

You have some free time. Events you enjoy are going on right now. You don't even know about them. Until...

getOUT

doSOMETHING

Problem: People want to participate in events and activities in their community, but too often they don't know what is happening.

Solution: getOUT is the first application that provides each user with custom-tailored event lists. getOUT makes communicating with friends about events easy too and helps every individual find an interesting event, so they can **get out!**

Overview:

- Discover relevant, nearby events
- Filter events by *your* criteria
- Communicate with friends to find something to do together
- Share events that you plan on attending with friends

Design Iterations:

- Initial Sketches
- Video Prototype
- Low-Fidelity Prototype
- Interactive Prototype
