

USER INTERFACE DESIGN + PROTOTYPING + EVALUATION

# Design Exploration

Prof. James A. Landay  
 University of Washington

Autumn 2012

\* slides marked Buxton are courtesy of Bill Buxton, from his talk "Why I Love the iPod, iPhone, Wii and Google", remix uk, 18-19 Sept. 2008, Brighton

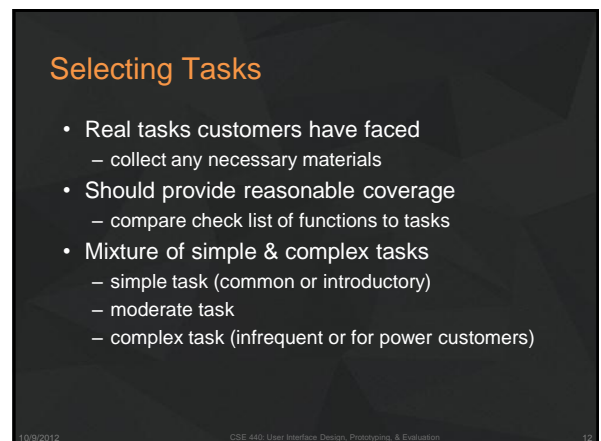

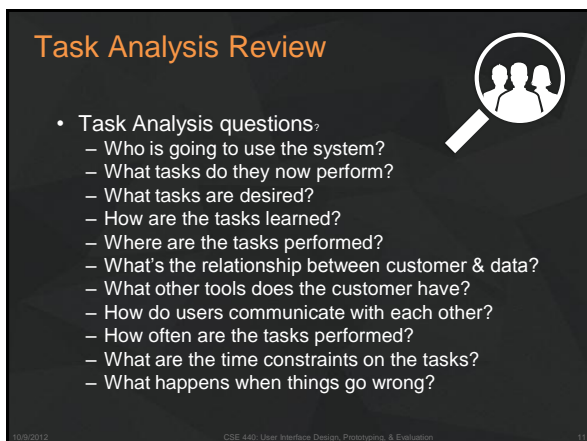

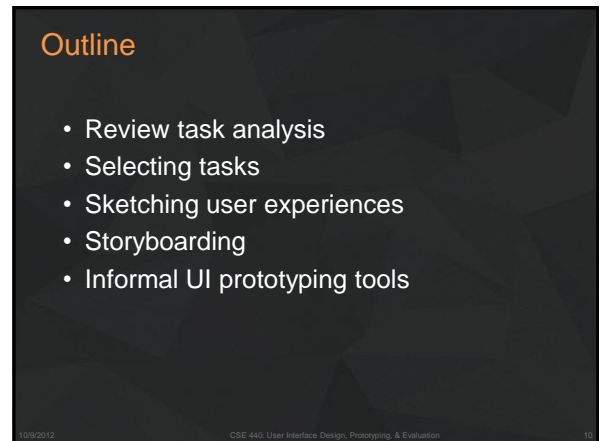

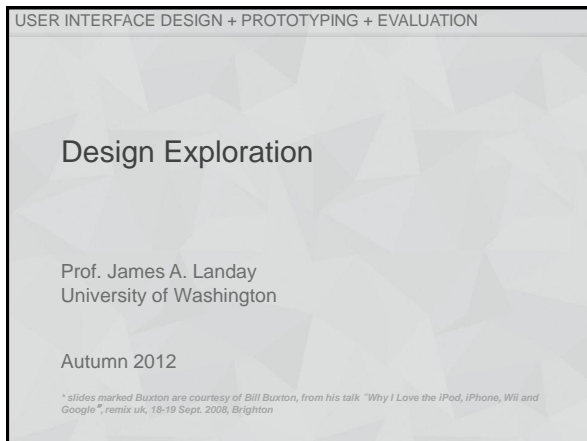

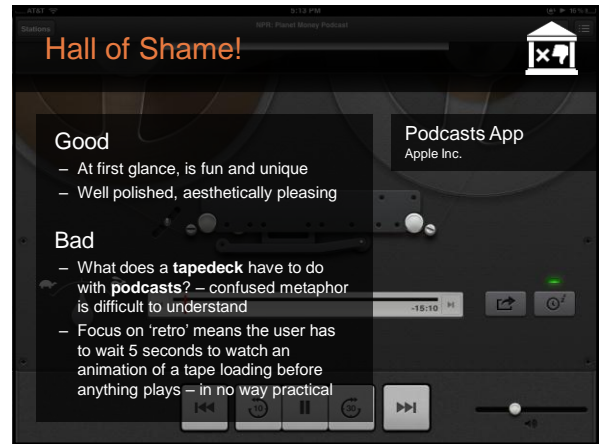

# Interface Hall of Fame or Shame?

Amtrak Web Site (US trains)

