The Contextual Inquiry

Our target customer:

- Tech Savvy
- Moderately Affluent
- Subscribed to at least 5 services.

Demographics of our participants:

- 3 Female, 1 Male
- Two professionals, two students
- All involved in the tech industry and had > 5 subscriptions

Takeaways from the CI's

We found the following themes from our inquiries:

- Remembering what services you are subscribed to is hard.
- People wanted more insight into when they were being charged and what they were being charged. Charges were often a surprise.
- Cancelling/unsubscribing from a subscription when there isn't an online option is painful.

Our Original 6 tasks

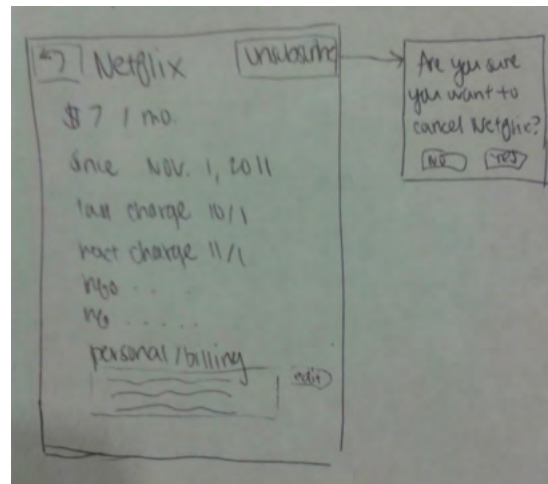

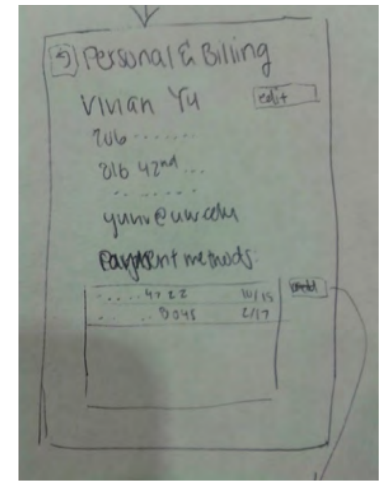

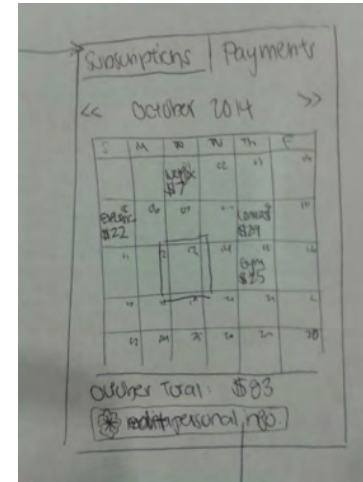

- Subscribe to or Add a recurring service
- Unsubscribe from or Delete a recurring service
- View every subscription you are currently subscribed to, along with prices and pay dates.
- Manage notifications from subscribed services (i.e. mandate that Netflix sends you an alert 5 days before it charges you)
- View financial and usage data from services; how much I use some service, and how much have I paid historically for it?
- Manage personal and billing information for various services

Design Sketches

Sketch #1

Tasks:

