Jian Li Zheng  
Jeremy Viny

Team contract

# Team Responsibilities

Many of us have legitimate reasons to be away or be late

Be sure to communicate the reasons to us

Participation is an element of your grade (10%)

But your real commitment is to your team

Be sure you communicate your "aways" to your team

Be sure you manage your commitments

Let us know if there are issues

# Groups vs. Teams

Teams produce both **individual contributions and collective work-products**

Teams establish a social contract that relates to their purpose and guides and obligates how they must work together

“We hold ourselves accountable” is a strict requirement, whether or not a “boss” exists

# Groups vs. Teams

Teams differ fundamentally from working groups:

- teams require both individual and mutual accountability
- teams rely on more than group discussion, debate, and decision
- ... on more than sharing information and best practice performance standards
- teams produce discrete work-products through the joint contributions of their members
- this is what makes possible performance levels greater than the sum of all the individual bests of team members.

A team is more than the sum of its parts.

# Ways to Team Success

## Common commitment

requires a purpose in which team members believe

## Specific performance goals

comes directly from the common purpose

helps maintain focus, starts with something achievable

## A right mix of skills

technical/functional expertise (e.g., writing/visual/coding)

problem-solving & decision-making skills

interpersonal skills

## Agreement and mutual accountability

who will do particular jobs, when to meet & work, schedules

# Team development

## Forming stage

Team tend to communicate in indirect polite ways

## Storming stage

characterized by conflict

can be productive, but consumes time and energy

## Norming stage

formulate roles and standards

increases trust and communication

## Performing stage

you actually achieve your goals

highly task oriented

# Team development

## Forming stage

Team tend to communicate in indirect polite ways

## Storming stage

characterized by conflict

can be productive, but consumes time and energy

## Norming stage

formulate roles and standards

increases trust and communication

## Performing stage

you actually achieve your goals

highly task oriented

# Team development

## Forming stage

Team tend to communicate in indirect polite ways

## Storming stage

characterized by conflict

can be productive, but consumes time and energy

## Norming stage

formulate roles and standards

increases trust and communication

## Performing stage

you actually achieve your goals

highly task oriented

# Team Contracts

## Establishes individual accountability

- Individuals are usually motivated to maximize their own rewards and minimize their own costs (individualistic motives)
- Even if only one person minimizes their effort, others may reduce their efforts too
- May result in a dysfunctional team and poor quality of work

A team contract avoids such obstacles — at least when done well.

# Team Contracts

Establish procedures and roles

Can help jump-start a group's collaborative efforts by focusing team members on a definite task

Ensure everyone agrees on the quality of work they all wish to achieve (“we all want an A” or “we all want a WOW project”)

# Develop a Team Contract (15 minutes)

**In your group** discuss the first three weeks of your team work

What did you like about it?

What should you as a team improve in the future?

Use these talking points to fill out your team contract

(Find team contract examples [here!](#))

Submit a copy of it (as a PDF) via Canvas (one contract per group)

# Task Analysis

# Task Analysis

Focus on how do people accomplish a specific tasks

Helps identify the tasks that your solution must support

Helps to find effective ways of accomplishing a task

# Task Analysis

Use in combination with other user research methods

Task Analysis is a lens on the information you obtain through other user research methods

Your assignments order the two, but **in practice** you should iteratively decide how to best draw upon all relevant methods throughout a process

# Task Analysis Questions

Who is going to use the system?

What tasks do they now perform?

What tasks are desired?

How are the tasks learned?

Where are the tasks performed?

What is the relationship between people & data?

What other tools do people have?

How do people communicate with each other?

How often are the tasks performed?

What are the time constraints on the tasks?

What happens when things go wrong?

# Question 1

Who is going to use the system?

Identity

- In-house or specific customer is more defined

- Broad products need several typical consumers

Background

Skills

Work habits and preferences

Physical characteristics and abilities

# Task Analysis of a parking meter

# Task Analysis of a parking meter

Who is going to use the system?