# Interface Hall of Fame/Shame!

Amtrak Web Site (US trains)

- Good
  - tells you what's wrong
  - gets your attention
- Bad
  - doesn't label where to fix issues
  - tells you that you made an error, because you didn't know their codes

## What Should Tasks Look Like?

- Say what customer wants to do, but not how
  - allows comparing different design alternatives

## What Should Tasks Look Like?

- Say what customer wants to do, but not how
  - allows comparing different design alternatives
- Be very specific – stories based on facts!
  - say who customers are (use personas or profiles)
    - design can really differ depending on who
    - name names (allows getting more info later)
    - characteristics of customers (job, expertise, etc.)
  - forces us to fill out description w/ relevant details
    - example: file browser story
- Some should describe a complete job
  - forces us to consider how features work together
    - example: phone-in bank functions

14

## Using Tasks in Design

- Write up a description of tasks
  - formally or informally
  - run by customers and rest of the design team
  - get more information where needed

Manny is in the city at a club and would like to call his girlfriend, Sherry, to see when she will be arriving at the club. She called from a friend's house while he was on BART, so he couldn't answer the phone. He would like to check his missed calls and find the number so that he can call her back.

CSE 440: User Interface Design, Prototyping, & Evaluation

15

## Using Tasks in Design (cont.)

- Rough out an interface design
  - discard features that don't support your tasks
    - or add a real task that exercises that feature
  - major screens & functions (not too detailed)
  - hand sketched
  - at *least 30 sketches* on the current assignment!
- Produce scenarios for each task
  - what customer has to do & what they would see
  - step-by-step performance of task
  - illustrate using storyboards
    - sequences of sketches showing screens & transitions

10/9/2012

CSE 440: User Interface Design, Prototyping, & Evaluation

16

## Scenarios (cont.)

- Scenarios are *design specific*, tasks aren't
- Scenarios force us to
  - show how various features will work together
  - settle design arguments by seeing examples
    - only examples → sometimes need to look beyond
- Show users storyboards
  - get feedback

