huang
Tong Shen

Drive In Turns is a ride-sharing phone APP that pairs up drivers and riders for carpools.

Each logged in user can choose to search partner as a driver or a rider depends on the user's plan for that day.

But if you think this is just another duplication of Uber, you are **WRONG**.

Drive In Turns is more than a taxi service APP

Our Idea

No money involved: MILES

Two types: one-time or constantly

Challenge:

Algorithm: pairing standard
