Final Presentation

Presenter's grades   (NAME: _____)
**   (NAME: _____)**

Try to split the 15 minutes roughly in half between the two people on your team who have not yet presented. Be sure this split falls at a logical transition in the presentation.

☐ Organization
- o ____ Discuss the overall problem & present your high level solution
- o ____ Show one of your video prototype tasks to set context of solution
- o ____ Give an overview of what you are going to discuss in rest of talk
- o ____ Describe 3 representative tasks and why you chose them
- o ____ Design evolution and why changes were made (w/ images)
          (i.e., contextual inquiry, low-fidelity testing evidence for changes)
- o ____ Current interface description (w/ images)
    - o ____ what does it do
    - o ____ how does it work
    - o ____ what is not yet implemented
- o ____ Demo of interactive prototype (may be spread throughout)
- o ____ Summary

☐ Presentation
- o ____ Use slides. Ensure that the presentation shows appropriate
          preparation and that visual aids are effective.
- o ____ Cover the required scope within the 15 minute time period. Practice
          and time your presentation.
- o Presenter:
    - o ____ makes eye contact
    - o ____ projects well
    - o ____ is dressed appropriately

☐ Representative Tasks
- o ____ Did they provide coverage of the functionality?
- o ____ Where the tasks too easy or too hard?

☐ User Interface
- o ____ Was the interface novel and creative?
- o ____ Was it appropriate for the supported tasks?
- o ____ Does it follow from the contextual inquiry and low-fidelity testing results?

☐ Presentation of Functionality
- o ____ Was enough presented to illustrate the representative tasks?
- o ____ Was enough presented to give a flavor of the interface?
- o ____ Was overall content appropriate given difficulty of interface ideas?