# Task Analysis of a parking meter

**PARK, PAY & DISPLAY**  
Parking Pay Station Instructions

 Insert card and push **BLUE** button to buy time **OR** Insert coins to buy time

 Push **GREEN** button to print receipt

 Remove card quickly wait for receipt and display properly

 Display one receipt only to park in any meter or pay station space until your time expires

Use the removable backing to tape receipt to **INSIDE** of a front-seat side window

 **PARALLEL curbside**

 **ANGLE**

*driver's side*

 For **MOTORCYCLES**, tape to headlight cover

Questions? Call 684-ROAD (7623)  
paystations@seattle.gov

 **SDOT**  
Seattle Department of Transportation

**泊車、付款並顯示**  
泊車付費站使用說明

 插入卡並按 **藍色** 按鈕購買時間，或投入硬幣購買時間

 按綠色按鈕打印收據

 迅速將卡取出等候收據並適當顯示

 僅限顯示一張收據，以便在任何咪表或付費站的車位泊車，直到您的時間到期

請使用可剝離的背面，將收據貼在前座側車窗內側

 平行路側

 斜角

*司機座側*

 如果是摩托車，請貼在車頭燈罩上

有問題嗎？請致電 684-ROAD (7623)  
paystations@seattle.gov

 **SDOT**  
Seattle Department of Transportation

**ĐẬU XE, TRẢ TIỀN & DÁN BIÊN NHẬN**  
Hướng Dẫn về Trạm Trả Tiền Đậu Xe

 Đút thẻ vào và bấm nút **XANH** để mua giờ **HOẶC** Bỏ tiền các để mua giờ

 Bấm nút **XANH** để in biên nhận

 Rút nhanh thẻ ra chờ biên nhận và dán đúng cách

 Chỉ dán một biên nhận để đậu xe tại bất cứ chỗ nào có đồng hồ hoặc trạm trả tiền cho đến khi hết giờ đậu

Dùng miếng dán mặt sau có thể gỡ ra để dán biên nhận vào **MẶT TRONG** của kính bên trước

 **SONG SONG bờ lề**

 **GÓC**

*phía người lái*

 Đối với **XE GẮN MÁY**, dán vào chụp đèn trước

Thắc Mắc? Hãy gọi số 684-ROAD (7623)  
paystations@seattle.gov

 **SDOT**  
Seattle Department of Transportation

# Question 2 and 3

What tasks do they now perform?

What tasks are desired?

Important for both automation and new functionality

Relative importance of tasks?

Observe people, see it from their perspective

## Automated Billing Example

small dentists office had billing automated

assistants were unhappy with new system

old forms contained hand-written margin notes

e.g., patient's insurance takes longer than most

# Question 2 and 3

# Question 4

How are the tasks learned?

What does a person need to know to perform the task?

Do they need training?

academic

general knowledge / skills

special instruction / training

# Question 5

Where are the tasks performed?

Office, laboratory, point of sale?

Effects of environment on customers?

Are people under stress?

Confidentiality required?

Do they have wet, dirty, or slippery hands?

Soft drinks?

Lighting?

Noise?

# Question 6

What is the relationship between people & data?

## Personal data

- Always accessed at same machine?
- Do people move between machines?

## Common data

- Used concurrently?
- Passed sequentially between customers?
- Remote access required?
- Access to data restricted?
- Does this relationship change over time?

# Question 7

What other tools does a person have?

More than just compatibility

How customer works with collection of tools

Automating lab data collection example:

how is data collected now?

by what instruments and manual procedures?

how is the information analyzed?

are the results transcribed for records or publication?

what media/forms are used and how are they handled?

# Question 8

How do people communicate with each other?

Who communicates with whom?

About what?

Follow lines of the organization? Against it?

# Question 9

How often are the tasks performed?

Frequent use likely remember more details

Infrequent use may need more help

Even for simple operations,

Make these tasks possible to accomplish

Which function is performed

Most frequently?

By which people?

Optimizing for these will improve perception of performance

# Question 10

What are the time constraints on the tasks?

What functions will people be in a hurry for?

Which can wait?