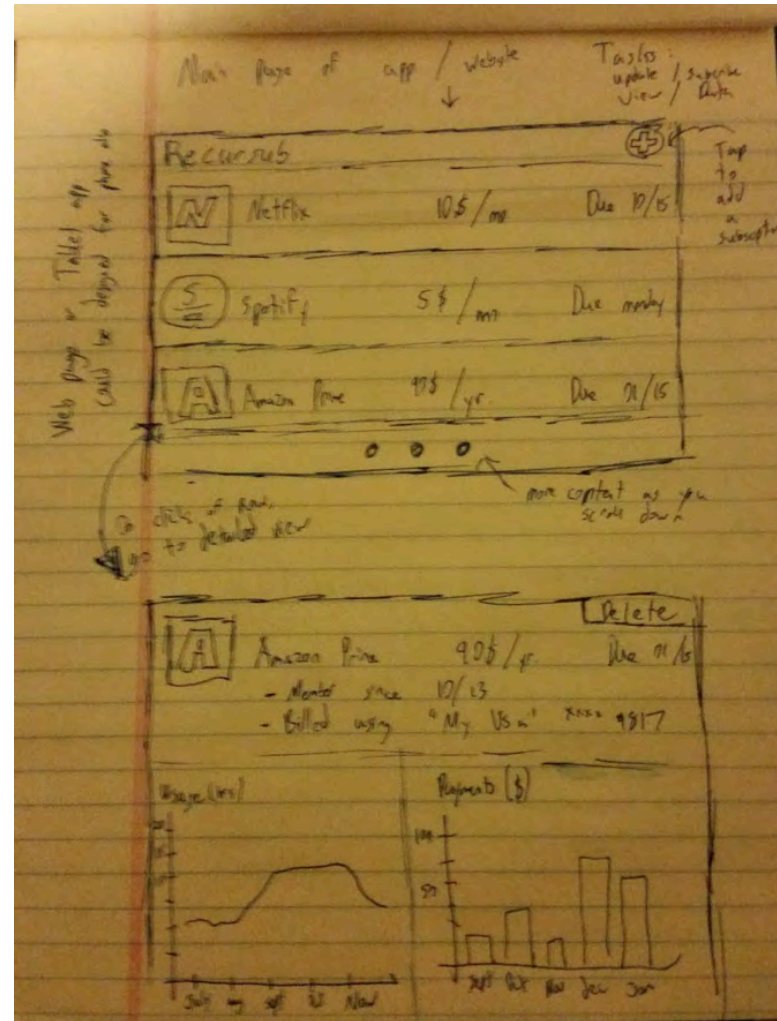

- View Subscriptions
- Delete Subscription
- Update Personal Info.
- Data on Subscription

Sketch #2

Tasks:

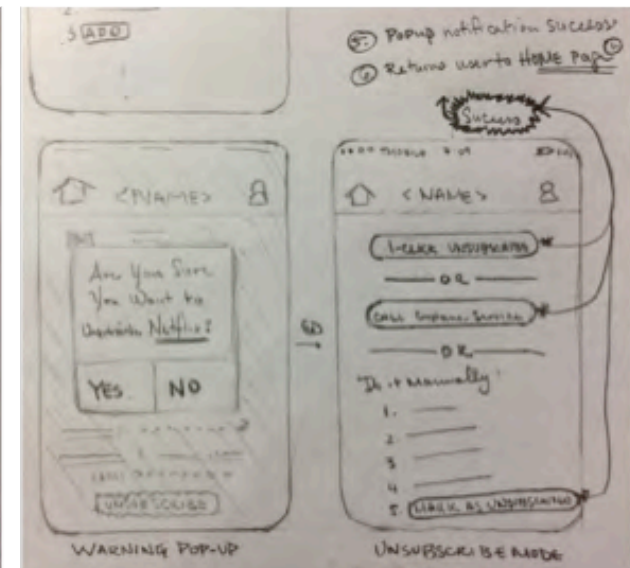

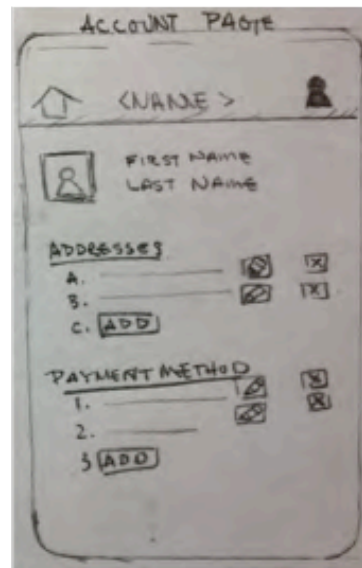

- Add Subscription
- View Subscriptions
- Delete Subscription
- Data on Subscription

Sketch #3

Tasks:

