

# Jasper

## An intelligent mirror to transform your outfit selection process

Outfit selection is difficult and time-consuming, especially with a disorganized wardrobe. An “intelligent” mirror can help people save time by selecting and locating outfits via voice commands and hand gestures.

### Recommend Outfits

“Jasper, dress me up”

### Visualize Outfits

“Jasper, overlay my blue dress shirt”

### Locate Items

“Jasper, where is my black shirt?”

### Manage Inventory

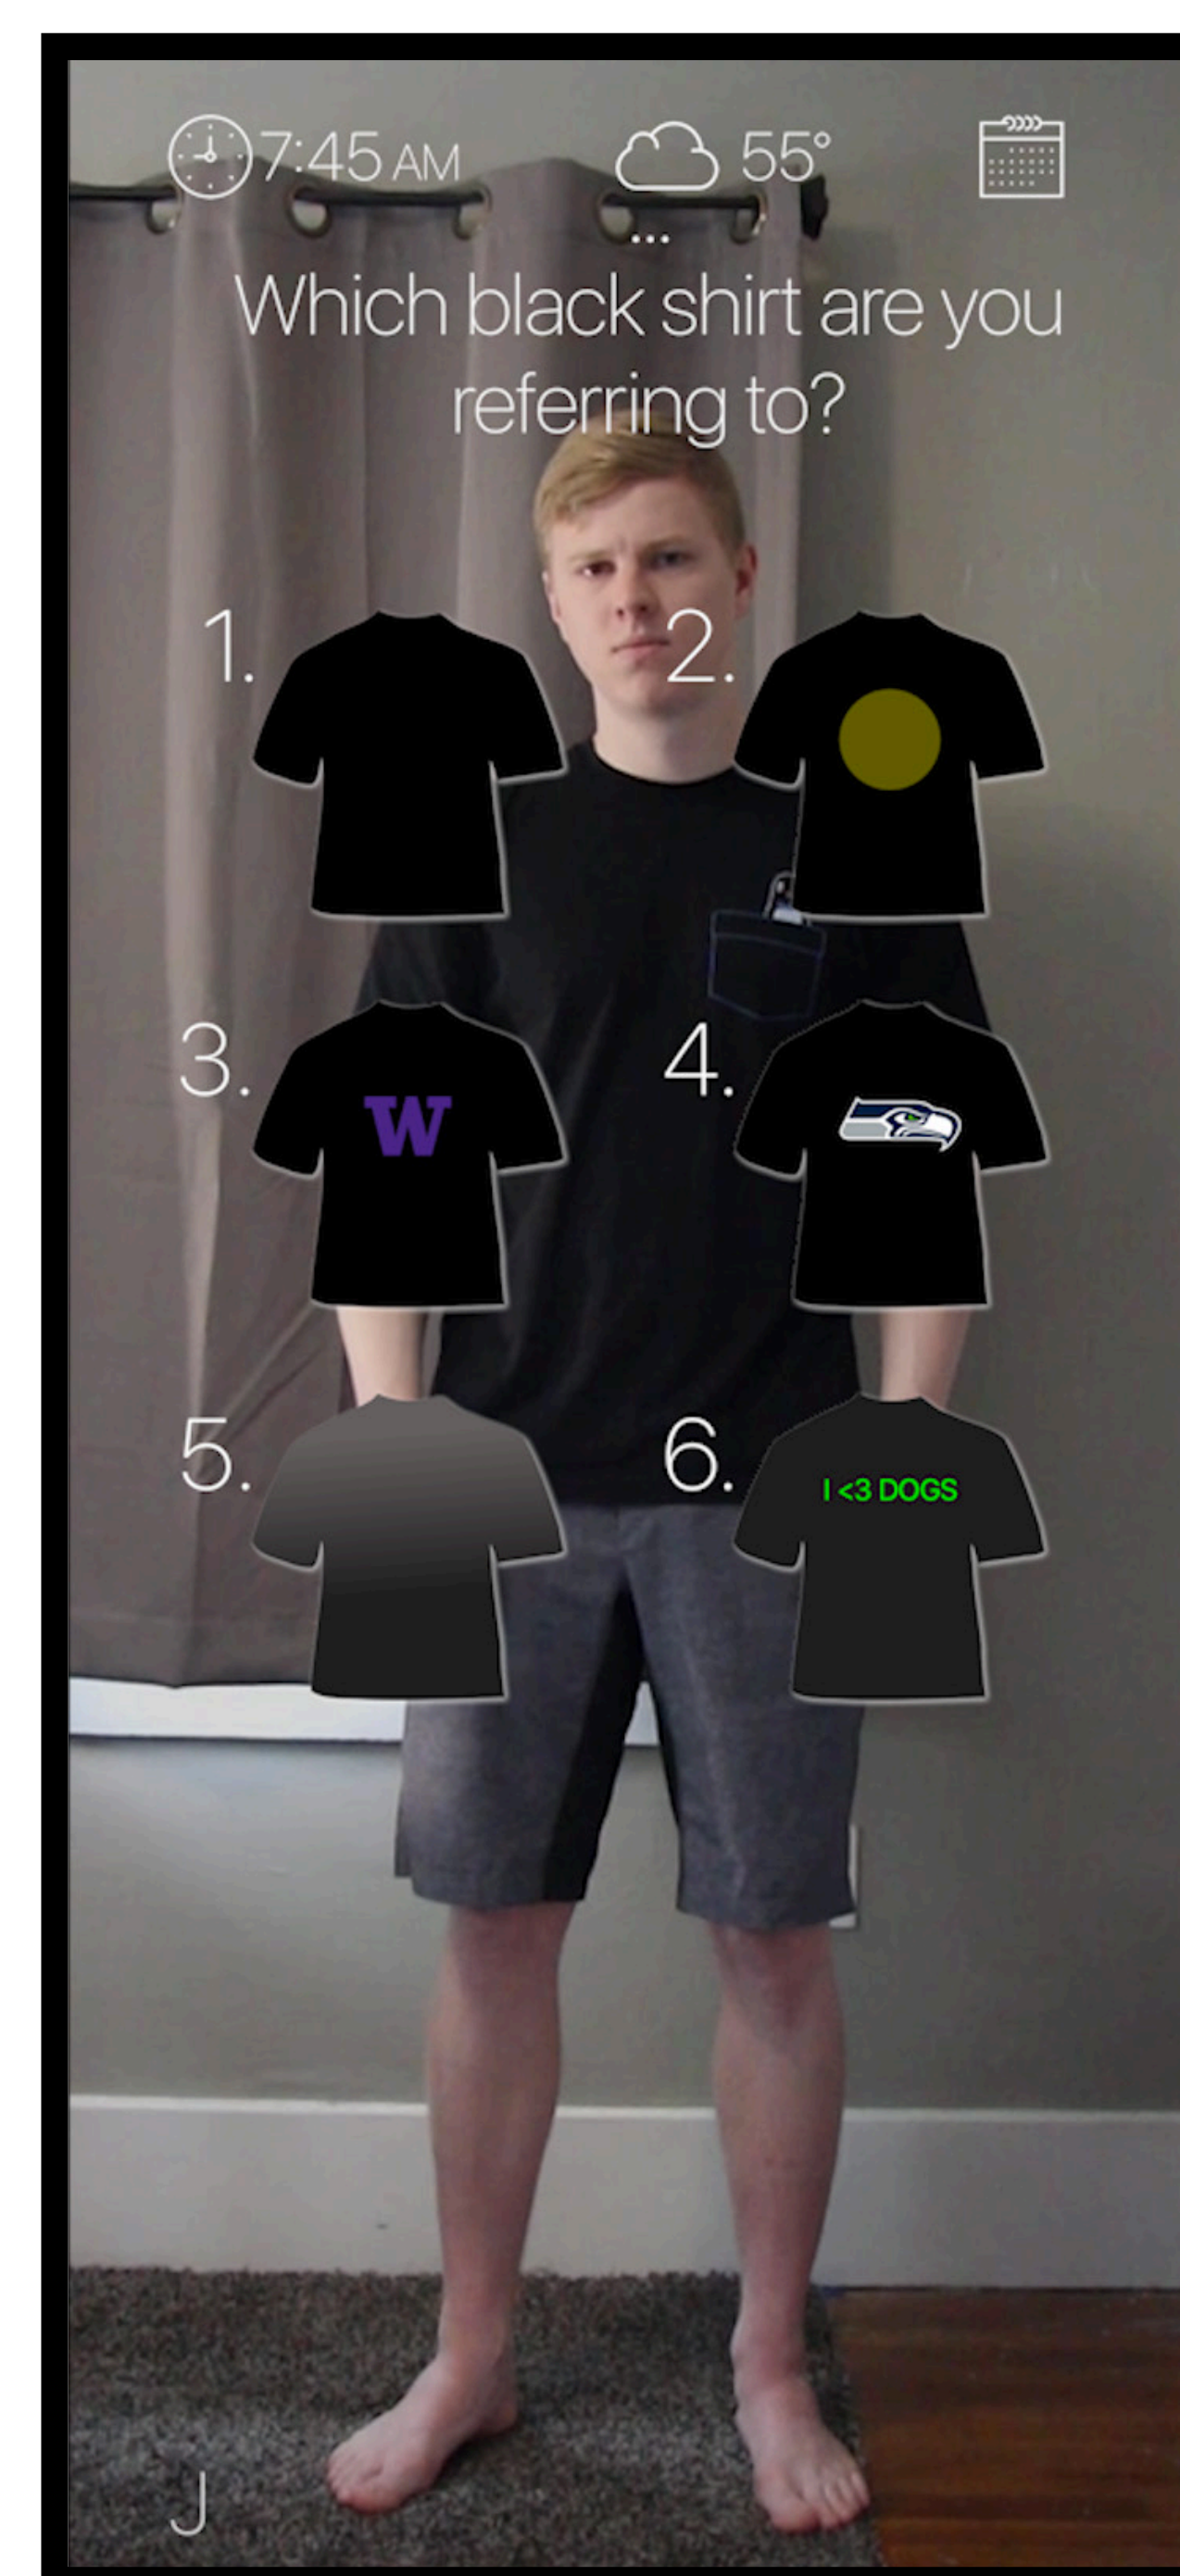

