Hall of Fame or Shame?

Page setup for printing in IE5

Hall of Shame!

Page setup for printing in IE5

- Page preview nice, but
- Problems
 - codes for header & footer information
 - requires recall!
 - want recognition
 - no equivalent GUI
 - help is the way to find out, but not obvious

Later Versions of IE Fix This

Hall of Fame or Shame?

Asiana Airlines interface for sending email or SMS from plane

Hall of Shame!

Asiana Airlines interface for sending email or SMS from plane

- Cool, but
 - text entry using this input device is VERY tedious
 - crashes often

USER INTERFACE DESIGN + PROTOTYPING + EVALUATION

Introduction & Course Overview *CSE 440: Introductory HCI*

Prof. James A. Landay
University of Washington

Autumn 2012
September 25, 2012

Who are We?

James Landay

- Professor in CSE at the University of Washington
 - formerly professor in EECS at UC Berkeley
 - spent 3 years as Director of Intel Labs Seattle
 - just finished 2.5 year sabbatical at Microsoft Research Asia
- Ph.D. in CS from Carnegie Mellon '96
- HCI w/ focus on informal input (pens, speech, etc.), web design (tools, patterns, etc.), & Ubiquitous Computing (UbiComp)
- Founded NetRaker, leader in web experience management (later sold to Keynote)
- Co-authored *The Design of Sites* with Doug van Duyné & Jason Hong
- Office Hours: Wed, 3-4 PM, 642 CSE & Mon 11 AM-12, Online
- Email: landay at cs.washington.edu

9/24/12

HCI: User Interface Design, Prototyping, and Evaluation

11

Nikki Lee

- M.S. student in HCDE at the University of Washington
- B.S. in ECE from Olin College 2010
- HCI w/ focus on interaction design, ubicomp, web
- Office Hours TBD
- Email: nblee at uw.edu

9/24/12

HCI: User Interface Design, Prototyping, and Evaluation

12

Kim Brown

- Undergraduate student in HCDE at the University of Washington
- Took CSE 440 last year
- Office Hours TBD
- Email: brownks at uw.edu

9/24/12

HCI: User Interface Design, Prototyping, and Evaluation

14

Human-Computer Interaction (HCI)

Human

- the end-user of a program
- the others they work or communicate with

Computer

- the machine program runs on
- split between clients & servers

Interaction

- user tells the computer what they want
- computer communicates results

User Interfaces (UIs)

- Part of application that allows people
 - to interact with computer
 - to carry out their task
- User vs. Customer vs. Client
 - user is a term only used by 2 industries → bad!
 - *customer* – person who will use the product you build
 - *client* – the company who is paying you to build it

HCI = design, prototyping, evaluation, & implementation of UIs

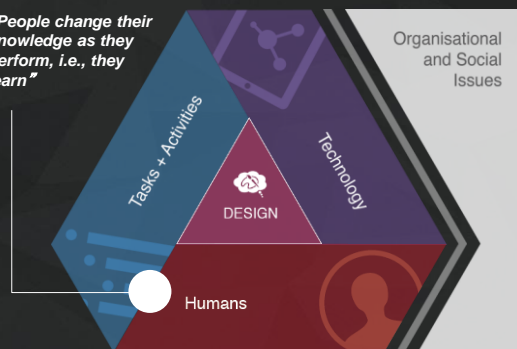

9/24/12

HCI: User Interface Design, Prototyping, and Evaluation

15

HCI Approach to UI Design

“People change their knowledge as they perform, i.e., they learn”

Why is HCI Important?

- Major part of work for “real” programs
 - approximately 50%
- Bad user interfaces cost
 - money
 - 5%↑ satisfaction → up to 85%↑profits
 - finding problems early makes them easier to fix
 - reputation of organization (e.g., brand loyalty)
 - lives (Therac-25)
- User interfaces hard to get right
 - people are unpredictable
 - intuition of designers often wrong

Who Creates UIs?

A team of specialists (ideally)

- graphic designers
- interaction / interface designers
- information architects
- technical writers
- marketers
- program managers
- test engineers
- usability engineers
- researchers (ethnographers, etc.)
- software engineers
- hardware engineers
- industrial designers
- customers

How to Design and Build Good UIs

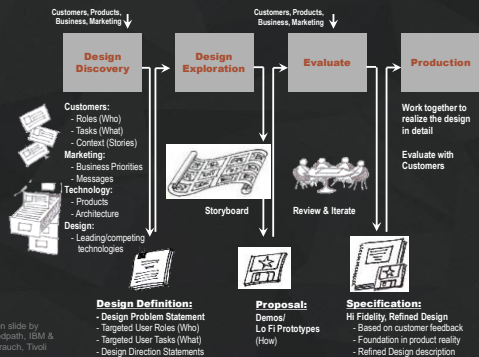

- UI Development process
- Usability goals
- User-centered design
- Design discovery
- Rapid prototyping
- Evaluation
- *Programming*

9/24/12

HCI: User Interface Design, Prototyping, and Evaluation

20

User Interface Development Process

Iteration

At every stage!