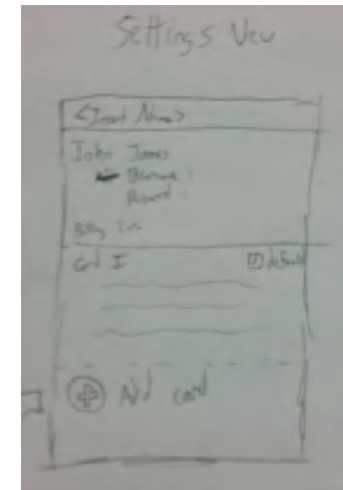

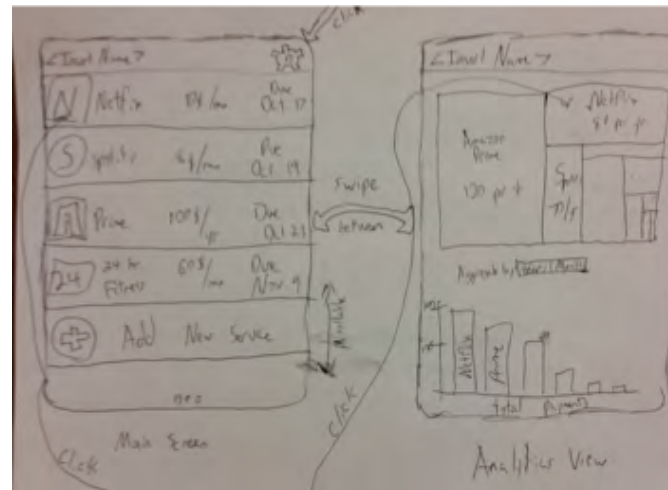

- View Subscriptions
- Delete Subscription
- Update Personal Info.
- Data on Subscription

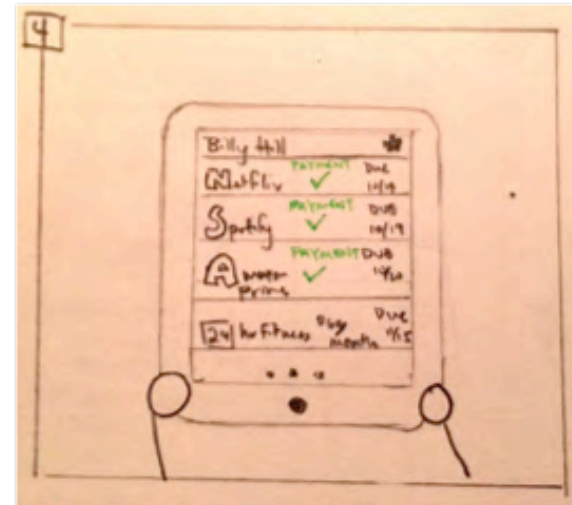

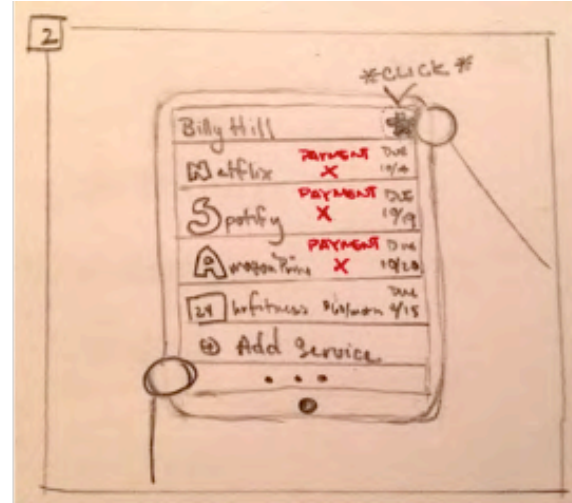

Updated Sketch

Two Tasks

- Recurring subscription management
- Insight and informed decisions

Storyboards

Summary

- It's okay to make assumptions during the design process.
- Initially didn't generate enough distinct designs (focus too similar)
- Should've brainstormed together instead of separately