17

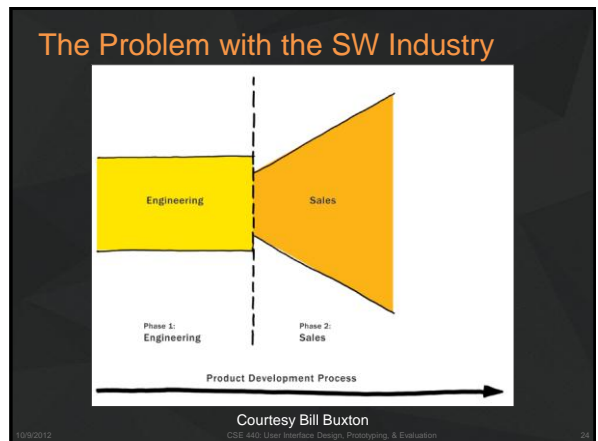

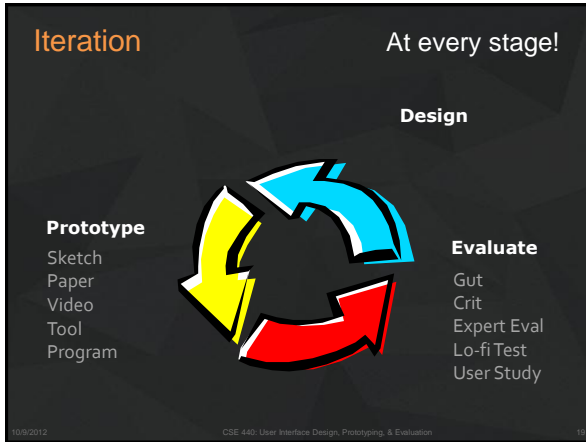

## Design Process: Exploration

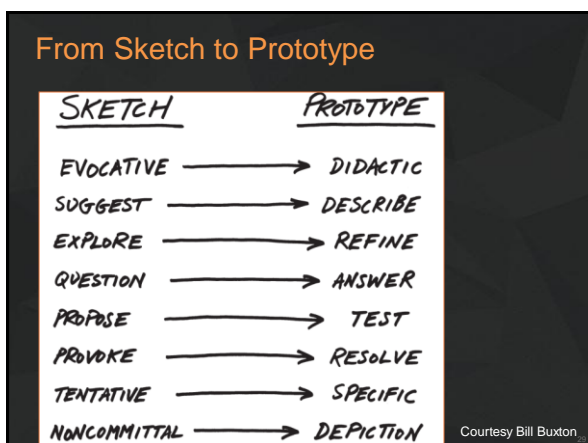

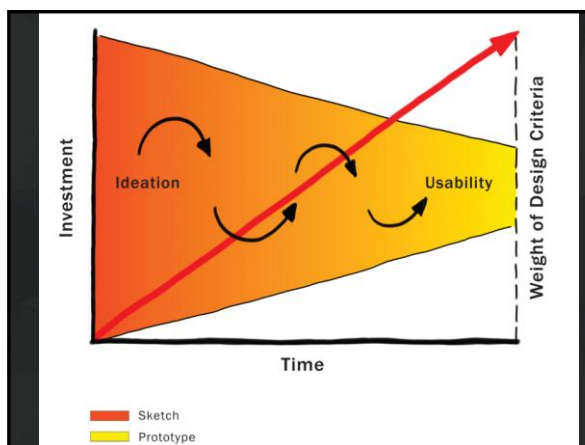

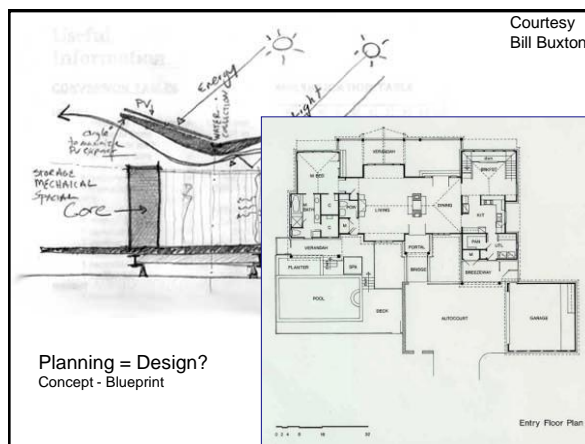

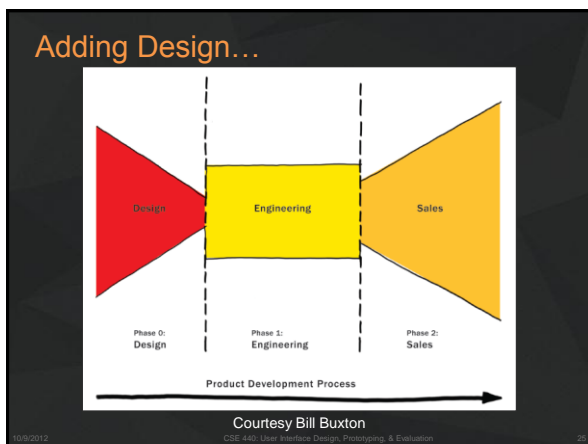

10/9/2012

CSE 440: User Interface Design, Prototyping, & Evaluation

18

- ### The Anatomy of Sketching
- Quick / Timely
  - Inexpensive / Disposable
  - Plentiful
  - Clear vocabulary. You know that it is a sketch (lines extend through endpoints, ...)
  - No higher resolution than required to communicate the intended purpose/concept
  - Resolution doesn't suggest a degree of refinement of concept that exceeds actual state
  - Ambiguous
- Courtesy Bill Buxton

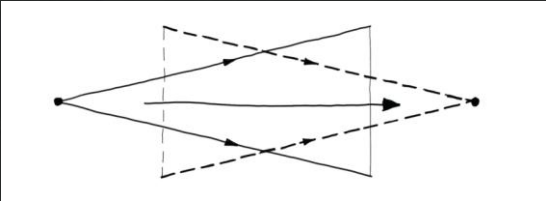

### Sketching in Interaction Design

- Analogous to traditional sketching
- Shares all of the same key attributes
- More feel than look
- Must accommodate time & dynamics
- Phrasing