Is there a timing relationship between tasks?

(Like the Target marketing for pregnancy case...)

# Question 11

What happens when things go wrong?

How do people deal with  
task-related errors?  
practical difficulties?  
catastrophes?

Is there a backup strategy?  
What are the consequences?

# Selecting Tasks

Real tasks people have faced or requested  
collect any necessary materials

Should provide reasonable coverage  
compare check list of functions to tasks

Mixture of simple and complex tasks  
easy tasks (common or introductory)  
moderate tasks  
difficult tasks (infrequent or for power use)

# What should tasks look like?

Say what **person** wants to do, but not how

allows comparing different design alternatives

Be specific, **stories** based in concrete facts

say who person is

design can really differ depending on who

give names (allows referring back with more info later)

characteristics of person (e.g., job, expertise)

story forces us to fill in description with relevant details

Sometimes describe a complete “**accomplishment**”

forces us to consider how features work together

# Using tasks in design

## Write up a description of tasks

formally or informally

run by people and rest of the design team

get more information where needed

Manny is in the city at a restaurant and would like to call his friend Sherry to see when she will be arriving. She called from a friend's house while he was in the bus tunnel, so he missed her call. He would like to check his missed calls and find the number to call her back.

# Types of Task Analysis

## Hierarchical Task Analysis

focused on decomposing a high-level task into subtasks

## Cognitive Task Analysis

focused on understanding tasks that require:

decision-making

problem-solving

memory

attention

and judgement

# Task: Park in a new neighborhood

Peter is going to brunch on a Sunday with his roommates. He is trying a new place he found on Yelp. He has the address for the place and he is using a smartphone GPS for directions. He leaves the apartment with his roommates at around 8:30am and he wants to beat the crowd so they won't have to wait in line. He is driving a Toyota Corolla that he has owned for five years. It is a rainy day and he doesn't have an umbrella.

# Task: Park in a new neighborhood

unknown neighborhood/restaurant

Peter is going to brunch on a Sunday with his roommates. He is trying a **new place he found on Yelp**. He has the address for the place and he is using a smartphone GPS for directions. He leaves the apartment with his roommates at around 8:30am and he wants to beat the crowd so they won't have to wait in line. He is driving a Toyota Corolla that he has owned for five years. It is a rainy day and he doesn't have an umbrella.

