

Schema for Population, GDP, Airport

```
CREATE TABLE Population (rank INTEGER, country VARCHAR(30), population INTEGER, percentage FLOAT);  
CREATE TABLE GDP (rank INTEGER, country VARCHAR(30), gdp INTEGER);  
CREATE TABLE Airport (code VARCHAR(30), name VARCHAR(30), country VARCHAR(30));
```

Problems

- 1) What is the total population of earth?
- 2) What is the percentage of the population from the top 10 populated countries?
- 3) How many countries do have less than 1,000,000 populations?
- 4) What is the GDP ratio of the average top/bottom 10 countries?
- 5) Which country over 10 million has the biggest GDP per capita -- give country name and GDP?
- 6) Order the top 10 countries by total GDP in billion dollars
- 7) What percentage of the total GDP does USA have?
- 8) Top 10 countries with most international airports
- 9) Top 10 countries with most international airports per population -- give country name and number of airports
- 10) How many countries more than 1000 airports?
- 11) How many countries have airports?