9/24/12

HCI: User Interface Design, Prototyping, and Evaluation

25

Design

Design is driven by requirements

- what the artifact is for
- not how it is to be implemented
- e.g., phone not as important as *mobile* app.

A design represents the artifact

- for UIs these representations include (7)
- screen sketches or storyboards
- flow diagrams/outline showing task structure
- executable prototypes
- representations simplify

Write essay
start word processor
write outline
fill out outline
Start word processor
find word processor icon
double click on icon
Write outline
write down high-level ideas

9/24/12

HCI: User Interface Design, Prototyping, and Evaluation

28

UI Design Representations

Flow / Site Maps

Storyboards

Schematics

Mock-ups

Usability(?)

According to the ISO:

The *effectiveness*, *efficiency*, and *satisfaction* with which specified users achieve specified **goals** in particular environments

This does not mean you have to create a “dry” design or something that is only good for novices – it all depends on your goals

9/24/12

HCI: User Interface Design, Prototyping, and Evaluation

26

Usability/User Experience Goals

- Set goals early & later use to measure progress
- Goals often have tradeoffs, so prioritize
- Example goals(?)
 - Learnable
 - faster the 2nd time & so on
 - Memorable
 - from session to session
 - Flexible
 - multiple ways to do tasks
 - Efficient
 - perform tasks quickly
 - Robust
 - minimal error rates
 - good feedback so user can recover
 - Discoverable
 - learn new features over time
 - Pleasing
 - high user satisfaction
 - Fun

9/24/12

HCI: User Interface Design, Prototyping, and Evaluation

26

User-centered Design “Know thy User”

- Cognitive abilities
 - perception
 - physical manipulation
 - memory
- Organizational / educational job abilities & skills
- Keep users involved throughout
 - developers working with target customers
 - think of the world in users terms
 - not technology-centered/feature driven

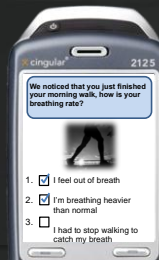

9/24/12

HCI: User Interface Design, Prototyping, and Evaluation

27

Design Discovery Task Analysis & Contextual Inquiry

- Observe existing work practices
 - augment with self-report tools (e.g., ESM)

28

Design Discovery Task Analysis & Contextual Inquiry

- Observe existing work practices
 - augment with self-report tools (e.g., ESM)
- Create examples & scenarios of actual use
- Discover tasks to design for
- Answer key questions about tasks & users
- “Try-out” new ideas before building software

9/24/12

HCI: User Interface Design, Prototyping, and Evaluation

29

Video Prototyping

- Illustrate how users will interact w/ system
- Unlike brainstorming...
 - video prototyping contracts the design space
- Quick to build
- Inexpensive
- Forces designers to consider details of how users will react to the design
- May better illustrate context of use

9/24/12

HCI: User Interface Design, Prototyping, and Evaluation

9/24/12 HCI User Interface Design, Prototyping, and Evaluation 31

Rapid Prototyping

Fantasy Basketball

- Build a mock-up of design so you can test
- Low fidelity techniques
 - paper sketches
 - cut, copy, paste
- Interactive prototyping tools
 - HTML, Visual Basic, Flash, DENIM, SketchFlow, Balsamiq, etc.
- UI builders
 - Expression Blend + Visual Studio, etc.

9/24/12 HCI User Interface Design, Prototyping, and Evaluation 33

Evaluation

- Test with real customers (participants)
 - w/ interactive prototype
 - low-fi with paper “computer”
- Build models
 - GOMS
- Low-cost techniques
 - expert evaluation
 - walkthroughs
 - online testing

9/24/12 HCI User Interface Design, Prototyping, and Evaluation 34

Goals of the Course

- 1) Learn to design, prototype, & evaluate UIs
 - the needs & tasks of prospective customers
 - cognitive/perceptual constraints that affect design
 - technology & techniques used to prototype UIs
 - techniques for evaluating a user interface design
 - importance of iterative design for usability
 - how to work together on a team project
 - communicate your results to a group
 - key to your future success
- 2) Understand where technology is going & what UIs of the future might be like

9/24/12 HCI User Interface Design, Prototyping, and Evaluation 35

Course Format

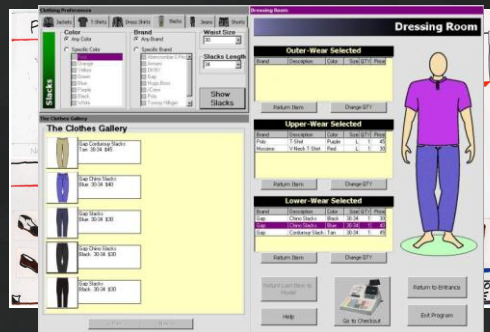

- Interactive lectures
- Quarter long project & homework
- Readings
- All material will be online
 - slides, exercises, readings, schedule
- Have fun & participate!