“Jasper, show me blue shirts”

Swipe horizontally to change clothing items

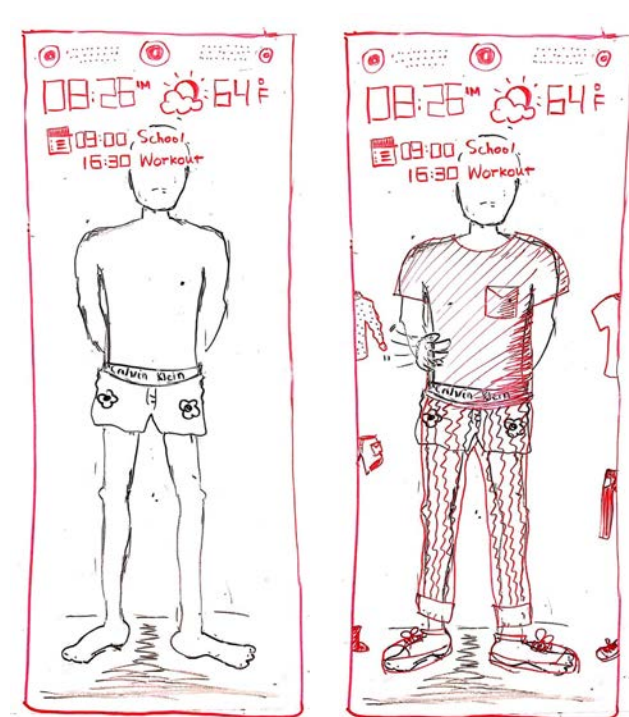

Swipe vertically to change clothing areas

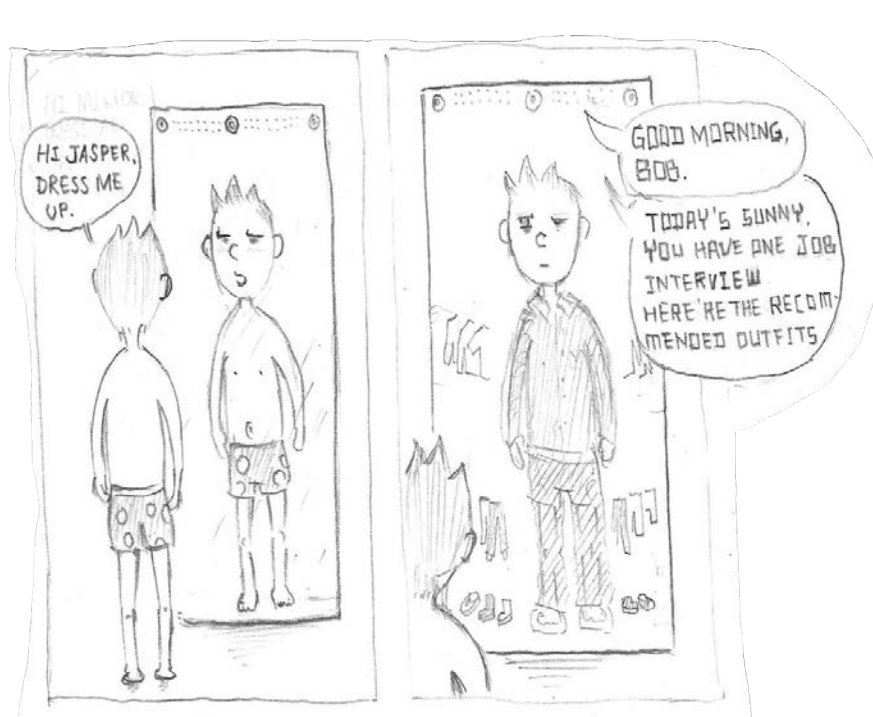

Query specific items with voice commands