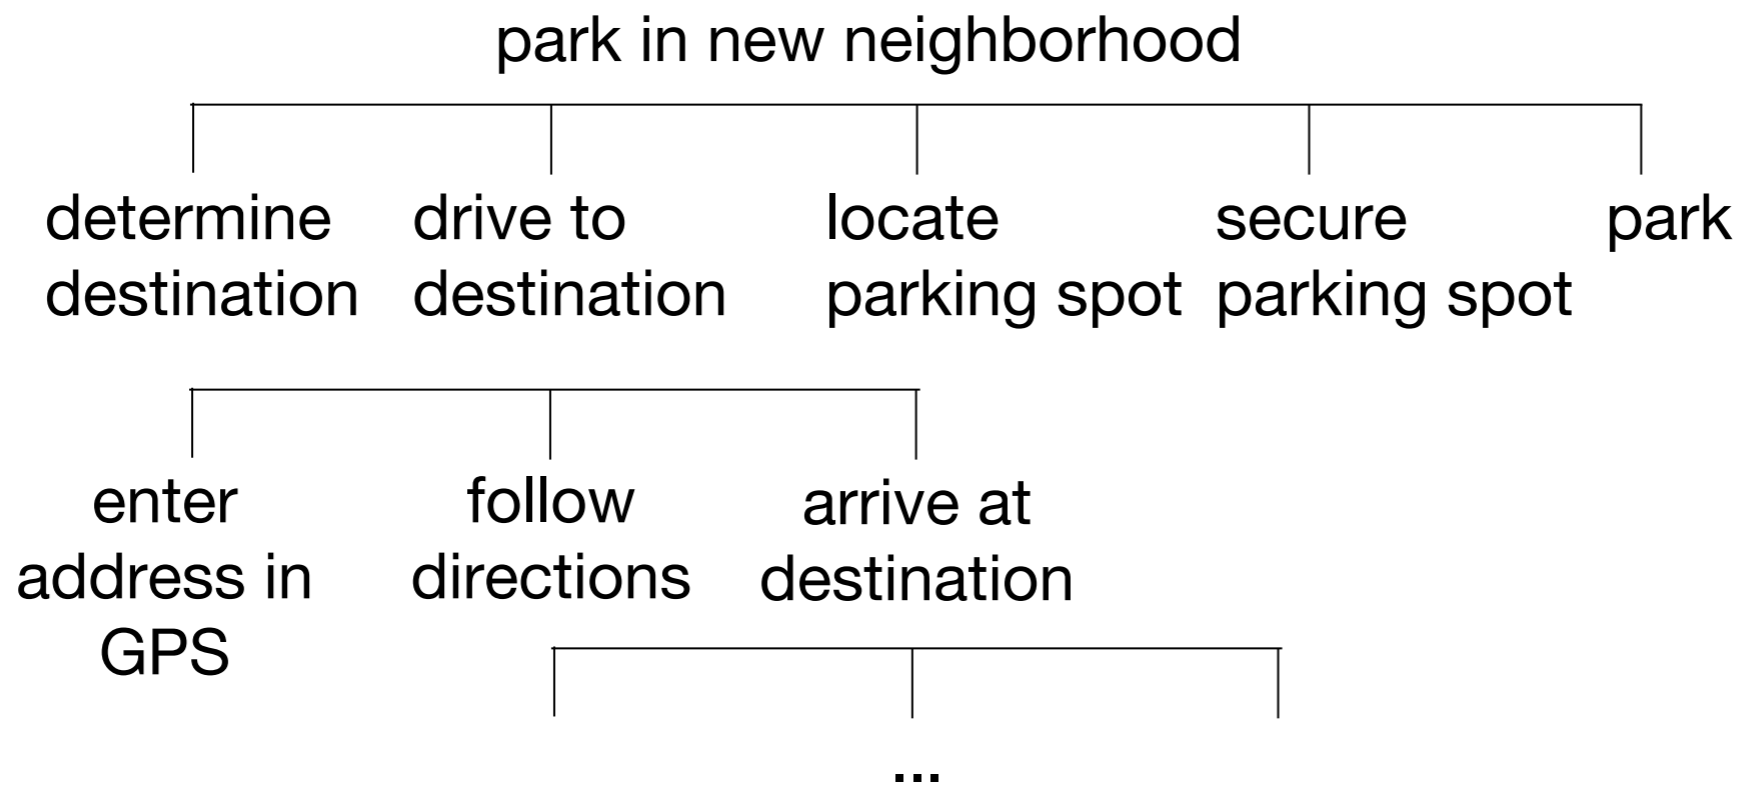

# Task: Park in a new neighborhood

needs to find a parking spot close by?

Peter is going to brunch on a Sunday with his roommates. He is trying a new place he found on Yelp. He has the address for the place and he is using a smartphone GPS for directions. He leaves the apartment with his roommates at around 8:30am and he wants to beat the crowd so they won't have to wait in line. He is driving a Toyota Corolla that he has owned for five years. **It is a rainy day and he doesn't have an umbrella.**

# Hierarchical Task Analysis: Park in a new neighborhood

Steps of the task execution (detailed in a hierarchy)

# Using Tasks in Design

## Rough out an interface design

discard features that do not support your tasks  
or add a real task that exercises that feature  
major elements and functions, not too detailed  
hand sketched

## Produce scenarios for each task

what person does and what they see  
step-by-step performance of task  
illustrate using storyboards

# Task Analysis with your group

## **In your team:**

- remind yourself which tasks you observed when doing your user research with your first participant
- select a main task that you wish to support within the scope of your project
- perform a task analysis (use the questions on the worksheets to guide your analysis)
- mark where you need more information (i.e., where your user research will be particularly useful!

Ask me something!