9/24/12 HCI User Interface Design, Prototyping, and Evaluation 36

Project Examples (cont.)

- *Clothes Shopper*
 - online shopping
 - knows your prefs & sizes

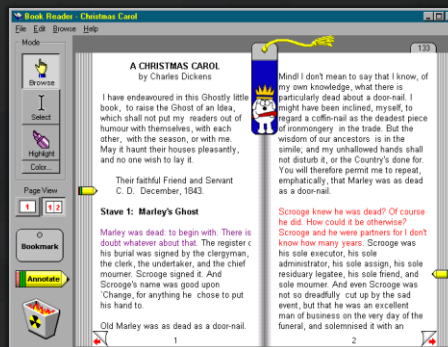

Clothes Shopper

Project Examples (cont.)

- *Electronic book reader*
 - take advantage of all the online texts on the net

Electronic Book Reader

Project Examples (cont.)

- *Nutrition tracker*

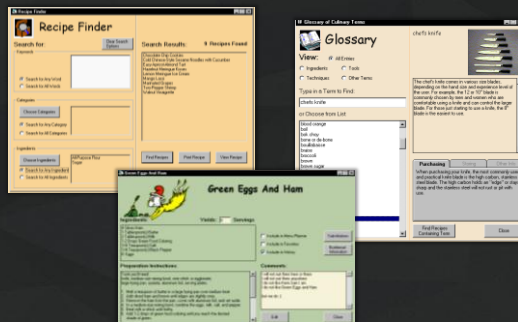

Nutrition Tracker

Project Examples (cont.)

- *cUIzine*
 – recipe tool for the home

cUIzine

Project Examples (cont.)

- *PDA Baseball score keeper*
 – have stats of the players on your PDA
 – keep track of what happens during the game
 – upload stats after the game

PDA Baseball Scorekeeper

Project Themes

- Mobile computing (e.g., phone)
- Projects should address one of the following briefs
 - Change
 - Transform your or your family's behavior
 - Past examples: fitness, sustainability, etc.
 - Crowd-sourced mobile AI
 - Use Mechanical Turk to give an application perfect vision, speech recognition, sorting data, etc.
 - Design two UIs: 1 for end-user and 1 for Turk worker
 - Creativity
 - Help people be more creative in their everyday live

9/24/12 HCI User Interface Design, Prototyping, and Evaluation 78

Books

- The Design of Sites by van Duyne, Landay, & Hong
 - online copies of the 4-5 chapters we will use
- We will also hand out other papers, give you web links, & refer to lecture slides
- Recommended textbooks
 - *Designing the User Interface: Strategies for Effective Human-Computer Interaction* by Shneiderman & Plaisant, 5th edition (2009)
 - order from Amazon.com (link off class web page)
- Other recommended books on web page

9/24/12

HCI: User Interface Design, Prototyping, and Evaluation

79

Assignments

- Individual
 - 3 written + in-class studio + one talk each
- Group
 - 6 written assignments
 - 4 presentation/demos with the write-ups + poster
 - all group work handed in on Web
 - group web site & blog

9/24/12

HCI: User Interface Design, Prototyping, and Evaluation

80

Grading

- A combination of
 - midterm (20%)
 - individual assignments & presentation (15%)
 - group project (60%)
 - demos/presentations/poster (group component)
 - project write-ups and exercises
 - ratings given by other team members & class
 - in class participation (5%)
- No curve
- No final (though late midterm)

9/24/12

HCI: User Interface Design, Prototyping, and Evaluation

81

Tidbits

- Late Policy
 - no lates on group assignments
 - individual assignments lose one letter grade/day
- Cheating policy
 - will get you an failing grade in the course

9/24/12

HCI: User Interface Design, Prototyping, and Evaluation

82

Administrivia

- Roll
- Waiting list for those who want to add
 - sort out after 1st week

9/24/12

HCI: User Interface Design, Prototyping, and Evaluation

83

Summary

- HCI an important part of most software produced today
- Getting the interface right is hard, but...
- Solution in *Iterative Design* including repeated cycles of
 - Design
 - Prototyping
 - Evaluation

9/24/12

HCI: User Interface Design, Prototyping, and Evaluation

84