10/9/2012 CSE 440: User Interface Design, Prototyping, & Evaluation Courtesy Bill Buxton

### Design as Choice

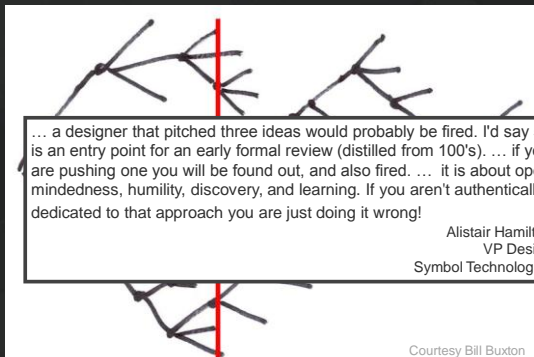

Elaboration Reduction

Courtesy Bill Buxton Laseau (1980)

10/9/2012 CSE 440: User Interface Design, Prototyping, & Evaluation

### Exploration of Alternatives

... a designer that pitched three ideas would probably be fired. I'd say 5 is an entry point for an early formal review (distilled from 100's). ... if you are pushing one you will be found out, and also fired. ... it is about open mindedness, humility, discovery, and learning. If you aren't authentically dedicated to that approach you are just doing it wrong!

Alistair Hamilton  
VP Design  
Symbol Technologies

Courtesy Bill Buxton

### Experience Design

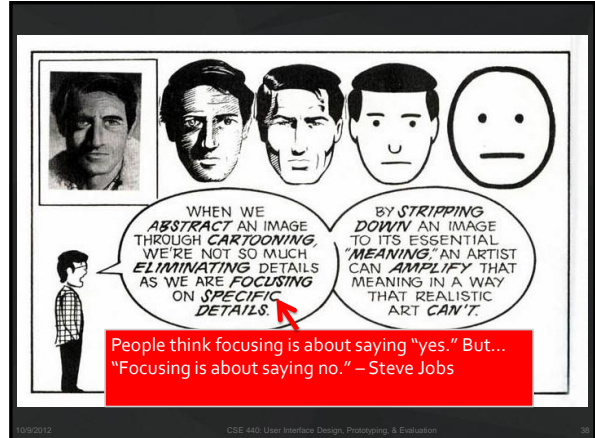

- Draw my phone
- Draw my phone's interface
- Draw the experience of using my phone
- Which is the true object of design?

