**Pocket Doctor**
*Personal Health Data Management*

**Problem**
People with diabetes and heart problems must check their insulin and cardio-statistics daily. Doing this on paper is tedious and error-prone, and difficult to understand or give to a doctor!

**Key Features**
- Tracks your health in your pocket
- Reminds you to meet with doctor, self-check, or medicate
- Communicates with your doctor

**Prototype**
- Set health check reminder
- View health history
- Share data with doctor

**Design Iteration**
- Sketch
- Video Prototype
- Low-fi Prototype
- User Test
- Refined Lo-fi