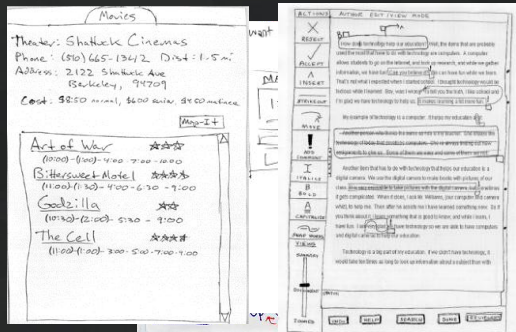

CSE 440: User Interface Design, Prototyping, & Evaluation Courtesy Bill Buxton

### Minimal Detail

Include only what is required to render the intended purpose or concept

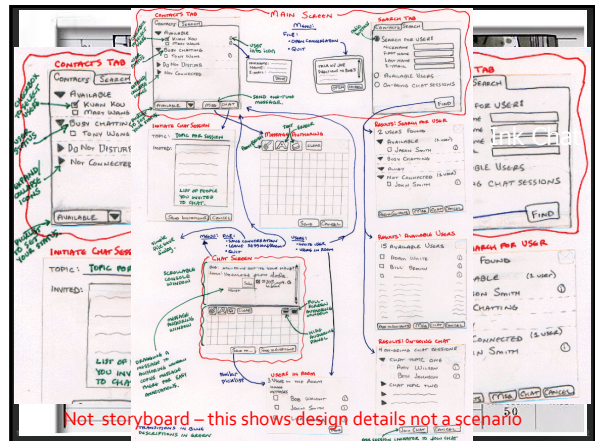

### Sketches & Storyboards

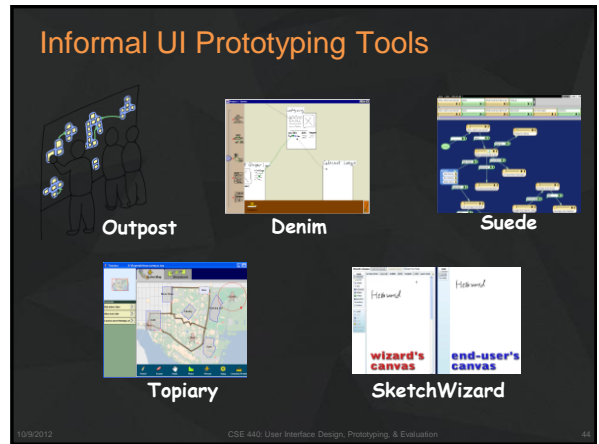

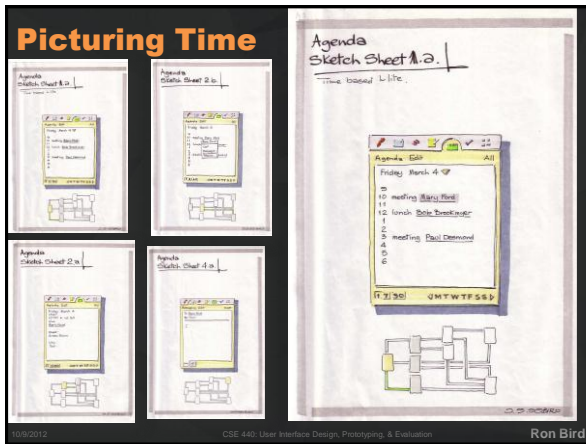

### Sketches & Storyboards

- Where do storyboards come from?
  - film & animation
- Give you a "script" of important events
  - leave out the details
  - concentrate on the important interactions

Not storyboard - this shows design details not a scenario

### Informal UI Prototyping Tools

- Support advantages of low-fi paper prototypes
  - brainstorming
    - consider different ideas rapidly
    - do not require specification of details
  - incomplete designs
    - need not cover all cases, just illustrate important examples
- Add advantages of electronic tools
  - evolve easily
  - support for “design memory”
  - transition to other electronic tools
  - allow end-user interaction

### Designers' Outpost:

A Tangible Interface for Designing Information Architectures

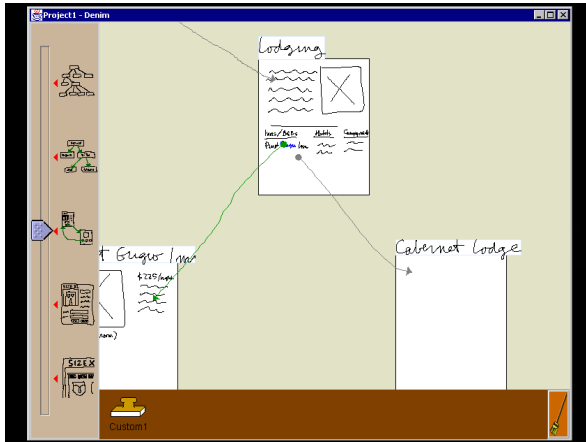

- Combines physical & virtual
  - physical post-its, virtual feedback
- Supports existing practice
  - affordances of paper
  - collaboration
  - large, persistent representation
- Adds advantages of e-media
  - editing, reuse, distribution
  - hand-off later to other tools

### DENIM:

Designing Web Sites by Sketching

- Early-phase navigation & interaction design
- Integrates multiple views
  - site map – storyboard – page sketch

## Low-fi Prototyping & Testing

Travelshare

## Summary

- Selecting tasks ?
  - real tasks with reasonable functionality coverage
  - complete, specific tasks of what customer wants to do
- Sketching allows exploration of many concepts in the very early stages of design
- As investment goes up, need to use more and more formal criteria for evaluation
- Informal prototyping tools bridge the gap between paper & high-fi tools

## Next Time

- Lecture
  - Sketching & Video Prototyping
- Watch Video in advance
  - Beaudouin-Lafon & MacKay
  - Sample videos from previous classes
- Readings
  - Beaudouin-Lafon & MacKay, pp. 1-22
  - Video Prototyping Examples
